

Imaginal Cells & the Evolution of the Butterfly

Imaginal Cells & the Evolution of the Butterfly

by [Bruce Lipton](#)

sourced from [Abraham Heisler](#)

April 2012

Renowned cellular biologist, Dr. Bruce Lipton narrates the process of a caterpillar transforming into a butterfly over a milieu of imagery in "The Evolution of the Butterfly".

The film combines first hand footage from the Occupy Wall Street movement with stylized portraits of the recent economic collapse and gives a backdrop of hope to sometimes bleak reality.

For more information on the caterpillar and butterfly, humanity and society, see [Spontaneous Evolution: Our Positive Future And A Way To Get There From Here](#)
