

In Response to Freedom of Information Act Requests: CDC Admits There Is No 'Gold Standard' for the Isolation of ANY Virus

[In Response to Freedom of Information Act Requests: CDC Admits There Is No 'Gold Standard' for the Isolation of ANY Virus](#)

[CDC NOW Admits NO 'Gold Standard' for the Isolation for ANY Virus!](#)

No One Has Ever Isolated, Purified and/or Scientifically Verified and Proven the Existence of Any and All Viruses at Anytime, Anywhere in the World!

by [Robert O. Young DSc, PhD, Naturopathic Practitioner](#)

June 13, 2021

Over the last several months we have requested from the Center of Disease Control (CDC) evidence for the isolation and existence for the any and all viruses, including CoV – 2 and 19, MERS, Influenza, Polio, Measles, HIV, XMRV, HTLV-1, HTLV-III/LAV, HPV, Ebola, Zika, just to name a few of the so-called viruses, disclosed under the Freedom of Information Act (FOIA).

These written requests were made by Ms. Christine Massey to CDC/ATSDR FOIA Chief Officer Mr. Robert Andoh, to locate and deliver ANY records, research and/or findings for ANY “viral” isolation and purification (by anyone, anywhere, anytime in the World) from a patient sample via maceration, filtration and/or the use of an ultracentrifuge or what is called the ‘Gold Standard’ for isolating and identifying a pathological micro or nana organism. The ‘Gold Standard’ for isolating and identifying microbes is referred to as Koch’s and Rivers Postulates which was established many years ago.

Koch vs Rivers

Koch (1884)

1. The microorganism found in the ill but not the healthy
2. The microorganism must be isolated from a diseased organism and grown in pure culture.
3. Produce same disease in host
4. Re-isolation of microorganism

Rivers (1937)

1. Isolation of virus from diseased host
2. Cultivation of virus in host cells
3. Proof of filterability
4. Produce same disease in host
5. Re-isolation of virus
6. Detection of a specific immune response to virus

Method for Isolating Virus

The CDC Chief FOIA, Mr. Roger Andoh provided straightforward responses to each one of our requests, admitting in writing that they have NO RECORD of ANY KIND, for the following so-called phantom "viruses", including CoV - 2 -19, HIV, HPV,

XMRV, HTMV-1, HTMV-111/LV, Measles, Influenza, MERS, EBOLA, ZIKA, POLIO:

Welcome to the Centers for Disease Control and Prevention (CDC) Freedom of Information Act (FOIA) site. CDC is the nation's leading public health agency, dedicated to saving lives and protecting the health of Americans. CDC ensures its science and research activities and its employees comply with federal laws, regulations, and policies in order to exercise the highest level of scientific integrity. At the core of this mission is information sharing—not just health information and disease study results, but information CDC gathers as part of a continuous process of putting information into action. As a science-based agency funded by U.S. taxpayers, CDC is committed to openness and accountability. Like all federal agencies, CDC is required to disclose records requested in writing by any person unless the records (or a part of the records) are protected from disclosure by any of the nine exemptions contained in the law. This site provides information about the CDC FOIA Office program and how to access CDC records.

1. June 7, 2021: CDC admits they have **no record of any “COV – 2 or 19 virus”** purified from any patient sample via maceration, filtration and use of an ultracentrifuge, by anyone, anywhere, ever:

June 7, 2021

Ms. Christine Massey
21 Keystone Avenue,
Toronto, M4C 1G9
Via email: cmssyc@gmail.com

Dear Ms. Massey:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of April 16, 2021, for:

[A]ll studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any "COVID-19 virus" (including "B.1.1.7", "B.1.351", "P.1" and any other "variant") (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum). Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: • cultured an unpurified sample or other unpurified substance, and/or • performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or • sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or • produced electron microscopy images of unpurified things.

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for Immunization and Respiratory Diseases apprises that CDC does not purify or isolate any COVID-19 virus in the manner the requester describes.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARequest@psc.hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal."

Your appeal must be postmarked or electronically transmitted by September 5, 2021.

Sincerely,

Roger Andoh
CDC/ATSDR FOIA Officer
Office of the Chief Operating Officer

Fax: (404) 235-1852

2. June 7, 2021: CDC admits they have **no record of any “HPV virus”** purified from any patient sample via maceration, filtration and use of an ultracentrifuge, by anyone, anywhere, ever: (note: CDC made an error in their original response and later provided the corrected version below):

June 7, 2021

Ms. Christine Massey
21 Keystone Avenue,
Toronto, M4C 1G9
Via email: cmssyo@gmail.com

Dear Ms. Massey:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of April 16, 2021, for:

All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any "HPV" aka "Human Papillomavirus" (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for Emerging and Zoonotic Infectious Diseases apprises that CDC has not attempted purification of HPV from human material and does not have documents that may have been published by others on this topic.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARequest@hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal."

Your appeal must be postmarked or electronically transmitted by September 5, 2021.

4. A Letter from the CDC Concerning the Childhood and Adult USA "Immunization Schedule":

	DEPARTMENT OF HEALTH AND HUMAN SERVICES	Public Health Service
		Centers for Disease Control and Prevention (CDC) Atlanta GA 30333
		June 7, 2021

Ms. Christine Massey
21 Keystone Avenue,
Toronto, M4C 1G9
Via email: cmssyc@gmail.com

Dear Ms. Massey:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of March 1, 2021, for:

*All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any "virus" addressed by any vaccine on either the childhood or adult U.S. "immunization schedule" (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic material** (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).*

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for Immunization and Respiratory Diseases apprises that CDC does not purify or isolate any "virus" addressed by any vaccine on either the childhood or adult U.S. "immunization schedule" virus in the manner the requester describes.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARquest@psc.hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal."

[Note: there was a reference to "influenza" in this request, but it doesn't affect our request in any way because it was in the context of our example of the record we were looking to

validate that the CDC does not have ANY record or research or findings for ANY so-called virus that is responsible for ANY sickness or disease – EVER!]

5. June 10, 2021: CDC admits they have no record of any “MERS virus” purified from any patient sample via maceration, filtration and use of an ultracentrifuge, by anyone, anywhere, ever:

June 10, 2021

Ms. Christine Massey
21 Keystone Avenue,
Toronto, M4C 1G9
Via email: cmssyc@gmail.com

Dear Ms. Massey:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of May 4, 2021, for:

All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any MERS (Middle East Respiratory Syndrome) "virus" (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for Immunization and Respiratory Diseases apprises that CDC does not purify or isolate any MERS virus in the manner described.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Dear Freedom of Information Officer,

This is a formal request for access to general records, made under the *Freedom of Information Act*.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the **purification** of any "XMRV" aka "xenotropic murine leukemia virus" [via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"], directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Please note that I am not requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other small things).

Please also note that my request is **not limited** to records that were authored by the CDC or ATSDR or

that pertain to work done at/by the CDC or ATSDR. Rather, my request includes any record matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere, ever that has been downloaded or printed by the CDC or ATSDR and possibly (but not necessarily) relied on as evidence of a disease-causing "influenza virus".

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Via email: cmssyc@gmail.com

Dear Ms. Massey:

This letter is in response to your attached Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of March 22, 2021.

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention and the National Center for Emerging and Zoonotic Infectious Diseases searched but found no responsive records.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARquest@psc.hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal." Your appeal must be postmarked or electronically transmitted by July 6, 2021.

Sincerely,

Roger Andoh
CDC/ATSDR FOIA Officer

Dear Freedom of Information Officer,

This is a formal request for access to general records, made under the Freedom of Information Act.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any "HTLV1" aka "Human T-cell lymphotropic virus type 1" (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other small things).

Please also note that my request is not limited to records that were authored by the CDC or ATSDR or that pertain to work done at/by the CDC or ATSDR. Rather, my request includes any record matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere, ever that has been downloaded or printed by the CDC or ATSDR and possibly (but not necessarily) relied on as evidence of a disease-causing "influenza virus".

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:
Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

Dear Freedom of Information Officer,

This is a formal request for access to general records, made under the *Freedom of Information Act*.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the **purification** of any "HTLV-III/LAV" aka "Human T-Lymphotropic Virus Type III/ Lymphadenopathy-Associated Virus" (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic material** (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Please note that I am not requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification (separation)** from everything else in the

patient sample, as per standard laboratory practices for the purification of other small things).

Please also note that my request is **not limited** to records that were authored by the CDC or ATSDR or that pertain to work done at/by the CDC or ATSDR. Rather, my request includes any record matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere, ever that has been downloaded or printed by the CDC or ATSDR and possibly (but not necessarily) relied on as evidence of a disease-causing "virus".

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Dear Ms. Massey:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of March 1, 2021, for:

Description of Requested Records:

All studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of any "influenza virus" said to have caused disease in humans (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other small things).

*Please also note that my request is **not limited** to records that were authored by the CDC or ATSDR or that pertain to work done at/by the CDC or ATSDR. Rather, my request includes any record matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere, ever that has been downloaded or printed by the*

CDC or ATSDR and possibly (but not necessarily) relied on as evidence of a disease-causing "influenza virus".

A search of our records failed to reveal any documents pertaining to your request. Specifically, the National Center for Immunization and Respiratory Diseases searched and found no records regarding the requested specified records.

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIArequest@psc.hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal." Your appeal must be postmarked or electronically transmitted by July 11, 2021.

Sincerely,

Roger Andoh

Enclosure

#21-00788-FOIA

[Note: there was a reference to "influenza" in this request, but it doesn't affect our request in any way because it was in the context of our example of the record we were looking to validate that the CDC does not have ANY record or research or findings for ANY so-called virus that is responsible for ANY sickness or disease – EVER!]

If no one anywhere at any time in the World has isolated and proven the existence of any such novel coronavirus or for any virus as a unique pathogen, **how on earth can any pharmaceutical company provide a treatment with a vaccine for a virus that does NOT even exist?**

Is the virus or pathogen a mythical virus that needs a mythical (but expensive and poisonous!) vaccine to destroy it?

Or is this phantom virus the creation of 'bad actors' and 'luciferians' for the purpose of redistributing the wealth of the world to themselves and at the same time reduce the surplus population of so-called 'useless eaters'?

As Voltaire once warned us:

“Those who can make you believe in absurdities can make you commit atrocities.”

As stated quite clearly by Chief Officer Mr. Roger Andoh in his CDC FOIA letters:

“Since no quantified virus isolates of the 2019-nCoV are currently available, assays [diagnostic tests] designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA...”

As Rappoport has stated,

“Since that is the case, that there are no quantified virus

isolates, how can one be sure of what is being determined as COVID -19 is, in fact, COVID -19?"

You cannot because you are looking for something that does not even exist!

You see the symptoms of cov – 19 are all symptoms of chemical and radiation poisoning. And the corona virus is not a virus at all but a symptom of cell membrane degeneration I call the 'corona effect'!

Micrograph of Targeted Red Blood Cells with 'Corona Effect'
Indicating Oxygen Deprivation and Radiation Poisoning

The 'Corona Effect' Caused by Systemic Chemical and Radiation Poisoning Leading to Pathological Blood Coagulation, Hypoxia and Death

The two micrographs above show the 'CORONA EFFECT' on the red blood cells with the 'SPIKED PROTEIN' caused by decompensated acidosis of the interstitial and then vascular fluids from an acidic lifestyle and specifically, exposure to toxic pulsating electro-magnetic fields at 2.4GHz or higher, chemical poisoning from the food and water ingested, toxic acidic air pollution and chem-trails and to top-it-all-off a chemical laden inoculation! Please check your feelings and false beliefs at the door before YOU prematurely cause YOUSELF harm!
