Available at Press for Truth [Lbry](#) and [BitChute](#) channels.

Informed Consent is the newest film by Jamie Icke that exposes the dangers associated with taking a vaccine.

A global inoculation rollout is currently underway with a rushed Pfizer vaccine that has already proven to be dangerous yet scores of people are willingly lining up to take the experimental jab simply because they are watching far too much mainstream news on the television.

In this video Dan Dicks of Press For Truth speaks with Jaymie Icke about his newest film “Informed Consent” and the balance he hopes to bring to the minds of the masses so that they can truly make an informed decision when it comes to accepting the Covid-19(84) vaccine.
