Transcript:

Former Italian Health Minister Roberto Speranza is under investigation for homicide after emails reveal that, from the very start of the vaccinations, he knew the shots were killing people and gave orders to local health authorities to conceal deaths and serious side effects in order to reassure Italian citizens of their safety and to not jeopardize the vaccination campaign.

The story has been reported on both German and Italian news networks.

I will now provide an English translation.

The Rome Public Prosecutor's Office is investigating Roberto Speranza, the Italian government's health minister, during the time of COVID measures. He was responsible for the vaccination campaign.

The investigations are the result of complaints related to the so-called AIFA emails from the Italian Medicines Agency. The former director of AIFA, Nicola Magrini, is also under investigation.

The publication of these internal emails revealed that they had been aware of the dangers of the COVID vaccination from the start.

The accusation is that the responsible minister and the head of the drug authority knowingly and deliberately exposed the unsuspecting Italian population to this risk. Yes, they encouraged Italians to get vaccinated.

Vaccination was even made mandatory for certain professional groups. Consequently, many side effects, including fatal ones, came to light.

The investigations are for murder, serious bodily harm, and more, because Speranza and Magrini evidently gave instructions to the local health authorities to conceal the deaths and serious side effects that occurred immediately after the vaccinations began, in order not to jeopardize the vaccination campaign and to reassure the citizens about their safety.

The responsible minister and the head of AIFA are now expected to answer for these actions.

According to the complaints from the police unions and the financial police, as well as from the private organization Listen to Me, which represents 4,200 people damaged by vaccines.

In Italy, police officers and teachers were subjected to mandatory COVID vaccination.

Here is the former health minister, Roberto Speranza, proudly announcing vaccination statistics in Italy.

“We have now reached a massively significant percentage of

vaccinated people in Italy, 89.41%. Therefore, currently in Italy, just over 10% of the population remains unvaccinated.”

Well, today Roberto Speranza is under investigation for lies he allegedly told about vaccines.

Among the crimes he is accused of are ideological falsehood and murder.

“Look, this is the document we are showing you tonight exclusively. It states the former minister Roberto Speranza, along with Nicola Magrini, the former general manager of AIFA, are both registered in the investigative records of the Rome Prosecutor’s Office.”

Last week, the House of Representatives of the Philippines passed a resolution to investigate over 260,000 unexplained excess deaths in 2021 and 67,000 unexplained excess deaths in 2022.

The next day, they were hit by a 7.6 magnitude earthquake.
