

Jabbed and Denied Life Insurance

[Jabbed and Denied Life Insurance](#)

by [Rosanne Lindsay](#), Naturopath, [Nature of Healing](#)
April 14, 2022

Last November, 2021, [news reports threatened](#) that if people who die of COVID were not vaccinated, their families may not get death benefits they would otherwise have received.

If the only guarantee in life is death, then at least there is life insurance, right?

Wrong! Fast forward to the Post-COVID Era, and the fallout from Emergency Use Authorized (EUA) vaccines. According to [Forbes Magazine](#), if today you choose to receive a COVID-19 injection, it could prevent you from receiving a death benefit from your life insurance.

Say what?

No More Death Benefit

According to [an article](#) by Brain Peckford, a recent post-Covid vaccine death in France was ruled to be “a suicide” by a judge, due to the experimental nature of the “vaccine.” The insurance company refused to pay. No death benefit. The article reads:

A wealthy elderly man with a high value Life Insurance policy to the amount of millions of euros... dies from the covid jab. His death as a consequence of being jabbed is not disputed by the doctors, nor his life insurers. The Insurance company refused to pay the policy, citing that the taking of

experimental drugs, treatments, etc., is excluded from the policy. The family takes the insurance company to court and they have just lost the case.

The judge stated, “the experimental vaccine side effects are publicised and the deceased could not claim not to have known about them when he voluntarily took the jab. There is no law or mandate in France which forced him to be jabbed. Therefore, his death is essentially suicide”.

Suicide is explicitly excluded from this particular policy and in fact from all life insurance policies in general.

This has been the finding of a major western world court system and there is zero doubt that insurance companies world wide will cite this case as legal fact.

Therefore, if anyone ever challenges you on whether these jabs are experimental or not, and that neither the pharma companies, nor govts, nor anyone else but YOU are responsible for accepting them and if you die, legally you have committed suicide.

No insurance, no payouts, no refunds. You are on your own!

Link to original [French article](#).

Listen to Dr. Pierre describe the same story and explain the view of the [American Council of Life Insurers](#); that insurance companies may deny payment of death benefit if death results from the experimental COVID injection.

How could this possibly be? One moment the experimental vaccine and the [boosters protect you against COVID](#), but the next moment [they do not](#)? One moment you are insured with the injection, but the next moment, you are not? As the French say, “[C’est la vie. C’est la guerre!](#)” Meaning? *Such is life! That’s war. It can’t be helped!*

Changing Narratives

Changing narratives happen by design. Those who own the narrative control the outcome. Moreover, in America, under the [Smith-Mundt Modernization Act](#), the media is free to [legally propagandize](#) Americans. The EUA vaccines, once advertised to “save lives by preventing deaths” from COVID-19 coronavirus infections, are now “suicidal.”

In May 2021 it was a different story. According to the [American Council of Life Insurers](#), **life insurers could not deny** a death benefit because the deceased was vaccinated against COVID-19:

A social media post appears to be behind the spread of entirely false information, suggesting a COVID-19 vaccine could be a factor a life insurer considers in the claims-paying process.

The fact is that life insurers do not consider whether or not a policyholder has received a COVID vaccine when deciding whether to pay a claim.

Life insurance policy contracts are very clear on how policies work, and what cause, if any, might lead to the denial of a benefit. A vaccine for COVID-19 is not one of them.

Policyholders should rest assured that nothing has changed in the claims-paying process as a result of COVID-19 vaccinations.

But good propaganda shifts with the winds. Today’s America is not yesterday’s America. America has been hijacked, morally corrupted, debauched, and sold to the highest bidder.

In fact, if you received the Pfizer/BioNTech, Moderna, or Johnson & Johnson COVID-19 vaccines, you received a vaccine deemed “emergency use authorization” (EUA) from the FDA. No EUA injections are FDA-approved vaccines. Further, the first injections deployed were labelled “experimental.” Thus, participants who consented, without proper [Informed Consent](#),

became subjects in an ongoing clinical study. Note: Life insurance companies do not cover experiments.

In other news, if you are unvaccinated and hospitalized, insurance may not pay either. A [news release](#) from the University of Michigan states:

“Many insurers claim that it is justified to charge patients for COVID-19 hospitalizations now that COVID-19 vaccines are widely available,” said lead author Kao-Ping Chua, M.D., Ph.D., a health policy researcher and pediatrician at Michigan Medicine and the Susan B. Meister Child Health Evaluation Research Center. “However, some people hospitalized for COVID-19 aren’t eligible for vaccines, such as young children, while others are vaccinated patients who experienced a severe breakthrough infection. Our study suggests these patients could substantial bills.”

To recap: if you are 1) Unvaccinated and hospitalized, or 2) vaccinated pre-death, then life Insurance does not pay what you might expect, if at all.

The Double-edged Sword

Read the article [Dissolving a Pandemic of Fear](#), to understand that this trend first began in distant lands during the summer of 2021 with unusual side effects to the globally-deployed experimental vaccines:

Because of the uncertainties from unauthorized tests and experimental vaccines, [insurance companies in India](#) and [Korea](#) are limiting what they will cover if someone becomes sick from the COVID injections:

Contrary to popular perception, existing health insurance policies are unlikely to cover the cost of vaccination and adverse reactions, if any. Only policies designed purely for the COVID vaccination process – there is none at the moment – will cover the costs.

If you consented to an EUA injection, your life insurance policy has changed. You can't win for losing, and you can't claim your life insurance for dying. Something that cuts both ways is known as a double-edged sword.

Justice Through the Courts?

The federal [PREP Act](#) and [CARES Act](#) prevent practically all civil litigation, ranging from COVID "vaccines" to "tests," to doctors/pharmacists/nurses. All have blanket civil (but not criminal) protections. All prosecutions are 100.0% discretionary, meaning that even if one admits to a criminal (COVID) act, no private citizen has the power to prosecute any alleged criminal act. That power rests solely with the district attorney and attorney generals – not citizens.

What does this mean? ALL prosecutions are political. In other words, The ONLY way to legally challenge all the "COVID" treason is confined to CRIMINAL prosecutions. [Evidence proving criminal fraud has been submitted](#) to the appropriate authorities, and yet there have been no criminal prosecutions through the Department of Justice. Why not? Good question.

What about [life insurance fraud](#)? Can insurers be prosecuted in the courts if the Life Insurance Council COVID policy is against the policy holder?

In response to a FOIA request, a federal district judge recently ordered [Pfizer Inc. to release 55,000 pages of documents each month](#), after Pfizer claimed it would not disclose any data for 75 years. That means all the Pfizer vaccine data should be made public by the end of September 2022, rather than the year 2097.

Yet, who is in charge of sifting through the flood of information? What are the consequences of learning the truth that was meant to be hidden? No one knows. What about the fact that government appears to be practicing medicine without a license? How could this possibly be?

Because the narrative is always written by those who control the pen, you must do your own research and captain your own ship. Call your insurance company directly. Ask an “expert” if getting the vaccine will affect your life insurance coverage in any way. Ask if future EUA jobs will affect your premiums or payouts.

Then ask yourself if paying those high insurance premiums is worth the outcome in The COVIDIAN Age, or if it is better to put your money elsewhere.
