In this conversation (***recorded on February 1, 2021***) James spells out what the GameStop / WallStreetBets fiasco was *really* about. Not that some retail investors were able to squeeze some hedge funds who were naked short selling and thus “win the game” (spoiler: the government will not allow David to beat Goliath), but that millions of people have just seen the markets for what they are: A fake and rigged game run by a mafia that will never allow you to win. This is an educational moment about the power of decentralized movements that people of all stripes pooh-pooh to their detriment.

If you appreciated this conversation, check out the full hour-long conversation between James and Pete Quinones on the [Freeman Beyond the Wall podcast](#), which includes a discussion of the historical technocratic movement and how it evolved into the governing principle of the growing technofascist dictatorship.
