via [ANTIJANTEPODDEN](#): Investigative journalist James Corbett has investigated how psychology is being weaponized to target dissidents.

In this episode he explains the absurdity of the old diagnoses of anarchia, which was too much love for freedom, and drapetomania, which was the mental illness of slaves running away from their masters.

Over the last three years, we have seen a medical doctor being diagnosed and force medicated for corona insanity. This was because of his resistance to the government narrative in Switzerland. We have also seen an increased willingness to pathologize conspiracy theorists, and to label people as domestic terrorists for using their right to share their opinions.

Even though the methods used against us are ugly, and the majority just go along uncritically, James Corbett shows examples of how modeling disobedience can dramatically turn the situation around.
