There were no planes. Nuclear bombs were used. Holograms were beamed. And the Israeli government was involved.

I have hosted a few 9/11 conversations, from [Mike Berger](#) arguing that controlled demolition was used, to [Judy Wood's](#) fascinating hypothesis surrounding [directed energy weapons](#).

Firstly, I'm not going to entertain the laughable, official story.

Sixteen years after a series of coordinated terrorist attacks

by al-Qaeda (as the story goes) shook the United States and the world, the number of questions-raised-left-unanswered has perhaps never been any higher. Through their constant probing, investigating and challenging of the official story, world-class journalists, architects, engineers and families of the victims of 9/11 in particular have, however, to their credit, managed to unearth and pool together enough evidence over the years, to make a compelling case to suggest that the “official” narrative of 9/11 is only a “story” and not an accurate narration of what had actually happened.

Secondly, understanding what actually happened is difficult due to [mass censorship](#) by The Cathedral (media plus government plus academia). A good indicator of where one might find (more of) the truth, however, is to search for what is being censored or outside of the [Overton Window](#).

At least, that’s my rule of thumb.

Which is why I am intrigued by both [Mike’s](#) and [Judy’s](#) arguments. [James Fetzer](#), who has been my podcast [a few times](#), has been investigating 9/11 for many years and, in my opinion, has the most persuasive hypothesis.

Our Conversation

In the following two-hour conversation, James presents 135 slides and an enormous amount of critique, including

- what happened (or didn't happen) at the Pentagon;
- what happened (or didn't happen) at Shanksville;
- why planes could *not* have crashed into the Twin Towers;
- why two of the four planes didn't even take off;
- why Osama and Muslim "terrorists" were a false flag;
- the use of "mini-nukes" (which gives weight to the [spike in cancers](#));
- the names and faces of those involved; and
- the motivations behind the operation.

I recommend watching instead of listening, for obvious reasons.
