Peter Duesberg is a molecular biologist and a molecular and cell biology professor at the University of California, Berkeley. At one time, he was an acclaimed scientist who was the world's foremost expert on AIDS. That all changed when he was blackballed by Anthony Fauci and the scientific establishment for the temerity of revealing the truth that HIV does not cause AIDS. Duesberg was slandered as a homophobe for revealing the scientific evidence that AIDS was caused by the use of certain dangerous recreational/pharmaceutical aphrodisiacs by the sodomite community that over time broke down the immune systems of the users who then developed AIDS. He revealed that the prevalence of AIDS in Africa is simply explained by recategorizing as HIV the endemic immune deficiencies that were always understood to be caused by malnutrition, tainted drinking water, and various infections.

Dr. Duesberg reveals how Fauci pushed the toxic drug called AZT (Zidovudine) to people who were found to have antibodies to HIV. Those patients were poisoned by the drug (AZT) that was supposed to treat them. AZT, in actuality, caused AIDS, which eventually killed the patients. That is much like the

present regime of treating COVID-19 with unsafe and ineffective mRNA vaccines and toxic therapeutics like Veklury® (remdesivir) while suppressing safe and effective therapeutics like hydroxychloroquine and Ivermectin.

Duesberg's book exposes the incompetence, megalomania, and in some cases criminality of Anthony Fauci, and other NIH, FDA, and CDC officials. It reveals the genesis of the establishment of what has become a cabal of ruling technocrats in government which has now brought Orwellian oppression across the United States and indeed the world through the COVID-19 scare and mandatory experimental vaccinations.

There were very powerful interests who tried to kill Duesberg's book before it ever saw the light of day. The publisher, Regnery, in its preface to the book explains how Peter Duesberg went through two publishers who backed out of publishing the book at late stages, apparently due to some hidden pressure from an unseen hand.

This book is now out of publication. But there is still robust demand for the book which has driven the price up. While Amazon offers the audible version of the book at a reasonable price, as of January 28, 2022, the hardcover version was priced at \$1,260.00 and the paperback was priced at \$536.00.

[It is now a free PDF download.](#)

Excerpt From the Publisher's Preface:

Regnery is the third publisher to have contracted to publish *Inventing the AIDS Virus*. Addison Wesley initially announced the book in 1993. St. Martin's signed it in January 1994 and subsequently assigned its contract to us in January 1995. We announced it, initially, in the fall of 1995 and finally published it in February 1996. Bryan Ellison, Duesberg's former research assistant and original co-author, became disenchanted with Duesberg's and his publisher's insistence on careful documentation and self-published his own version under

the title *Why We Will Never Win the War on AIDS* in 1994. We sued Ellison for breach of contract and copyright violation and, after a two-week federal court jury trial, were awarded a six-figure verdict and an injunction against Ellison's edition. *Inventing the AIDS Virus* has been edited by at least five editors, has been agonized over by the publishers of three major publishing firms, and concurrently praised and damned by countless critics.

Excerpt from the foreword by Nobel Laureate Kerry Mullis, creator of the PCR test:

We have not been able to discover any good reasons why most of the people on earth believe that AIDS is a disease caused by a virus called HIV. There is simply no scientific evidence demonstrating that this is true.

We have also not been able to discover why doctors prescribe a toxic drug called AZT (Zidovudine) to people who have no other complaint than the presence of antibodies to HIV in their blood. In fact, we cannot understand why humans would take that drug for any reason.

We cannot understand how all this madness came about, and having both lived in Berkeley, we've seen some strange things indeed. We know that to err is human, but the HIV/AIDS hypothesis is one hell of a mistake.

I say this rather strongly as a warning. Duesberg has been saying it for a long time. Read this book.

Kary B. Mullis
Nobel Prize in Chemistry, 1993

Prior to his untimely death on August 7, 2019, Kerry Mullis had this to say about Anthony Fauci and his ilk:

"Guys like Fauci get up there and start talking, you know, he

doesn't know anything really about anything and I'd say that to his face. Nothing. The man thinks you can take a blood sample and stick it in an electron microscope and if it's got a virus in there you'll know it. He doesn't understand electron microscopy and **he doesn't understand medicine and he should not be in a position like he's in.** Most of those guys up there on the top are just total administrative people and they don't know anything about what's going on in the body. You know, those guys have got an agenda, which is not what we would like them to have being that we pay for them to take care of our health in some way. They've got a personal kind of agenda. They make up their own rules as they go. They change them when they want to. **And they smugly, like Tony Fauci does not mind going on television in front of the people who pay his salary and lie directly into the camera."**

Notice the book, [*Inventing the AIDS Virus*](#), on the table in front of Mullis during the interview.
