Beyond Belief TV Series Special...

Habitable life on this planet is far older than scientific credit is given and the research of Brad Olsen reveals that hominid life is far more diverse than anyone could have ever imagined.

Legends of peoples great and small permeate every culture throughout the world.

Teams of archaeologists and anthropologists have made amazing finds which substantiate the truth to such legends.

But to protect the accepted narrative of mainstream science, these findings have been quickly swept away and kept out of the inquisitive eye of the public.

With the stirrings in Antarctica becoming more well-known, these secrets may not remain hidden for much longer Brad Olsen is the author of nine books, including two in his Esoteric Series: “Modern Esoteric” and “Future Esoteric.”

An award-winning author, public speaker, radio show host of “The Esoteric Circle,” book publisher and event producer, his keynote presentations and interviews have enlightened audiences at convention all over the world.

A media phenomenon, Coast to Coast AM deals with UFOs, strange occurrences, life after death, and other unexplained (and often inexplicable) phenomena.
