

Luciferase Chain Reaction to ID2020

[Luciferase Chain Reaction to ID2020](#)

by [Rosanne Lindsay, ND](#), *Nature of Healing*

July 22, 2020

Put down the mask. The mask is a tool of conditioning, a temporary distraction from the new technology.

Biometric bioluminescence.

Bioluminescence is a “cold light” that derives from a chemical reaction within a living organism. Cold light means less than 20% of the light generates thermal radiation, or heat. Most bioluminescent organisms [are found in the ocean](#); fish, bacteria, and jellies. Some bioluminescent organisms, including fireflies and fungi, are found on land. There are almost no bioluminescent organisms native to freshwater habitats.

Until now.

Luciferase Chain Reaction to ID2020

Scientists say humans can utilize bioluminescence through a chemical enzyme called Luciferase. Enzymes catalyze biochemical chain reactions in the body to make things happen. The root word lucifer – means lightbringer. It also happens to be the name of the [Vatican's binocular telescope, LUCIFER](#), atop Mt. Graham in southeastern Arizona, as well as the name of an infamous fallen angel.

Researchers at MIT created a microneedle platform using fluorescent microparticles called quantum dots (QD),

which can deliver vaccines and at the same time invisibly encode vaccination history directly in the skin. Bill Gates calls it the Human Implantable Quantum Dot Microneedle Vaccination Delivery System.

The researchers designed their dye to be delivered by a microneedle patch rather than using a traditional syringe and needle. Such patches are now being developed to deliver vaccines for measles, rubella, and other diseases. The QD are composed of nanocrystals, which also emit near-infrared (NIR) light that can be detected with a specially equipped smartphone using an app. The dots are about [4 nm in diameter](#), and are encapsulated in biocompatible microparticles that form spheres about 20 μm in diameter. This encapsulation allows the dye to remain in place, under the skin, after being injected.

Forget the [HIPAA Privacy rules](#). The MIT team set out to devise a method for recording vaccination information in a way that [doesn't require a centralized database or other infrastructure](#), rather it is an "on-patient," decentralized medical record. No mention of adding or subtracting information, or hacking was disclosed. The team wrote:

Because these phones offer on-board processing power, camera applications, and inexpensive consumer-grade camera modules, they chose to adapt an existing smartphone to enable NIR imaging rather than build a completely new imaging system.

This experiment was conducted in rats in the December 2019 journal [Science Translational Medicine](#) which concluded:

intradermal QDs can be used to reliably encode information and can be delivered with a vaccine, which may be particularly valuable in the developing world and open up new avenues for decentralized data storage and biosensing.

[Biosensing](#) is a new drop sensing method for faster testing of Covid-19, published June of 2020 in [ACS Nano](#).

Sound Supernatural?

Biometric ID2020 & Cryptos

COVID19 seems to be an acronym for Coronavirus I.D. 2019. This I.D. will be delivered via quantum dot microneedles, as a digital identification mark. Part of this injectable system will include a human implantable device for buying and selling cryptocurrency. The digital ID will come in the form of something called an [Immunity Passport](#).

In the [Information Age](#), advertisers claim blockchain-enabled digital “immunity passports could help take the strain off increasingly stretched healthcare systems and help reinvigorate shrinking economies.” But what if the Immunity Passport is also your passport to travel by plane, to buy a car, to purchase food, to see a show?

The Plandemic is the vehicle for the government to move from a currency system (a dollar in your pocket) to a crypto system, to allow government to get deeply into your business.

Think Smart Meter in your body.

The Luciferase chain reaction is set up to: 1). inject everyone with a universal shot, 2). create a device for buying and selling currency that’s run on the human body as it’s battery, and 3). attach both those things to a digital identification from ID2020.

Crypto is not a currency. It’s a control system. Your crypto (in a digital system) can arbitrarily be taken away if you don’t behave. That is not your asset. It is a credit at the company store. And they can take it away or change its value.
– [Catherine Austin Fitts, investment advisor](#)

Unlike the dollar, which is tied to the oil standard as the petrodollar, the crypto will have a human being as its collateral.

Catherine Austin Fitts says:

So you see Bill Gates coming out with ID2020, so every human being has a biometric ID. They're talking about changing from an oil standard to a human standard. And where I come from, we call that slavery. Where the dollar syndicate wants to go is a [Mark of the Beast System](#), a control system. The end of currencies."

FUN FACT: The publication of this [Microsoft patent? #060606](#)

The US government (Navy) is working with a Danish tech firm to come up with an [implantable chip that would integrate with a cryptocurrency](#) called Ripple. The technology being rolled out over the next decade, from life extension technology to new energy systems, to building out space, can create incredible wealth, for some. But there is also a reason to believe in the dumbing down of an entire global population.

Slavery.

Spiritual war.

Biowarfare.

The Global Superbrain

The Covid19 solution being called a "vaccine" is the Human Implantable Quantum Dot Microneedle Vaccination. It is not a vaccine. It is an implantation to become a part of the Cloud.

Image by [6557056](#) Think Star Trek, The Borg. As in: We are the Borg. Your biological and technological distinctiveness will be added to our own. [Resistance is Futile, You will be Assimilated.](#)

According to a research published in the journal *Frontiers in Neuroscience*, exponential progress in nanotechnology, nanomedicine, artificial intelligence (AI), and computation will lead this century to the development of a “[Human Brain/Cloud Interface](#)” (B/CI).

Being connected to the Cloud would mean neural nanorobots would provide direct, real-time monitoring and control of signals to and from brain cells to allow Matrix-style downloading of information.

These devices would navigate the human vasculature, cross the blood-brain barrier, and precisely autoposition themselves among, or even within brain cells. They would then wirelessly transmit encoded information to and from a cloud-based supercomputer network for real-time brain-state monitoring and data extraction. With the advance of neuralnanorobotics, we envisage the future creation of ‘superbrains’ that can harness the thoughts and thinking the power of any number of humans and machines in real time,” – [Robert Freitas, senior author of the research](#), University of California, Berkeley and Institute for Molecular Manufacturing in the US.

“Cryptocurrency is not a currency, it’s a crypt.” – [Catherine Austin Fitts](#)

Luciferase is not only a ‘near infrared bioluminescence enzyme’, it is a chain reaction to catalyze an ID tracking system.

Put down the mask.

Know what are are consenting to.

Know what you are connecting to.

Know you always have a choice.
