Excerpts from the video interview with Jeremy Nell found below:

“Whether or not we align ourselves with truthful ideas, that are in harmony with natural law or in defiance of said law, is really a question of whether or not we’re fit to survive or not, and whether we’re gonna be enslaved by an oligarchical class who themselves are devoted to a very specific set of very perverted wrong ideas that they’re religiously committed to.

“Whether we tolerate that indefinitely or not, I don’t think the universe has that in our destiny. I don’t think we’re wired for that ultimate destiny to be just a slave society.”

“By looking at the structures of control over the next 2,500 years, they’ve always used something similar to seduce... people who are mystically-minded or superstitious.

“They need people... who have not taken the time to use their own minds as tools responsibly, and are still locked in a realm of superstition, to then be seduced to come in as initiates into their different lodges...”

“...In the case of like South Carolina, half of the state

legislature were black slaves who were elected.

"In the 1870s, you could see the configuration of the South Carolina state legislature and state senators, and half of them are black people.

"This is the state where, 80 years later, you weren't allowed to vote if you were black. There were Jim Crow laws and lynchings.

"So you're like, how did that happen? How did that regression happen?..."

"I don't know exactly what (to answer your question) is going to be required for people to finally wake up to this actual, insidious deep-state operation inside of the heart of America. I don't know what the answer is to that.

"The way I tend to look at the oligarchies, at these secret societies, and what the oligarchies, upper echelons, actually believe in, I see it as a bit of a controlled form of insanity that has persevered over a very long period of time based on its momentum.

"There's a certain power of momentum that has maintained its continuity. But ultimately, it's a technique of perverting their own children..."

"But one of the big obsessions that they put a lot of time into is thinking about how do you ensure that your institution will maintain itself despite the fact that it demands unhuman modes of conduct in your children and managers – the managerial class that will maintain your system after you die? They think trans-generationally.

"And so there has been a cultivation of a perverse form of education for the elites, grooming for the elites, both as

children and as they go out..."

"So I don't think that they really do have secret knowledge... I do believe that they believe that they do.

"I do believe that they believe that they can get all sorts of weird, nasty energy from their victims, their sacrificial victims, and I do believe that they believe in all sorts of demonic forces..."

"But again I see it as a perversity. I don't see it as real secret knowledge. But it has power in the sense of the belief that causes actions to be put in a certain direction always.

"They will religiously always do certain things the same way, no matter what, which is why these oligarchies come close to their transhuman and new world order on many occasions in the past.

"Even before the word transhumanism was coined, they still wanted it. It was just called feudalism, managed by a master class of "beyond humans" who expected their slaves to perceive them as if they were gods or other forms of supernatural deities that you couldn't possibly contend with because you're just a lowly mortal."

"If the oligarchy was as powerful as they want us to believe they are...they already would have won. We wouldn't be here having this conversation.

"The reason why we have this space, this time, that has been won for us, has a lot to do with the fact that Russia and China and India increasingly have chosen to exit the unipolar system, which was supposed to be the controlled demolition of the economy, like they did in 1929.

"They were planning on doing this in 2009 when the first economic collapse could have taken down the entire system. They had to postpone that. Because, again, they need everybody in the same building when it's lit on fire and demolished."

"So I think the oligarchy – they try to project an image of being these immortal gods of Olympus. But they're really more like the emperor that has no clothes. They're a lot more insecure than than we think."

Matthew Ehret is a journalist, lecturer and founder of the [Canadian Patriot Review](#).

The Federal Bureau Of Investigation (FBI) is the domestic intelligence and security service of the United States, officially charged with investigating federal crimes.

It was founded in 1908 as the Bureau Of Investigation (BOI) by attorney general Charles Bonaparte. The BOI was created in response to the growing threat of "[anarchism](#)" and other forms of political violence.

In 1919, the BOI was reorganised and renamed the Division Of Investigation (DOI).

In 1924, J Edgar Hoover was appointed director of the DOI.

He served as director of the FBI for 48 years, from 1924 to 1972. During his tenure, Hoover made the FBI a powerful force in American law enforcement.

However, most don't know about its Masonic and otherwise occultic history which played an important role in the shadowy governance of the United States and manipulation of the system.

Albert Pike (1809-1891) was an American attorney, soldier, writer, and Freemason.

He is best known for his prominent role within Freemasonry and his contributions to Masonic literature.

Albert joined the Masonic fraternity in 1850 and rose to prominence within the organisation. His most notable work is his book *Morals and Dogma of the Ancient and Accepted Scottish Rite of Freemasonry*, published in 1871. It is considered one of the most influential works on Freemasonry and explores the philosophy, symbolism, and rituals of the Scottish Rite.

Officially, Freemasonry is a fraternal organisation that traces its origins back to the medieval guilds of stonemasons. It developed into a broader social and philosophical movement in the 17th and 18th centuries. Freemasonry is known for its symbolism, rituals, and principles of moral and ethical conduct.
