"Covid 'vaccines' caused 20 times as many serious side effects and 23 times as many deaths as all other vaccines in the past 20 years combined."

This week MEP Christine Anderson (AfD) gave [her first speech](#) before the European Union's new "COVID-19 inquiry committee". The German MEP condemned the EU's Covid policies and demanded an investigation into the clear human rights violations under the pretext of combatting a virus.

Anderson railed against the "false claims regarding the safety of the vaccines, their alleged definitive approval, and so-called effectiveness." The MEP pointed out that the European

Medicines Agency (EMA) database shows that in seven months, the Covid “vaccines” caused 20 times as many serious side effects and 23 times as many deaths as all other vaccines in the past 20 years combined.

“Why isn’t that being investigated,” questioned the MEP. She explained that the government’s Covid policies had nothing to do with public health. Instead, it seems it has been “a money-making exercise for the pharmaceutical industry.”

Why were alternative methods to fight Covid not investigated or given to the public, questioned Anderson? Instead, she exclaimed, everything in your whole Covid policy “boiled down solely to: “vaccinate, vaccinate, vaccinate.”

Issues Committee Must Address

Anderson pointed out other issues that the committee must investigate. She first zeroed in on the “implementation of vaccine contracts.” Little information is available on vaccine makers’ contracts due to the committee withholding the information. She questioned how she could “properly do her job as an elected MEP” and educate her constituents without the data.

The massive “restrictions of fundamental rights that are unworthy of a democracy” must also be investigated, exclaimed the MEP. “From job losses, discrimination and marginalization, we have experienced a redefinition of fundamental rights.” According to the new definition, our rights are now privileges to which the government picks and chooses who to grant them.

The MEP demanded answers as to why the committee is not investigating the “marginalization and criminalization of critics” who condemned their “anti-democratic measures.”

She went on to say that it is unacceptable for the World Health Organization (WHO) to sign new contracts with EU member states. As Anderson has [previously explained](#), the WHO is

fighting for de facto governing power over EU member states in the event of a pandemic:
