

Mudfossil Studies: Gold's True Source

Source: [Mudfossil University](#)

Published on Feb 22, 2019

In under 30 seconds you will understand where gold comes from and how it deposits. There is "Lode" Gold which is like the thumbnail and deposits in chunks and also "Placer" gold which is bits. I know where the Lode Gold is...so will you.

For brief insight into what mudfossils are, see this post by [Michael Tellinger](#).

For other reasearch, including many photos and videos, see [Roger Spurr's Mudfossil](#) video channel.

Some related work can be found at [Sylvie Ivanova's megaliths.org](#) website and video channel [newearth](#).
