

Municipal Leaders Can Pass Emergency Ordinances to Stop 5G Installation During COVID-19 Quarantine!

Municipal Leaders Can Pass Emergency Ordinances to Stop 5G Installation During COVID-19 Quarantine!

by [B.N. Frank](#)

April 4, 2020

Since 2018 people and animals have been getting sick where 5G has been turned on (see [1](#), [2](#), [3](#), [4](#)). Cities, countries, and organizations have taken action against installation. This includes [banning it](#), filing lawsuits and issuing moratoriums, and creating ordinances (see [1](#), [2](#), [3](#), [4](#), [5](#), [6](#), [7](#)). Opposition includes a multitude of catastrophic warnings (see [1](#), [2](#), [3](#), [4](#), [5](#), [6](#)) in addition to [health risks](#) from exposure which includes [reduced immunity to illnesses](#).

Unfortunately, the pandemic has not slowed deployment in the U.S. On the contrary – it's actually sped it up (see [1](#), [2](#), [3](#), [4](#), [5](#), [6](#)).

Thanks to Children's Health Defense for providing information on what to provide to municipal leaders so they can pass [emergency ordinances](#) to stop installation during the quarantine.

Deployment of Wireless During Quarantine Can be

Stopped Legally – Here's How:

Since the beginning of the Quarantine, we have been receiving an overwhelming number of reports from concerned citizens and parents who have been witnessing the aggressive expansion of cellular antenna installations in communities across the country. The vast majority of this activity is occurring without the knowledge or consent of our citizens and is without local government oversight, application approval, public noticing, community participation, environmental review, and most importantly, transparency. Clearly, the telecom companies are using the COVID-19 emergency as cover to expand and cement their rapid and virtually unsupervised deployment of harmful wireless infrastructure and to advance their agenda. To stop this activity and as part of our promise to be pro-active and solutions-oriented with our efforts, the Children's Health Defense legal team came up with a legal solution.

Following the Homeland Security and the FCC orders, local authorities have emergency powers to place a moratorium on non-essential activity, including to pause all pending wireless zoning and right-of-way applications and to shut down new wireless construction.

Use our click-to-action system to easily send the letter below to your municipality by filling out the following form. Then follow up with your Mayor, City Council, and City Manager to encourage them to adopt this emergency measure. Also encourage others you know to take similar action as well.

The telecom industry has still provided [NO scientific evidence](#) that 5G is safe.

Activist Post reports regularly about exposure risks from all sources of [“Electrosmog”](#) including [5G, Bluetooth, Cell Phone and WiFi radiation](#). For more information, [visit our archives](#) and the following websites:
