

Niels Harrit Exposes the Terror War Lie

“...Because 9/11, yes, it started 18 years of still-ongoing wars and destruction in the middle east and the clash of civilizations. But it was also a wake up call for – what should we say – consciousness. And, one thing, our most powerful tool, and they didn’t count on that. Remember that YouTube did not come up before 2005. There were no videos on the internet when the event happened. And they couldn’t have foreseen that or taken it into account. So, if you say if the Vietnam war was stopped by television, which it was, the middle east wars will be stopped by the internet – provided they will not succeed in cracking down on the internet as is happening these very days. Okay? It’s very important that we fight for this channel. The pictures are moving the hearts. I’m a scientist and I’m perfectly aware that science can only move the brains. It will be those making the pictures, the filmmakers, you yourself a very strong force, and the documentaries which are moving the minds and the hearts. And this is very important.

*So in order to prevent this thing from happening again, we have to push every button within reach, wherever we are in time and space. ‘What can I do?’ the activists ask. This is a question I very frequently get. And my answer is ‘**push every button within reach, wherever you are in time and space, push all the buttons’...**” ~ Niels Harrit*
