Transcript Excerpts:

[Dr. Andrew Kaufman](#)

Well obviously there is no concern over health and safety – that there's another agenda going on here. You know, if we look back to the swine flu so-called pandemic in the 1970s there was an experimental vaccine then. And they had just 53 questionable deaths. And they pulled the entire product from the market.

*So, obviously, what's happening now is that the authorities are ignoring these numbers and pushing it through. And that's because **there's another agenda to use these products in order to affect the population.***

*And I want to say that also there have been recently contracts between Pfizer and other companies and governments around the world stipulating the agreements or the arrangements around selling these so-called vaccines. And one of the stipulations is that **they will not release the adverse events for a period of 10 years.***

And so, if there is such a contract signed with the United States government, that could be a reason that they are essentially suppressing the data and not using that in making determinations for FDA decisions.

...

*Well, **these injections are really nothing more than poison.** And there are several strategies that Pfizer took to prevent some of this information from coming to light.*

For example, in their clinical trial that they used to get the EUA [Emergency Use Authorization] status, and I'm sure they submitted this data for the approval that was just granted, they actually stopped the control group after a

very, very short time period – and vaccinated them all very quickly. So, in other words, you couldn't see any long term differences between the vaccine group and the control group in these clinical trials.

And, of course, this covered up all these adverse events from being seen in that official data set. So that's part of the story, of course, that's going on. And, you know, it seems like this is just going to be pushed out more and more over time.

And then we have some, of course, lots of reports from different scientists who have looked at what's actually in these files and they found various undisclosed ingredients that are essentially acting as toxins. And we're seeing this kind of response going on around the world in people who have received these jabs.

...

I want to say there's there's another really important aspect to why the FDA was able to do this approval. And it has to do with actually that vaccine label that you talked about at the beginning. Because, if this were applied for to the FDA as a gene therapy product, there are additional regulatory experiments that need to be satisfied – and that's with respect to shedding. So there's even a guidance from the FDA on this that I've reported on before – that any product that is a gene therapy that causes the recipient to make a foreign protein, because that's what the technology is designed to make codes for the spike protein. So whoever receives this injection would make the spike protein – or that's what they say how it works.

So you would have to test all the body fluids – for example, like sweat, urine, feces, tears saliva etc. – for the presence of the spike protein in order to satisfy the regulatory guidelines to get FDA approval. Because if it were

present in the body fluids then you could exchange it with another person. And since the spike protein is toxic or foreign protein it could cause problems in people that exchange of body fluids with someone who's been jabbed.

And this is something that has been very expensive in the past and has been a barrier to getting gene therapy products approved. So by designating this a vaccine, and having to redefine what a vaccine is, they've bypassed the need for those testing to be done. And that lays this past for potential approval which has now been granted.

...

...it's called the Scientists Club Analysis and it's available on the internet. But I happen to know who one of the main scientists is and I trust their work, so that's why I'm willing to report on this in the preliminary stage.

I know there's going to be a better report prepared for public consumption soon, but I think it's important to know this preliminary analysis – because **in several of the injections, including the Pfizer injection, they found the presence of nano materials...**

In the Pfizer "vaccine" they actually found elements like chromium, sulfur, aluminum, chloride and nitrogen.. And these these metals, especially the... chromium and aluminum, and in other samples bismuth and copper, **are not disclosed ingredients. So they're not supposed to be in there.**

And these metallic substances have different magnetic properties that would make them possibly to be used in nano-metallic particle devices. So there's a possibility there is some nano technology in here.

Now there also is elemental analysis showing carbon and oxygen. Now this could represent the graphene oxide that we've heard about but it's not a definitive test for that. So

we would need additional testing to know for sure to confirm and validate the results put out by La Quinta Columna from Spain. But I think that this is certainly compatible with that analysis and we know there's much circumstantial evidence that graphene oxide could be in these injections as well.

So we're talking about now some confirmatory science of nano-metallic particles found in these jabs and these certainly could be responsible for at least some of the toxicity and adverse events that we're seeing.

...

...I want to you know just make sure that everyone understands that whether this is emergency use authorization or whether it's full FDA approval. And, by the way, what I'm saying now is not just relevant to the vaccines but this also goes for any medical procedure that you are coerced or "mandated" to do – like including health questions, answering those, submitting to temperature checks, wearing a mask, getting tested or taking any of these jabs – whether they're approved or experimental, it's simply against many different laws... You are guaranteed the sanctity of choosing what happens to your own body.

Now is a critical time, I fully agree with you Sean, because once people enroll in any kind of digital surveillance program – and I'm talking about vaccine passports of any kind – that is truly the end of all semblance of freedom that we may still have.

And, of course, if you submit to the injection then you're essentially changing your body in a way that may not be reversible. And you're gonna most likely end up part of this surveillance state, should be able to you know come to fruition as the planners have intended.

...There actually is no virus whatsoever. And no real new

disease except for possibly some poisoning by various means that may occur in certain areas...

*This vaccine is being rolled out for a different agenda. And if we just look at the other vaccines – now I realize that these are different technology but I think it's a model that we can look to – and since I have actually taken the time to research what's going on with the vaccines, **I've come to the conclusion that much of the chronic illness that we see in our population worldwide is actually a direct result of these combinations of vaccines.***

And I'm talking about specifically neuro-developmental diseases like autism. I'm talking about autoimmune diseases. I'm talking about dementias. And so a lot of the burden of illness that we experience right now is due to this old vaccine technology.

Now this new technology, of course, has the potential to do a lot of different things because it can result in gene modification. And even if the current round of this technology doesn't have all of that machinery, we know that it exists and it's used in all kinds of experiments.

And I'm talking about, for example, like the CRISPR technology which allows gene editing – where it can take a gene out of you and pop in a replacement gene, and can even be tuned so that you pass that on to your children... You can see that already researchers have designed and tested devices that are nano-particulates that are injectable. And many of them are involved with gene therapy that can actually control behaviors of animals... So this is a a field that's already in existence and if we can imagine how this may be applied to these injections – because we see a regimen going on...

...

...on some of the vaccine passports they've shown online they actually have spots for up to eight boosters to be recorded.

So we can see that they can keep coming up with new formulations, change the ingredients, maybe even under the FDA approval or they could get further emergency use authorizations for things that they say would address variants.

And so we see that this campaign is going to intensify. And I believe that the ultimate goal is related to the **transhuman agenda**, which is documented by many organizations and in many places...

...

We've essentially seen a lot of rituals play out during the the course of this pandemic. And I think the masks are one fantastic and primary example.

Because if we look at initiation rituals we see that the masks are almost universally applied... And this plays an important psychological role – that you shed your prior identity and you do that through the use of a mask, which makes you anonymous. Right? It de-identifies you. And then you go through the initiation ritual and on the other side of it you come out with a new identity as part of the group.

And I think that one of the big purposes of the mask is to initiate people into this surveillance state of a technocratic totalitarian type of structure.

...

This summer I've heard a lot of anecdotal reports...of summer cold or respiratory illness...

But what I think is going on is that we have seen first of all tremendous wildfires across the western part of the United States, creating a tremendous amount of air pollution. And who knows what types of accelerants or chemicals were used, you know, in those fires that may be in the air that

we've been breathing.

And then, in addition, there's been just an incredible geoengineering spraying campaign this summer.

In the area where I live and many other areas, the leaves are falling off the trees. And if you look at them you see that they are – what appear to look like chemical burns on these leaves, that they've turned black and falling off. And I believe there's a good chance that this is what people are breathing in and is causing... the wave of respiratory illnesses.

Now we have this whole story about ivermectin and hydroxychloroquine being able to relieve symptoms and be very clinically successful – and there's quite a bit of data.

And there's also quite a bit of propaganda...

There are several reasons for this. One main reason is that in order to have the emergency use authorization for the vaccines there has to be no other alternative that's safer.

And, of course, we know ivermectin and hydroxychloroquine have been on the market for a long time. They're past their patent protection and we know that they're generally safe.

Hydroxychloroquine if given in high doses but we know what those doses are, so we can use it effectively.

But I don't actually agree with using that strategy and I'll explain why. What those drugs actually are as they are anti parasite drugs. So they actually kill parasites. And when I say parasites, I am talking about things like worms.

And we have been led to believe that parasites are not something that live in our bodies or contribute to illness in the western developed world.

But, I'll tell you, based on my experience that's absolutely

not true because I've had so many clients who have used different types of natural healing protocols send me pictures of worms coming out of their body left and right.

So the reason why I believe these drugs are effective is because what the illness is – is that there is toxicity in the body and the body is trying to get rid of it through the in the acute infection by all the secretions, coughing things up, dissolving things with fevers etc.

But the people who are more vulnerable to getting a more severe illness they've had a more of a toxic burden to the point that it has attracted parasites to try and clean it up. And sometimes if they can't clean it up it can express as one of these infections.

The same way that a strep throat, if there's damage to the throat, the streptococcus bacteria come in to try to clean it up but they cause the symptoms of an infection....

...

I do want to close with some optimistic thoughts... I believe this is an amazing opportunity for us to step up and start to take responsibility as individual men and women for the situation that we're in... In health care this is really could be a golden age where we get rid of this toxic pharmaceutical system and empower ourselves to take charge of our health and vitality...

Is Graphene Oxide Causing What Is Falsely Being Referred to as 'Covid-19'?

[Is Graphene Oxide Causing What Is Falsely Being Referred to as 'Covid-19'?](#)

by [Gary D. Barnett](#)

July 6, 2021

*"Today, [La Quinta Columna](#) has made an urgent announcement that they hope will reach as many people as possible, especially those involved in health and legal services, as biostatistician Ricardo Delgado, Dr. José Luis Sevillano and the team of researchers and professors with whom they have been conducting their research have confirmed the presence of graphene oxide nanoparticles in vaccination vials."
~ Translated by Orwell City*

Since no such thing as Covid-19 has ever been separated, isolated, or identified, and not one attempt to satisfy Koch's Postulates to determine if a novel 'virus' even exists has been attempted, what is really happening and why have governments worldwide shut down their countries and declared war on their citizenry? What is the real plot, and how many will die due to this fraudulent pandemic scam?

My position since very early on concerning this so-called 'pandemic' has been that the SARS-CoV-2 or 'Covid-19' was just the excuse being used as a government tool to instill great

fear into the people, so as to build a system of total control over the masses. The real bioweapon evident is the poisonous injection mislabeled as the 'Covid vaccine,' and the tactics and mandates that have not only destroyed economic activity, but decimated the health and immune systems of the people at large. This includes every aspect of the lockdowns, quarantines, job loss due to the forced closings of businesses nationwide and worldwide, mask and false testing mandates, and the general terror purposely brought about by the controlling 'elites' and their government partners.

By this time, most should, but few do, understand the poisonous and toxic nature of what is being called a 'vaccine,' and the wide array of deadly adjuvants, live animal tissue, biological additives, metals, nano-particles, gene-altering messenger-RNA, and of course many other unknown or purposely hidden toxins in this deadly concoction. But what else is in this devil's brew?

Just recently, reports coming from a team of doctors, scientists, researchers, and professors from the Spanish organization, La Quinta Columna, have stated emphatically that the highly toxic graphene oxide is not only present in vials of 'Covid vaccines' from most all pharmaceutical manufacturers, but is also being delivered in masks and through 'Covid' testing. This is very startling information, and answers a lot of questions about not only the symptoms present for many, but also may further expose another part of this nefarious agenda that is depopulation.

As stated by this group of researchers:

The masks being used and currently marketed contain graphene oxide. Not only the ones that were withdrawn at the time, as indicated by the media, the swabs used in both PCR and antigen tests also contain graphene oxide nanoparticles.

The COVID vaccines in all their variants, AstraZeca, Pfizer,

Moderna, Sinovac, Janssen, Johnson & Johnson, etc., also contain a considerable dose of graphene oxide nanoparticles. This has been the result of their analysis by electron microscopy and spectroscopy, among other techniques used by various public universities in our country.

The anti-flu vaccine contained nanoparticles of graphene oxide and the new anti-flu vaccines and the new and supposedly intranasal anti-COVID vaccines they are preparing also contain enormous doses of graphene oxide nanoparticles. Graphene oxide is a toxic that generates thrombi in the organism, graphene oxide is a toxic that generates blood coagulation. Graphene oxide causes alteration of the immune system. By decompensating the oxidative balance in relation to the gulation reserves. If the dose of graphene oxide is increased by any route of administration, it causes the collapse of the immune system and subsequent cytokine storm.

Also, according to this study, levels of graphene oxide in certain 'vaccine' vials contained up to 99% graphene oxide and little else. This toxin can cause pneumonia when the nanoparticles enter the lungs. Graphene also causes a metallic taste and inflammation of the mucus membranes which can lead to a loss of taste and smell. It can as well cause strong magnetic responses inside a host organism, and can also cause red blood cell damage. When deposited on most any surface, it can be converted into an electronic conductor. This would lead one to question many 'Covid' symptoms and the possible uses of graphene oxide in the so-called 'Covid-19 vaccine,' as this study group also claims that graphene oxide actually causes what is erroneously described as 'Covid.' If this is the case, then the 'vaccine' is indeed the bioweapon.

The very many adverse effects of graphene oxide delivery into living organisms has been long studied, but virtually nothing about this has been mentioned by the pharmaceutical companies, the government, or the mainstream media. In fact, there has

been express denial of any nano-particle use in the flu and 'Covid' injections by these same sources in the past. The information in this report is staggering, but little effort is required to understand the high risk of using these toxic nano-sized particles in 'vaccines.'

Graphene microparticles, and therefore graphene by injection, can lead to major respiratory sickness, including lung cancer. Once these particles are inside the body, and in the cells, the human immune system has not the ability to rid itself of these deadly nano-particles, and they become permanent and can cause extreme physiological harm in the body at the cellular level.

Bioweapons can come in many forms, and this is the new tactic of war against the people by this and other governments. The powerful controlling element of society and its corrupt government partners care nothing about you or your families, but only about power and control over you. The real bioweapon is not any 'virus,' but is the 'vaccine' delivery system itself, along with masks, and testing, as perpetrated by the very entity (government) claiming to be your savior. The elimination of this government is in order.

It seems that the death of billions is sought, and a new master and slave society controlled by technocrats in a transhuman environment is the desired outcome. Today, science fiction has become reality!

[Find out how La Quinta Columna discovered the connection between graphene oxide and electromagnetic fields](#)

by [Orwellito](#), [Orwell City](#)

July 5, 2021

Many are already aware of the work that the team of Spanish researchers that make up [La Quinta Columna](#) have been doing.

They are the ones who have had the courage to get a vial of vaccination and send it for analysis to a renowned Spanish university through Prof. Dr. Pablo Campra Madrid, who is

compiling and officializing the results in a report that promises to be more conclusive than the preliminary one he prepared for the general public early last week.

However, there are people who still do not know about La Quinta Columna. If you are one of those, then the following video is especially for you. Orwell City has transcribed, translated, subtitled and edited the video to keep its message going around the world.

Ricardo Delgado, founder and director of La Quinta Columna participated with his research partner, Dr. José Luis Sevillano, in the XXVIII Humanitarian Conference organized by the World Coalition for Health and Life (**COMUSAV**) and the United Nations Council for Life and Truth (**CONUVIVE**).

Video available at Orwellito [Rumble](#) and [BitChute](#) channels.

Transcript:

“La Quinta Columna wants to make it clear from the beginning that we have the obligation, we have the obligation to be united because we are in the same battle to give the best of ourselves, because what is at stake is precisely the future of all species. Depending on the strength and momentum that we put into this task will depend on the future of all humanity. We are right now at the turning point from which things can begin to change, and in this sense La Quinta Columna is going to summarize what has been the result of its research during this year and a half, but above all and especially during the last two months. And why during the last two months? I always remember Dr. José Luis Sevillano’s words since the two of us work as a binomial and he has been accompanying me in La Quinta Columna. He said that when the vaccination started we were going to really see what he was doing and what material could be in there.

Then we realized that there was a new phenomenon that for a while we tried to deny, although today it's evident because of the millions of videos on social media, and we have been able to even measure it with devices: teslameters, magnetometers, etc. I am referring to the magnetic or pseudo-magnetic phenomenon that people acquire after inoculation. A magnetic phenomenon on the one hand, but also one that turns inoculated people into superconductors and also stores energy that can be measured with a multimeter in certain parts, such as the forehead, for example.

So from there we started to look for what kind of materials or, better said, nanomaterials can cause those kinds of properties inside the body and we came up with some of the candidates. One of them initially was graphene. Graphene inside the body acquires magnetic properties and is a superconductor. It serves for energy storage and condensation and was a strong candidate. Without yet having any knowledge of what was inside the vial, we realized that the industry or rather the stock market of the graphene industry had high uptrend peaks just as the COVID-19 vaccination campaign was starting at the beginning of the year, late December and early January. But also, quite curious, during the flu vaccination campaign.

When we have seen the possibilities that graphene has, or rather, that graphene oxide nanoparticles have inside the body when it comes to neuromodulation and when it comes to picking up neuronal electrophysiological effects for brain mapping, we have realized the possibility that graphene is being injected. Can graphene be injected? Yes. Graphene can be injected. And, in fact, some scientific papers have already raised the possibility that it could be used as a nanoadjuvant in vaccines. With that hypothesis of suspicion, we did what anyone could have done and what I also recommend that you can do if you have access to a

vial.

We had access to a sealed vial from Pfizer, and by means of a request for services to a university, specifically in my name, it was sent for an analysis of the vial, where we were looking for the material in question: graphene. After some time of investigation by Dr. Pablo Campra Madrid, Doctor in Chemical Sciences, Bachelor in Biological Sciences and member of the University of Almeria, we obtained this preliminary report where we are told that there is indeed solid evidence of graphene oxide in the sample and that it is also the main component of what they wrongly called a vaccine.

From here and with this solid evidence, which will be further complemented with other spectroscopy techniques that can be done. Those that have been used are transmission electron microscopy; EMF techniques, also, optical microscopy; and ultraviolet radiation spectroscopy, which coincide with the peak wavelength of graphene oxide. From here we began to study the toxicity or cytotoxicity that graphene oxide has on the body.

Pay attention to this finding: **Graphene oxide inside the body causes thrombogenicity, thrombi. Graphene oxide inside the body causes blood clotting. Graphene oxide inside the body causes post inflammatory syndrome or systemic or multi-organ inflammations. Graphene oxide inside the body when it is above the levels of glutathione –which is the body's natural reserve of antioxidants–, causes alteration of the immune system, collapse of the immune system and cytokine storm. Inhaled graphene oxide spreads evenly throughout the alveolar tract and causes bilateral pneumonias. Inhaled graphene oxide causes inflammation of the mucous membranes and thus loss of taste and smell, possible loss of taste and smell: anosmia.**

In short, graphene oxide behaves exactly like the supposed

SARS-CoV-2 of the official version, generating the same symptomatology of severe COVID-19. When installed at the neuronal level, it causes neurodegeneration or, in other words, neurological COVID-19.

So, from here we started to see what possible compounds, drugs and treatments could degrade graphene oxide. And look what we found: **N-acetylcysteine or glutathione** administered degrade it. Because what glutathione does is counteract free radicals and oxidants, all the toxins that can enter the body.

And we discovered that there were about 300 clinical studies where certain hospitals and certain universities were using N-acetylcysteine with incredible results. For example, 100 patients with saturation levels below 50% practically dead –bluntly speaking–, with bilateral pneumonias, within an hour of intravenous glutathione or N-acetylcysteine administration they made it. They were taken off ventilators and everything.

We now fully understand why those treatments worked: because they addressed all the symptoms of the disease supposedly caused by SARS-CoV-2. Given that to date there is no scientific evidence of an actual sequencing and isolation of SARS-CoV-2, we suspect with many credible indications that COVID-19 disease is actually the side effect of the introduction of graphene oxide into the body by different ways.

And I say ‘different ways’ because, although they were withdrawn at the time, masks containing graphene oxide nanoparticles have been introduced and are still being marketed. These masks have been introduced and are still being marketed by companies such as Nanografi, so we have masks with graphene oxide, but also graphene oxide nanoparticles introduced in PCR tests; graphene oxide is also present in antigen tests; hydrogels also contain

graphene oxide nanoparticles; intranasal vaccines also, since graphene oxide in aerosols is more potent, as is the supposed SARS-CoV-2. Intranasal vaccines are also prepared, for example, by Turkey. They are made by Nanografi for COVID-19 and influenza.

We know that, naturally, graphene oxide is eliminated by the levels of glutathione in the body, and that is why we suspect that they propose a second, third and even fourth dose every so often: so that you have your considerable dose of graphene oxide. In short, we are talking about the simultaneous and gradual mass poisoning of the entire world population.

Think, if the preliminary report of a professor of a public university in Almeria –and I know that the same study is being done in other European and some Latin American universities–, if it determined that there is graphene oxide in the vials, how is it possible that graphene oxide is injected if the masks were removed because it caused pulmonary affections because of this nanoparticle? We are talking about a crime against humanity with the complicity of governments or at least their participation.

When we study glutathione, we realize that it begins to fall from the age of 30 onwards, but above all it falls considerably from the age of 65 onwards. In fact, COVID-19 takes a heavier toll on older people, apart from those who are immunocompromised and have other pathologies. When we study glutathione, we realize that children have high glutathione reserves because of their youth, and the COVID-19 disease itself hardly has an impact on children. Similarly, glutathione is especially low in the obese population and we realize that it is precisely the obese who are most affected by COVID-19. We realize that glutathione is related to vitamin D. Low levels of glutathione are low levels of vitamin D and it is precisely patients with COVID-19 who have low levels of vitamin D. We

realize that athletes have high levels of glutathione endogenously, which are secreted with intense exercise, and precisely athletes are hardly affected by COVID-19.

Everything that we have subsequently studied only further increases and corroborates the hypothesis that the supposed SARS-CoV-2 of the official version is precisely the graphene oxide. And that all the elements of protection, of supposed protection, that we have been given: masks, PCR tests, swabs, antigen tests and vaccine –the wrongly called vaccine– are precisely all those elements that will potentially cause the disease to develop in the future.

And why do I say ‘in the future’? When we studied the electromagnetic phenomenon we realized that graphene oxide has what is called an ‘electronic absorption band’. The electronic excitation, its magnetic resonance is precisely in the third bandwidth of the 5G technology, the one that is being tendered right now and that, remember, has been with us throughout the pandemic.

As absolutely everything started we have had three ‘nets’: The first is that 5G terrestrial antenna that never stopped being placed –because only the antenna operators worked– and that curiously 8 out of 10 of these antennas are placed near geriatrics and nursing homes, in their immediate vicinity, which has been precisely the most affected population. Another inner net: precisely of graphene, according to the preliminary report of the vial of this university. And an external net, which is the one used by space satellites to supposedly provide 5G coverage.

Incredibly, we are narrating a science fiction movie, but believe me, today nanoscience, neuroscience and biotechnology have advanced tremendously. We have only made an approximation in the realm of science and behind the back of civil society. Can a person be controlled or neurocontrolled remotely wirelessly? Yes, it can be

done and it is probably being done in a disguised way, and that may explain some of the anomalous behavioral behavior of the population, especially those who have been inoculated or who have received doses of graphene oxide by different ways. As I say, I know I am drawing a science fiction movie, but at the heights we are at it can be difficult to really believe in something. In this sense we say that COVID-19 is only the collateral effect of the introduction of that nanocomposite by different ways, and we suspect that it was introduced in the 2019 anti-flu campaign.

As I was saying, graphene oxide has an absorption band from which it oxidizes much more quickly when a small button is turned on to provide 5G coverage or to perform a technological test. Do you think it is a coincidence that Wuhan –where the pangolin and bat soup came from as distraction elements– is the first city in the world with the 5G technology trial at the end of November 2019 and that all previous flu vaccination probably with graphene oxide started from there? When excited, graphene oxide multiplies frequencies. With a minimum signal, it oxidizes much faster and breaks the balance between glutathione levels and the toxicity of the organism, generating bilateral pneumonia, altering the behavior of the immune system, which cannot cope as soon as the neutrophils try to phagocytize it as if it were a pathogen, as if it were SARS-CoV-2.

We shared an article today, if I can screen share I'm going to try to do that, can you let me know if you're seeing it on screen? Well, let's see: 'Graphene oxide is detected in the body by specialized cells (neutrophils) of the immune system.' Just as if it were a pathogen. The body, the immune system, doesn't care if there is a biological agent because this never behaved like a biological agent. There are incubation periods if biological. It is not possible

that in residences in our country in Spain, such as Matabaz in Barcelona, half of a residence died in 4 hours. If it is a biological agent, it does not cause bilateral pneumonia, but rather asymmetric pneumonia: they usually enter through the right lung due to symmetry. But half of a residence that had previously been vaccinated against influenza could not die.

Graphene oxide is detected in the body by specialized cells of the immune system

Researchers at Karolinska Institutet, the University of Manchester and Chalmers University of Technology have shown that the human immune system handles **graphene oxide** in a manner similar to pathogens, possibly leading to safer biomedical applications in the future.

Graphene oxide is currently being studied for use in various drug delivery methods and other medical applications (among other non-medical applications). However, it is of critical importance to understand how these materials interact with the body. The study shows that neutrophils, the most common type of white blood cell specialized in combating infections, release so-called neutrophil extracellular traps (NETs) when encountering GO. NETs are made up of a "spider-web" of DNA decorated with proteins that help neutrophils to destroy microorganisms such as bacteria and fungi.

The researchers found that GO causes specific changes in the lipid composition of the cell membrane of neutrophils leading to the release of NETs. They could also show that antioxidant treatment reversed this process. In a companion study published in *Nanoscale*, it was shown that GO is degraded in NETs, much like bacteria and other pathogens.

"Taken together, these studies show that GO can be trapped and degraded in NETs just like pathogens. Understanding how the immune system senses and handles GO paves the way for safer biomedical applications of GO and other graphene-based materials, for instance in the context of drug delivery", say the researchers.

We observed that the higher the flu vaccination, the higher the mortality of COVID-19, and logically we saw a

relationship. The other relationship was with electromagnetic fields. What we did not know is that there was a marking on each of these people to make them a target population for the electromagnetic focus. A lethal weapon that now makes people magnetic and logically you will understand that if they interact with those radiation sources at a specific frequency and quality, they cause in oxidation, they break the redox balance of the oxidative biomarkers of the organism, causing the COVID-19 disease.

We know this crystal clear, and we have all the scientific articles that prove it. One of them is this one:

‘Researchers at Karolinska Institutet, the University of Manchester and Chalmers University of Technology have shown that the human immune system handles graphene oxide in a manner similar to pathogens, possibly leading to safer biomedical applications in the future.’

What you are seeing here is graphene oxide being attacked by neutrophils which are, let’s say, cells of the immune system that try to phagocytize it, try to engulf it: to coagulate it. That’s why graphene oxide generates clots and thrombi.

‘Graphene oxide is currently being studied for use in various drug delivery methods and other medical and non-medical applications. However, it is of critical importance to understand how these materials interact with the body. The study shows that neutrophils, the most common type of white blood cell specialized in combating infections, –just like a pathogen– release so-called neutrophil extracellular traps (NETs, the most common type of white blood cells) when encountering GO (graphene oxide). NETs are made up of a “spider-web” of DNA decorated with proteins that help neutrophils to destroy microorganisms such as bacteria and fungi. The researchers found that GO causes specific changes in the lipid composition of the cell membrane of

neutrophils leading to the release of NETs. They could also show that antioxidant treatment –such as with NAC and glutathione– reversed this process.’

That is why treatments with glutathione have worked, and that is why treatments with N-acetylcysteine, which is a precursor of glutathione. **Because they work providing the army with antioxidant reserves to deal with a toxic substance, a poisoning, that has been introduced into the body by different ways.**

‘In a companion study published in Nanoscale, it was shown that GO is degraded in NETs, much like bacteria and other pathogens.’

Taken together, these studies show that GO can be trapped and degraded in NETs just like pathogens. I want to tell you that we have published in our website at least 70 studies that reflect everything we are saying and manifesting here.

On the other hand, I have been asked about the efficacy of chlorine dioxide. That goes another way. What it does is to oxygenate the cell, it prepares it so that it is not easily destroyed by this toxicant. What glutathione would do is to provide the army with more numbers of soldiers in terms of glutathione to deal with toxins. **What we have found, as I say, is that most of the treatments that have been with N-acetylcysteine or glutathione and even with other antioxidants such as astaxanthin, which is a powerful antioxidant, have been very favorable treatments for the patients.**

And also, curiously and suspiciously, found that these health institutions are literally governed by evil; it is a psychopathy without previous history: we had never seen the history of such psychopathy.

By June 17 that the FDA tried to stop the marketing of N-

acetylcysteine after it had been used for 57 years as a normal and ordinary mucocolytic. It was a very suspicious thing to do, wasn't it? So this is basically my exposition. Any doubts that you may have about the studies that we have carried out at La Quinta Columna, well, there is simply something that is very conclusive, and that is the preliminary report of a renowned professor of a public university here in Spain. We are very close to providing complementary evidence to give more strength to this report in which we are already told that there is solid and proven evidence that there is graphene oxide in the sample that we sent.

Simply, for Colonel Tamayo and Judge Giorgianni: regardless of the fact that we obviously think that SARS-CoV-2 is precisely graphene oxide –and we can prove it– or at least it behaves exactly and exhaustively the same, **how is it possible that graphene oxide is injected through the vials? How is it possible if the masks were really withdrawn because they caused pulmonary affections due to toxicity?** What are we talking about, gentlemen?

Here I have tried to make the exposition as synthesized as possible so any doubt that may be generated by the manifestation that I have given here can be clarified throughout the time left we have.”

–Ricardo Delgado.

If you want to support La Quinta Columna, you can refer to their official website and follow them on their official channels on [Telegram](#), [Instagram](#), [Youtube](#) and [Twitch](#). If you want to contact directly, send them a message to: tutoronline@hotmail.es. Don't worry about the language barrier, they understand English and French.

Graphene in the Atmosphere: “Indeed, the Eugenicist Globalists Are Trying to Graphenize All the Peoples...”

Graphene in the Atmosphere

by [Dominique Guillet](#), [Xochipelli](#)

January 31, 2023

Summary

- [Ecce Homo sapiens X graphenicus](#)
- [Graphene, gravely, grafts its claw](#)
- [“Dark Winter”](#)
- [Necro-Omicron](#)
- [Graphene Oxide in Chemtrails in addition to strontium, barium, aluminum, titanium, cesium, arsenic, beryllium, chromium, cobalt...](#)

Ecce Homo sapiens X graphenicus

May I mention the publication of a book called “Global WARNING: Geoengineering Is Wrecking Our Planet and Humanity”.[\[873\]](#) It is a collective work, edited by Professor Michel Chossudovsky of the Global Research Center, in Canada, and written by a dozen authors on the subject of

geoengineering, chemtrails, atmospheric poisoning, HAARP plants, etc., all of which are absolutely depressing.

... all topics that are absolutely depressing to analyze... but, strictly speaking, fundamental for the survival of a part of the Anthropine species in the near future.

It seems to me, today, urgent to denounce the graphenization of the Atmosphere because this contamination is going to impact all the living beings of the Biosphere – including all the human beings who refuse to let themselves be injected with the poisons, called vaccines, of the Pharmacratic Mafia.

I wish to mention this collective work, of authentic researchers, especially since, recently, I was writing about enigmatic “black masses” that some people describe moving in the Atmosphere.

Indeed, the eugenicist Globalists are trying to graphenize all the Peoples... which will generate a form of terminal cross-breeding, insofar as the human biological hybridizes with the metallic nano-particulate – in this case with graphene in all its forms – in order to introduce, on the scene, the premises of the cyborgs... in the role of useful idiots devoted to play the acquiescent guinea pigs in a very large scale graphenizing vaccine experimentation.

Ecce Homo sapiens X graphenicus. Up to now, dementia was underlying... but, soon, it will be “pandemic”.

The Anthropos is in danger of biological eradication by the gang of Trans/humanoids under Klaus Schwab’s leadership... and other Banksters. With the vaccinal and universal graphenization, the Globalist psychopaths have launched a super Marrakech Pact, with a very spicy flavor of CoYid/19, in order to parasitize the human nervous and neuronal system – by mixing it, hybridizing it, merging it, and chimerizing it with metallic nano-particles... that is to say, particles of the order of the nano-meter, of the order of the millionth of

millimeter.

In order to graphenize, as quickly as possible, billions of human beings, the Globalists have not hesitated, for the last two years, to trample on all the (farcical) foundations of the Pasteurian vaccinal paradigm. One of the new clauses of their new paradigm called "neo-pasteurian" is the following:

The people who got immunized, thanks to the CoYid/19 vaccines, must immunize themselves against the non-immunized by forcing them to immunize themselves with the same immunization process... that failed to immunize them.

The term immunize can be interchanged with the term protect or vaccinate, etc. The conclusion is the same: Pasteurism and Pasteurian paradigm lie in the most total debacle... and it will never recover.

*Etymologically, "immunize" comes from "immunis" meaning "free of charge"... which comes from "munus" meaning "charge, function"... which comes from the Proto Indo European "*mei" meaning "to change, exchange".*

Graphene, gravely, grafts its claws

Today, therefore, it is essential that all those who refuse Quantum/19 graphenizing injections, or others, be aware of the ever-increasing graphenization of many sectors of daily life... in order to avoid being graphenized themselves. Indeed, graphene, in various forms, is present in many vaccines and medications, in PCR tests, in face masks, in physiological serums, in cosmetics, in food packaging, in clothing inks and in shoes (under the pretext of biosensors), in water purification, in synthetic agricultural fertilizers, in agricultural biocides, etc, etc, ad nauseam.

The graphene, gravely, grafts its claws in order to engulf itself, in order to engulf itself, in order to engorge oneself, in order to engrave itself in the fluidities of the

human animal. And that constitutes an enormous grievance. The graphene infiltrates his blood, his sap and his cerebral ocean. The metallic graphene merges with his organism, without his knowledge and consent: it captures him, it imprisons him, it zombifies him, it de/humanizes him, it archontizes him.

So where did graphene, this new nano-particular grapheme, emerge from to rewrite our DNA? From the abyss of non-existence of what cannot exist, naturally? Because it seems that the Mother did not emanate such a carbon nano-matter of one atom thickness – with an hexagonal shape.

It is also important to pay attention to aerial spraying – also called “chemtrails” – which has been the most efficient way, for decades, to disseminate various chemicals and biocides: over a peach crop, in Spain, to ward off hail; over a soya crop, in Argentina, to massacre the weeds; over a coca crop, in Peru, to destroy the plants and all their human environment; over a Vietnamese guerrilla war or, even, over an insurrection of the European urban populations.

The targets are different but the vectors are the same... and so is the outcome: cell modification, cell destruction, mutagenesis, death. The vectors are the same and their origin, if I may say so, goes back to Justus Liebig Möser through Fritz Haber... and the subsequent use of mustard gas during the First Great World Slaughter of 1914/1948, whose mission was to eliminate, in the Trenches, millions of French and German peasants who were no longer needed by the nascent agricultural/war industry.

A century later, the demented, eugenicist Globalists have launched a final offensive against the Peoples. It is, also, a war of the Trenches but, today, it is graphene, in all its forms, present in the CoYid injections of the Pharmacratic Mafia – and many other so-called vaccines” injections – that is the vector of the Trenches. Indeed, Graphene slices through the cell walls of red blood cells and other cells; Graphene

slices through brain neurons; Graphene slices through human DNA.

Graphene is the new, silent vector of Cellular Trench Warfare! It can be a time bomb or an immediate bomb: some of those injected die within hours... and sometimes within minutes. 80% of deaths induced by graphene vaccines occur in the first two weeks after the toxic injection.

Because of these aerial spraying technologies, we are also confronted with the potential presence of graphene oxide in rainwater – as it has already been proven by investigators and microscopic analyses.

For the record, the first patent on “geo-engineering” – i.e. atmospheric modification – dates from 1966 in the USA. [\[891\]](#)

I have mentioned, several times, that we have been twice, in the last few years, within a few kilometers of evacuation zones of giant fires – in Oregon. I have, also, mentioned that some of these giant fires are artificially set, either manually or by electromagnetic energy – the so-called DEW, Directed Energy Weapons, Nikola Tesla’s energy. On October 23, 2019, there was a gigantic explosion of energy, covering 50 km, which initiated a gigantic fire called the Kincade Fire and burned 30,000 hectares. Cui bono?

I discussed this issue with a colleague who lost his ranch in the 2018 Paradise Fire in California – which consumed 62,000 acres. He filmed his escape from the inferno of flames – while the car following him exploded. He’s a specialist in 5G, and similar energies, and he told me that some of the huge fires are caused and fanned by 5G – which explains the lightning speed with which they travel.

Moreover. It doesn’t take an overdose of imagination to conceive that an atmosphere saturated with certain chemicals – released by chemtrails spread by military aircraft – will ignite much more easily than an atmosphere bathed in the

essential oils of the California pine forests.

I invite anyone who considers these facts as science fiction to stimulate their neuronal synapses with brain tonics, preferably vegetal or organic, because these facts are still very far from what they could conceive. The first essential point not to be hidden, in any investigation worthy of the name, is that the Globalists, and other psychopaths, are absolutely demented and that they have decided to destroy everything.

Today, is graphene oxide intentionally spread in the atmosphere – by means of specialized aircrafts – with a totally harmful and genocidal purpose? Or is it already an environmental contamination due to the presence of graphene oxide in the fuel of airplanes – in order to improve their combustion? [\[924\]](#) [\[925\]](#) [\[954\]](#) Or is it a question of aerial spraying of graphene oxide in order to fight, allegedly, against “climate change”? [\[955\]](#)

“Dark Winter”

I will, furthermore, expose the results of my researches in order to answer these various interrogations. But, before doing so, I wish to expose some of my states intuitions and inspirations, with regard to the graphenization of the living Atmosphere of our Mother Earth – and, in particular, in order to ricochet on the phenomenon of “amorphous black masses” moving there... according to recent testimonies.

It turns out that graphene, from the point of view of human health, is a real nano-metallic abomination – at least, as far as its so-called “bio-medical applications” are concerned. It is a toxic bomb of mutagenic and genocidal irradiation. It is Hiroshima, Nagasaki, Mururoa, etc., within reach of every neuron and knocking at the door of every nose, mouth, vulva, skin pores... And this is without evoking the radioactive impact site of a syringe needle programed, by the Globalists, to inject the graphene, more rapidly, into all the human fluids...

with a QR code as a key – to open, legally, the doors of a lock-downed life. In truth, to give to the Eugenists the key, in all morbid acquiescence, of the human DNA.

As for its industrial applications, in particular, in computer nano-technologies, if it is to replace silicon, by a hundredfold velocity, in the robotic computers of Virtuality... better that graphene goes back to the abyss of nothingness from which it should never have escaped – because the Archontization of a part of Humanity is, already, irremediably well advanced. What will happen to it?

It will be necessary, soon, if not immediately, that the People wake up to the inescapable fact that graphene oxide, reduced graphene oxide, graphene hydrogels, carbon nano-tubes, graphene quantum dots (which cross the blood-brain barrier), graphene nano-spheres, plasmonic nano-antennas, etc., etc., constitute an artificial neural network that will supplant the organic and natural neural network in the human body.

This is a form of parasitism, to say the least, but of a completely different nature. I invite interested readers to consult the numerous essays about Archontization and the Archontic Virus on Nemeta. [\[162\]](#) Indeed, it was John Lamb Lash who introduced the concept of Archons to the Web. The Archons were, extensively, referenced in the 4th century Nag Hammadi writings found, in Egypt, in December 1945.

May I direct, even, the eldest readers to the theme of the “Heavy Black Shadows”. This phenomenon was evoked by the Yaqui shaman, Don Juan, in the brilliant work of the late Carlos Castañeda – not unlike the recently described phenomenon of “amorphous black masses” moving across the sky. Could they be nanoparticle formations of graphene oxide – projected into the Atmosphere by chemtrails – magnetically self-assembling ... like thousands of starlings circling, together, as a single bird, in the sky?

Today, the shamanic literary work of Carlos Castañeda (1925-1998) has lost none of its flavor... for it is the exploration of the Nagual. This work was completed, in the non-literary Planetary Tantra – in its foundations, processes and objectives – by John Lamb Lash. [121]

*«The sorcerers of ancient Mexico saw the predator. They called it the flyer because it leaps through the air. It is not a pretty sight. It is a big shadow, impenetrably dark, a black shadow that jumps through the air. Then, it lands flat on the ground. The sorcerers of ancient Mexico were quite ill at ease with the idea of when it made its appearance on Earth. They reasoned that man must have been a complete being at one point, with stupendous insights and feats of awareness that are mythological legends nowadays. And then everything seems to disappear, and we have now a sedated man». Carlos Castañeda in *The Active Side of Infinity*.*

Today, the Graphene – an Archontic fake carbone – is not the Predator but, only, the vector of the Predators – i.e., the intra-species predators. And who are they? WHO?

The “Dark Winter”, which the demented eugenicists have been proclaiming and announcing, for a plethora of years, is not, only, the loss of energy, and heating capacity, during the winter months of all these present and future years – as we are entering a new Great Solar Minimum; it is not, only, the lack of food generated by the destruction of agriculture programmed by the Globalists – and their self-proclaimed Greens; it is not, only, the lack of food generated by Atmospheric hazards destroying agricultural crops – on lands, and with seeds, all the more weakened by chemical agriculture since 1842; it is not, only, the lack of tenderness, of love, and of mutualism, generated by the dictatorial measures of the Globalists aiming at raping the adults, and especially at raping the children, by jabbing them, by masking them, by distancing them, by preventing them from touching and kissing each other...

The “Dark Winter” could also be a darkening of the Atmosphere by volcanization, because, at present, we are in the middle of an ever-increasing volcanic activity – which, of course, is explained by the emergence of the Great Solar Minimum, which is announced until 2055, with its cohort of temperature and rainfall extremes, its violent winds, its pronounced volcanic activity, its periods of droughts and floods, its very long periods of very great cold...

The “Dark Winter” could also be a darkening of the Atmosphere by graphenization, by means of conventional chemtrails, in order to stimulate the graphenizing “vaccine” poison that has been deposited in the body of the injected human, like the sacramental host of the new Covidian religion. A sacrificial host...: the injected people are sacrificed on the altar of cyborgism... while the non-injected people are pointed at like scapegoats.

Necro-Omicron!

Do not wait, therefore, for the Graphene Oxide to rain on your head! Heal in yourself, daily, the Nature that the Culture of the genocidal and graphenizing technocracy seeks, inexorably, to destroy. The graphenization generates a spectrum of diverse radiation pathologies. Therefore, take daily medicinal plants, vegetables, fruits, natural substances, mushrooms with extremely anti-oxidant qualities.

Every day, also, think about your children, or your grandchildren, in order to convince yourself that indeed, it is Open Season on Predators... and, especially, today, Open Season on Vaccinalist Predators and child-rapists.

By the way, isn't it strange, symbolically speaking, that a new variant, smacking strongly of a gigantic rotten scam, is called “Omicron”, and that it is propelled, in the space of 48 hours, in January 2022, like a Warp Speed Terrorism frightening the populations condemned to a fatal death? Like a Necro-Omicron.

Why? Because it's been exactly a century since the concept, or meme, of the Necromicron was first introduced in one of the works of the famous writer Lovecraft. And it's been exactly a century since the Globalists launched their first great vaccinal purge, which was called the "Spanish Flu" – in 1918/1920 to complete the function of the First Great Franco-German Slaughter.

Graphene Oxide in Chemtrails in addition to strontium, barium, aluminum, titanium, cesium, arsenic, beryllium, chromium, cobalt...

In January 2021, during the 5th International Rain Enhancement Forum (IREF) symposium [\[233\]](#), three researchers from Khalifa University, Dubai, presented their research on artificially modifying the atmosphere to induce rainfall. Topics included the application of nanotechnology processes to develop new materials for cloud seeding, the study of the effects of electrical charges on rain droplet formation, algorithms for determining ideal cloud seeding conditions, and the integration of multiple simulation dynamics and new data to create a unified weather forecasting model.

Cloud seeding is a process by which substances are introduced into the heart of clouds to stimulate the formation of rain droplets. This technique has been used in agriculture for over 70 years. The first patent for artificial climate modification dates from 1966: the Knollenberg patent. [\[247\]](#)

At the forum, Dr. Linda Zou presented her research on porous nanoparticles and their potential to seed cold clouds – as nucleation seeds – to artificially induce rain. Dr. Linda Zou is using nanotechnology to create ice nucleating particles that act in the same modes as natural ice crystals by forming super-cold water droplets at temperatures below -38°C.

To this end, Linda Zou has created a composite of reduced graphene oxide nanoparticles and silicon oxide nanoparticles. The reduced graphene oxide serves as a matrix,

or template, for ice crystal growth – due to its similar hexagonal lattice structure. The silicon oxide increases the overall water molecule adsorption capacity of this nanoparticle compound. [\[243\]](#) Linda Zou has filed a patent application, in 2019, entitled “3d reduced graphene oxide/sio 2 composite for ice nucleation” – n° W02020148644A1. [\[246\]](#) Her 2019 study is titled “Enhanced Ice Nucleation and Growth by Porous Composite of RGO and Hydrophilic Silica Nanoparticles”. [\[886\]](#)

The silicon oxide nanoparticles generate pores in the final product and play an essential role in the nucleation of ice because liquid water accumulates there. Linda Zou’s research shows that this nanoparticle compound induces ice nucleation at temperatures of about -8°C.

Linda Zou is not the only one working in this area. In 2018, a team of researchers, from Austria and Italy, published their findings on the use of graphene and graphene oxide in ice crystal nucleation processes: “Ice Nucleation Activity of Graphene and Graphene Oxide”. [\[245\]](#)

There is also a study, from 2020, entitled “Heterogeneous Ice Nucleation by Graphene Nanoparticles”. [\[887\]](#) It deals with the integration of graphene oxide nanoparticles – of 120/150 nm – in order to promote the nucleation of ice crystals.

There is also another study, published in April 2021, which is entitled “Investigations of structural and dynamical mechanisms of ice formation regulated by graphene oxide nanosheets” [\[889\]](#) as well as a 2019 study titled “Probing the critical nucleus size for ice formation with graphene oxide nanosheets”. [\[890\]](#) All these studies focus on the formation of ice crystals with graphene oxide.

See also the May 2021 study entitled “Motion of water monomers reveals a kinetic barrier to ice nucleation on graphene”. [\[888\]](#)

Let's remember, also, that there are researches, since many years, whose objective is to inject nanoparticles of graphene oxide, in the Atmosphere, in order to eliminate from it what the Globalist and Trans/humanoid demented eugenists, consider as a contaminant: the carbon dioxide. For example: "Carbon Dioxide Capture by Functionalized Graphene Oxide Adsorbent" [\[235\]](#). "Carbon Dioxide Capture with Graphene Systems: Computational Studies" [\[238\]](#). "Reduced graphene oxide-TiO₂ nanocomposite as a promising visible-light-active photocatalyst for the conversion of carbon dioxide" [\[239\]](#). "Vitamin B12-Immobilized Graphene Oxide for Efficient Electrocatalytic Carbon Dioxide Reduction Reaction". [\[241\]](#)

In February 2021, researchers presented the world's thinnest filter made from graphene membranes. This filter is not only capable of filtering carbon dioxide but is able to separate it from other gases induced by industrial emissions. [\[236\]](#)

Also in February 2021, researchers presented their research into catalysts based on various forms of graphene that can reduce carbon dioxide. [\[237\]](#)

In 2019, researchers at the Karlsruhe Institute of Technology presented their method for developing graphene from atmospheric carbon dioxide. [\[240\]](#)

Today, is graphene oxide injected into the atmosphere? It is clear that this is indeed the case, because I have mentioned, for the past 12 years, on several occasions the phenomenon of rainwater contaminated with graphene.

For example, a doctor from the Canary Islands, working with the Quinta Columna, recently discovered graphene oxide in rainwater and proved it by means of analyses. [\[242\]](#) He also analyzed, microscopically, the presence of it in his bronchial mucus.

For example, the Quinta Columna, via Orwell City, presented a short video incorporating a sequence, filmed in the French-

speaking region, presenting, obviously, magnetic particles of graphene, self-assembling, fallen with the rains of a big storm. [\[234\]](#)

For example, a video highlights that the collected particles of a car windshield, after a rain, are magnetic. [\[244\]](#)

Why is graphene oxide injected into the atmosphere? To eliminate carbon dioxide or to contribute to the universal graphenization of the Peoples?

There is a manual dating from 1999 for the use of USAF airmen in the USA [\[249\]](#). It is called "Chemtrails" and it describes the numerous metallic substances that can be incorporated into these aerial sprays: iron, copper, silver, mercury, aluminum, lithium, beryllium, barium, strontium, cesium, tin, etc.

What is the real objective of the spreading of metallic substances called "Chemtrails"? Let us recall that these substances are mainly aluminum, strontium, barium, manganese, titanium dioxide, silver iodide...

In France, the Acseipica Association carries out numerous analyses of blood and atmospheric samples in order to monitor the evolution of metallic aerial spraying. [\[248\]](#)

See the testimony of a German aeronautical engineer who was dismissed after having launched the alert on aerial spraying of barium, aluminium, etc. [\[302\]](#)

See also this short video sequence inside a Boeing 707 [\[569\]](#) which is in the process of releasing substances into the atmosphere.

There is a study, from 2015, entitled "Evidence of Coal-Fly-Ash Toxic Chemical Geoengineering in the Troposphere: Consequences for Public Health". [\[879\]](#) Since then, it has been retracted, by the "scientific" Authorities because, as the GAFAM psychopaths would say, it did not correspond to their

“values”.

All the more so since, in their introduction, the authors evoke the taboo work of Rachel Carson, the Silent Spring.

And it's no wonder, because its conclusions are unambiguous: the authors analyzed the rainfall over San Diego, California, following aerial spraying and declined the content of these chemtrails. They claim that, what is called “Coal-Fly-Ash”, was the basis of what was sprayed in California in 2014.

The elements that they discovered, in their analysis, are: aluminum, antimony, arsenic, barium, beryllium, boron, cadmium, calcium, cesium, chromium, cobalt, copper, gallium, germanium, hafnium, iron, lead, lithium, magnesium and manganese.

Two studies, from 2019, entitled “Enhanced ice nucleation activity of coal fly ash aerosol particles initiated by ice-filled pores”, and “The Role of Cloud Processing for the Ice Nucleating Ability of Organic Aerosol and Coal Fly Ash Particles”, focus on cloud ice formation in relation to coal fly ash. [\[884\]](#) [\[885\]](#)

The discovery of this retracted 2015 study highlighting the composition of “Coal-Fly-Ash” further drew my attention to the fact that “Coal-Fly-Ash” has recently been the subject of research into the manufacture of composites involving “Coal-Fly-Ash” and graphene oxide.

Thus, in June 2018, a report, from the University of Washington, was published on the making of concrete incorporating graphene oxide. [\[881\]](#) [\[882\]](#) The director of the Talga company in Australia, which is working with these new technologies, states that: «The results of preliminary tests show that graphene-enhanced concrete is characterized by such a high level of electrical conductivity that it can act as an electrical heating element.» Today, there are a number of research and development initiatives to produce new

concrete incorporating graphene oxide.

There is a study, from 2021, which is entitled “Coal Fly Ash Decorated with Graphene Oxide–Tungsten Oxide Nanocomposite for Rapid Removal of Pb²⁺ Ions and Reuse of Spent Adsorbent for Photocatalytic Degradation of Acetaminophen”. [883] This involves the manufacture of a new polymer composed of “Coal-Fly-Ash” and nanoparticles of graphene oxide and tungsten oxide.

It seems essential to emphasize that, generally, the metallic nanoparticles included in these chemtrails are, also, the subject of extensive research in the processes of functionalization of graphene or the elaboration of graphene-based nano-compounds – more particularly in the field of bio-medical applications.

Silver iodide. “Silver Iodide Nanospheres Wrapped in Reduced Graphene Oxide for Enhanced Photocatalysis”. [250] “Graphene Fiber and its Silver Functionalization for Radioactive Iodine Adsorption”. [251] “Graphene Oxide–Silver Nanoparticle Nanocomposites Induce Oxidative Stress and Aberrant Methylation in Caprine Fetal Fibroblast Cells”. [252] “Silver and copper oxide nanoparticles-decorated graphene oxide via pulsed laser ablation technique: Preparation, characterization, and photoactivated antibacterial activity”. [253]

*There is, in fact, a plethora of studies on hybrid compounds made from graphene and silver nanoparticles for their ability to detect glyphosate, insulin, streptomycin, oxytetracycline, imidacloprid, for their ability to vectorize anti-cancer medicinal substances... Moreover, numerous researches have highlighted their antibacterial capacities – against *Pseudomonas aeruginosa*, *Escherichia coli*, *Staphylococcus aureus*, etc.*

Strontium. There are processes using graphene to remove

strontium, but there are mainly processes for making nano-compounds based on graphene and strontium... for bone regeneration. “Strontium-substituted hydroxyapatite grown on graphene oxide nanosheet-reinforced chitosan scaffold to promote bone regeneration”. [\[163\]](#) “Developing a Strontium-Releasing Graphene Oxide-/Collagen-Based Organic-Inorganic Nanobiocomposite for Large Bone Defect Regeneration via MAPK Signaling Pathway”. [\[161\]](#) “Oxygen Plasma Technology-Assisted Preparation of Three-Dimensional Reduced Graphene Oxide/Polypyrrole/Strontium Composite Scaffold for Repair of Bone Defects Caused by Osteoporosis”. [\[164\]](#)

Titanium dioxide. There are nano-compounds of graphene and titanium dioxide for water decontamination, for batteries, for solar panels but also for their anti-bacterial activity as presented in various studies: “The role of nanoparticles (titanium dioxide, graphene oxide) on the inactivation of co-existing bacteria in the presence and absence of quartz sand” [\[254\]](#); “Synergistic antibacterial effect of graphene-coated titanium loaded with levofloxacin” [\[255\]](#); “Graphene-Reinforced Titanium Enhances Soft Tissue Seal” [\[256\]](#); “Toxicity assessment of reduced graphene oxide and titanium dioxide nanomaterials on gram-positive and gram-negative bacteria under normal laboratory lighting condition” [\[257\]](#).

There are even several studies on the manufacture of fabrics such as cotton – based on graphene and titanium – with self-cleaning properties and anti-bacterial capabilities: “Functional finishing of cotton fabrics using graphene oxide nanosheets decorated with titanium dioxide nanoparticles” [\[258\]](#); “Graphene oxide-silver/cotton fiber fabric with anti-bacterial and anti-UV properties for wearable gas sensors” [\[262\]](#); “Graphene Oxide-Based Antibacterial Cotton Fabrics” [\[263\]](#); “Fabricating electroconductive cotton textiles using graphene”. [\[264\]](#) Etc. Il existe, même, des techniques permettant de fabriquer du jute avec du graphène. [\[260\]](#)

Moreover, a team from the University of Manchester has

developed an ink based on graphene and silver nanoparticles. [261] The aim is to develop wearable electronics, based on graphene, which will constitute an interface with the physical body and which will make it possible to collect data emanating from various physiological parameters (temperature, heart rate, etc.) in order, eventually, to modulate them.

From all these data, it appears that a great deal of research is being done on the development of graphene-based hybrid nano-compounds for their anti-bacterial capabilities.

There is even a nano-complex composed of graphene oxide, titanium dioxide and silver iodide for a supposed anti-bacterial action. [259]

Today, in addition to the extremely toxic effects induced by the presence of graphene, or other metallic nano-particles, in CoYid/19 injections and others, it seems important to ask the question of the impact of all the nano-particles present in chemtrails, and incorporated by the human organism, on the intestinal flora – without mentioning their direct impact on the lungs.

Indeed, if graphene, titanium dioxide, silver iodide, etc., have such anti-bacterial capacities... they certainly do not have the ability to distinguish between beneficial and pathogenic bacteria. And this, all the more so, since the so-called pathogenic bacteria are, very often, commensal bacteria in a healthy organism.

Covid Vaccines: A Curious Discovery on the Graphene Oxide Question

[Covid Vaccines: A Curious Discovery on the Graphene Oxide Question](#)

by [Dr. Mark Bailey](#)

September 2, 2022

The damaging effects of the COVID-19 injections are postulated to occur through several mechanisms. It is not my intention in the present commentary to provide an exhaustive list of the potential mechanisms but they can generally be split into three major themes. The first is that the expression of the mRNA-encoded spike protein causes a subsequent [inflammatory response](#), including vasculitis and clotting. The second is that the lipid-nanoparticles (LNPs), used as the mRNA delivery vehicle, are themselves toxic and may coalesce into much larger particles inside the body. (The synthetic mRNA that resists degradation may itself also be pro inflammatory.) The third is that there are undeclared toxic constituents within the injections, with the prime suspect being [graphene oxide](#) (GO).

Pfizer Comirnaty under dark field microscopy – Source: lifeoftheblood.com

Pfizer Comirnaty under the light microscope – Source: Dr. Robin Wakeling

In early 2022, Dr Robin Wakeling [demonstrated](#) the behaviour of Pfizer Comirnaty LNPs coalescing under the light microscope. With regard to GO in the vaccines, he has kept an open mind and has pointed out the factor of batch variability. Many of the highly-complex patterns seen forming under microscopic

examination of the vaccines have suggested the presence of this compound. However, Wakeling's latest research has revealed that such two-dimensional (2D) complexes can also be formed under the right conditions with plain isotonic (0.9%) salt water. He has presented the findings in his paper, "COVID Vaccines: a Curious Discovery on the Graphene Oxide Question," published today.

Wakeling stated that he has been unable to find images of these 2D saline-derived structures in the scientific literature, although there exist elaborate descriptions of how water molecules may behave under "nano-scale confinement." As he reported, "it is curious that something as common as isotonic table salt/saline, something that a plethora of observers would presumably have examined microscopically for over a century has not given rise to published 2D images of the type that are now straightforward to produce."

(A) & (B) 2D structures produced from isotonic (0.9%) salt solution.

Wakeling reported that the one proposed mechanism is that alterations in the ratio of sodium (Na) to chlorine (Cl), outside of the typical 1:1 NaCl arrangement may be associated with the observed 2D structures. Whatever the mechanism, the findings under the coverslip may provide some insights into how water behaves within our own cells and various interfaces in our bodies. Are we being given another window into how water is 'structured' in life processes? In this regard,

Wakeling also mentioned the work of Dr Rupert Shelldrake, Dr Robert Lanza, and Veda Austin and the remarkable observations of water being able to store “information” and synchronise with various environmental influences.

These latest findings do not rule out the presence of G0 in the injections and it does not negate the findings of other citizen scientists who have [demonstrated](#) mass spectrometry results consistent with the presence of the compound. As Wakeling stated, “the presence of 2D crystalline structures *per se* are probably not signatures of graphene oxide but are signatures of something else, something more profound perhaps.”

While there often seems to be a lack of positive news during the [COVID-19 fraud](#), for many of us it has been a source of inspiration to keep exploring beyond institutionalised science. Wakeling’s investigations of the COVID-19 injections were motivated by the harm he was witnessing in his community. Unexpectedly, he has made new observations and found a new way of thinking about the nature of water and its interactions with salt. Please read this unique paper by Dr Wakeling for his latest insights into this fascinating topic...

Some Facts About Graphene Oxide

[Some Facts About Graphene Oxide](#)

by James Herer, Weblyf

October 21, 2021

Known as the thinnest and the strongest material found on earth, graphene oxide (GO) has now become more popular not because of its benefits but because of its dangers to the human body. graphene oxide is a nanoparticle discovered by Andrew Geim and Konstantin Novoselov in 2004. As written in www.graphene.manchester.ac.uk:

“Fascination with this material stems from its remarkable physical properties and the potential applications these properties offer for the future. Although scientists knew one atom thick, two-dimensional crystal graphene existed, no-one had worked out how to extract it from graphite. That was until it was isolated in 2004 by two researchers at The University of Manchester, Professor Andre Geim and Professor Kostya Novoselov.

One Friday, the two scientists removed some flakes from a lump of bulk graphite with sticky tape. They noticed some flakes were thinner than others. By separating the graphite fragments repeatedly, they managed to create flakes that were just one atom thick. Their experiment had led to graphene being isolated for the very first time.”

Another interesting characteristic of graphene oxide is that it could change shape and also interact with light, magnetism, and electrons. It's also a semiconductor and like metals, it can transmit electricity. It's like a transparent material but

way stronger than steel that's why it is being used in car coating products and as explained in <https://radiopatriot.net>:

"Graphene oxide is also extremely lightweight and conductive, with its temperature thresholds ranging anywhere from 2200-3300°F, which hypothetically speaking, means that it outperforms all other known materials. As an electrical conductor, graphene performs as well as copper, and despite being almost completely transparent, remains so dense that not even helium, the smallest gas atom, can pass through it."

In late June, the founder and director of Quinta Columna, Ricardo Delgado Martin, published a study conducted by the Spanish research team at the University of Almeria claiming that Pfizer's COVID vaccines contain graphene oxide. Martin is "specialized in biostatistics, clinical microbiology, clinical genetics, and immunology". Using electron microscopy and spectroscopy, he and his team have confirmed that graphene oxide is present in Pfizer's COVID vaccines and that it's likely that it has something to do with the reported adverse effects and deaths.

Meanwhile, another expert named Dr. Robert Young, a biochemist, microbiologist, and clinical nutritionist, along with his team, also conducted research to classify the specific ingredients in vaccines created by Moderna, J&J, AstraZeneca, and Pfizer and they've discovered that high levels of graphene oxide are present in all of these four vaccines. Their findings were published on the 20th of August, showing that "toxic nanometallic content which are magneticotoxic, cytotoxic and genotoxic to plants, insects, birds, animals and humans" are present on these jabs. One of these injections even contained life-threatening parasites called *Trypanosoma cruzi*.

Graphene oxide can impact the immune system and when accumulated in the lungs, it can be very deadly. It is "a

toxin which triggers thrombi and blood coagulation". It has never been used on humans before but "it's been extensively researched for intended use on humans". According to Dr. Ariyana Love, ND:

"There are over 2000 studies on Graphene Oxide Toxicity and 500 of them were published in 2017."

Registered as big pharma's intellectual property, graphene oxide was secretly approved therefore it was never disclosed as an ingredient for COVID vaccines. As acknowledged by national health authorities, graphene oxide is also contained in the face mask. Meanwhile, Dr. Ariyana Love also reported:

"Moderna, Pfizer/BioNTech, etc, were in a race to research and development Graphene Oxide Nanoparticles as a cancer cure. So, Graphene oxide was injected into animals and used as the vector to deliver a novel mRNA drug technology directly into cells. At first, the animals seemed fine and the cancer cells were successfully destroyed. But two months after inoculation all the animals got sick and DIED from Antibody-Dependent Enhancement (ADE)! Healthy cells were destroyed by the Graphene Oxide Nanoparticles.

Safety and toxicity were the pharma cartel's main challenges in using this novel technology for biomedical applications such as gene therapy. After two animal trials that resulted in the death of all the animals, graphene oxide could not be approved for use in humans due to its toxicity to healthy cells and due to ADE, which is where the immune system destroys itself. Front line doctors are already seeing ADE in these unapproved Covid-19 human trials. Experts such as Europe's leading virologist Professor Dolores Cahill, world-renown scientist Mike Adams of Natural News, world's leading virologist Geert Vanden Bossche and Pfizer whistleblower, Dr. Michael Yeadon warned us that ADE would come!"

The Graphene Oxide Prison

[The Graphene Oxide Prison](#)

by [Matt](#), [What About the Roads?](#)

sourced from [Activist Post](#)

August 6, 2021

When it comes to the safety and efficacy of the so-called COVID-19 vaccinations the public has been thoroughly divided and conquered. On one side of the carefully crafted argument, governments can't get enough shots in enough arms to ward off a "[pandemic](#)" of unvaccinated people. The other side has as many excuses for avoiding these injections as it has members. So when a controversial study comes along showing that these injections may contain a toxic substance called [graphene oxide](#) the allowed spectrum of debate is quickly alight and the bigger picture is missed by all but a few.

The story of vaccines containing graphene oxide broke in late June when Ricardo Delgado Martin, Founder and Director of [Quinta Columna](#), which calls itself a "free thinking movement," published the the results of an analysis conducted by a Spanish research team at the University of Almeria. The analysis claims to have discovered graphene oxide in a vial of

a Pfizer vaccine via electron microscopy and spectroscopy. The analysis can be read in English [here](#).

It took a few weeks for this story to find it's way into the English speaking world it would seem. Once it did, the mainstream media's fact checkers were all over this story. [Reuters](#), [Full Fact](#), and [Forbes](#) among other establishment outlets have tried to debunk the study by assuring their readers that only an anti-vax QAnon conspiracy theorist would believe such nonsense. On the other side of the aisle, the analysis has been uncritically circulated which only adds to the problem.

As usual, the truth lies somewhere in the middle. The analysis conducted by the team at the University of Almeria has it's flaws but concerns over the presence of graphene oxide in the Pfizer vaccines, and elsewhere in our environment, should be given serious consideration.

But first, let's address some of the issues with the analysis:

- The analysis is an interim report needing further study.
- The analysis was commissioned.
- The origin of Pfizer vial used in this analysis is unknown.
- Graphene oxide and reduced graphene oxide are, at times, used interchangeably.
- Comparative images of graphene oxide are of different magnification levels.

For an in-depth look at these concerns and others that arise from this analysis we recommend watching world class researcher, Whitney Webb's recent appearance over at [The Last American Vagabond](#) where they dive into this analysis.

Just because this study currently stands on scientifically shaky grounds does not mean that the theory that graphene oxide is in fact in these injections should be dismissed. The substance has also already been discovered in face masks

in [Canada](#) and [Spain](#) while patents in China ([1](#), [2](#)) that explore the possibility of using graphene oxide in COVID19 vaccines are pending.

It is also curious graphene oxide can be made to have [magnetic properties](#) which would explain the countless videos circulating online of magnets sticking to those who've been injected with these so-called vaccines. More research on this phenomenon is certainly needed but a recent "statistical and sociological" survey conducted by the European Forum for Vaccine Vigilance in Luxemburg found that 29 of the 30 "vaccinated" individuals interviewed showed attraction to the magnet at the site of injection.

Additionally, it has been shown that graphene oxide can [cause blood clots](#) and [damage lungs](#). Does this explain why blood clots are such an often reported adverse effect from these shots? Is there a connection to this lung damage and surge in supposed surge in COVID-19 cases in areas of high injection rates?

These questions and many others surrounding graphene oxide, injections, masks, and the so-called pandemic need answering but if we just focus on these elements of the conversation we risk missing the bigger picture. Graphene oxide, its applications, and its impact on humanity are not limited to the [so-called pandemic](#). The applications of graphene and it's related materials are almost limitless and as they are introduced into the ecosystem, inside and out of the human body, they have the potential to reshape our relationship with the natural world by making it impossible to escape the digital realm.

On the future applications of graphene, Alan S. Brown [writes](#):

Silicon electronics dominate the world, but engineers frequently turn to other types of semiconductors to do things that silicon cannot. These materials—ranging from silicon

carbide to indium gallium arsenide—emit and interact with light, enable high-frequency microwave communications in smartphones, run at higher speeds, and handle massive amounts of power.

Yet, what if a single material could do all that—if it could interact with electrons, light, and even magnetism. What if it could transmit electricity like a metal and also behave as a semiconductor. Just for good measure, suppose it might make a good building block for quantum computers? And—most impressively—what if it could do all these things just by changing its shape?

That material is graphene.

By introducing graphene and other related nanoparticles into the human system, our bodies become cybernetic systems where light, microwaves and other frequencies, or magnets could be used to control bodily and neurological functions. If some [predictions](#) are correct then graphene oxide will one day be as prevalent in our world as plastic is now. It is already [raining down](#) on us from above, polluting our [soil](#), being [laser printed](#) onto food, and, in turn, is likely already in all of us. If so, it seems reasonable to conclude that, based on all that we know about previous [medical experimentation](#) carried out on humans, something similar is happening today.

But why introduce a material like this into the human body? Catherine Austin Fitts [ventures a guess](#):

So let me go through where I think he's going. I think where they're going—and they're they're prototyping tons of technology, so I don't think they have it yet—but where they want to go is they want to download a Microsoft Office system into your body, into your brain, and hook it up to the Jedi cloud contract and the Amazon Cloud contract at the CIA. And if they can get seven people seven billion people hooked up

directly to their cloud contracts and use viruses—I mean, it's very clever—use viruses to keep those updates coming. You know, just keep those updates coming.

So you saw my most recent article, [“The Injection Fraud.”](#) I think it's a fraud to call these vaccines they're not vaccines, they're not medicine. But I think it's the exact same model you used in the computers and the ideas. Just like Bill Gates made it possible for the intelligence agencies to get a backdoor into our—you know, our data—and our computers. They want a backdoor into our mind and it's very hard if you haven't if you haven't looked into the creepy technology, the Charles Lieber kind of technology, it's hard to fathom but we're beginning to fathom it.

Experimental injections. Magnetic nanoparticles. A human operating system. Sadly, these are not the fever dreams of a lone, crazed scientist but technologies which have already arrived. The COVID-19 panic has accelerated the introduction of these and many more frightening technologies into the public sphere as trojan horses for even more terrifying technologies yet to be revealed. The work from researchers like Whitney Webb, Alison McDowell, Catherine Austin Fitts, Rosa Koire, James Corbett, Patrick Wood, and everyone else which shines light on the this transhumanist agenda is becoming more important than ever.

For too long we've narrowed in on all things COVID-19 just like the powers-that-shouldn't-be hope for. There is no pandemic, only a psychological operation afoot. That operation needs as much resistance as possible but if we fail to see beyond this then their dream of can be reached without a fight. Beyond saying no to experimental injections and nanoparticle-laden masks we must starting saying no to everything that is being used to create the graphene oxide prison being built around us.

An Interview w/ Richard Delgado: Impacts of Graphene Oxide Nano-Particles Contained in the Vial of the mRNA Vaccine

[Graphene Oxide: A Toxic Substance in the Vial of the COVID-19 mRNA Vaccine](#)

image sourced from globalresearch.ca

[Video: Graphene Oxide: A Toxic Substance in the Vial of the COVID-19 mRNA Vaccine](#)

by [Ricardo Delgado](#) and [Prof Michel Chossudovsky](#)

July 17, 2021

*We bring to the attention of Global Research readers this important interview with **Ricardo Delgado Martin**, Founder and Director of **Quinta Columna**. Ricardo is responsible for coordinating the Spanish research team's analysis of the impacts of graphene oxide nano-particles contained in the vial of the mRNA vaccine.*

The results of their analysis by electron microscopy and

spectroscopy are far-reaching. Graphene oxide is a toxin which triggers thrombi and blood coagulation. It also has an impact on the immune system. Graphene oxide accumulated in the lungs can have devastating impacts.

The results of the Spanish study suggest, yet to be fully confirmed, that the recorded vaccine related deaths and “adverse events” (e.g. published in the US by the CDC and in the EU) are attributable to the presence of graphene oxide nano-particles contained in the Covid vaccine vial.

Of significance, (acknowledged by national health authorities) graphene oxide is also contained in [the face mask](#).

Graphene has electromagnetic properties which have been detected in people who have been vaccinated. These effects have been amply documented and confirmed. See the study conducted by the [European Forum for Vaccine Vigilance](#)

Ricardo Delgado Martin is specialized in biostatistics, clinical microbiology, clinical genetics and immunology.

For further details on this project see the report by **Prof. Dr. Pablo Campra Madrid**, specialized in Chemistry and Biology, Escuela Superior de Ingeniería, University of Almería.

[See summary of their report](#) entitled **Graphene Oxide Detection in Aqueous Suspension, Observational study in Optical and Electron Microscopy**.

[Full Study \(English\)](#)

There is evidence that the Covid-19 “vaccine” which contains graphene oxide has resulted in a pattern of deaths and injuries Worldwide.

Speaking on behalf of the Spanish research team, Ricardo Delgado Martin recommends that the covid-19 experimental mRNA vaccine should be cancelled and discontinued immediately.

[\[Link to watch video without English voiceovers.\]](#)

Confirmed by Health Canada, **Graphene-Oxide particles are also contained in the Face Mask** which is intended to protect you.

[Face Masks Contain Graphene, A Poisonous Substance](#) by [Prof Michel Chossudovsky](#), July 14, 2021

“The wearing of the face mask started in the immediate wake of the covid-19 lockdown on March 11, 2020. Worldwide, people have been instructed to wear the mask for more than a year.

And then one year later, we are told that in some cases it may contain a poisonous substance.

According to Health Canada: “There is a potential that wearers could inhale graphene particles from some masks, which may pose health risks.””

See also:

[Nanotechnology-derived Graphene in Face Masks – Now There Are Safety Concerns](#) by [Andrew Maynard](#), July 12, 2021

“Given all that we know about the pulmonary toxicity of engineered nanoparticles, and the uncertainty over the inhalation risks of graphene, surely someone should have asked this question when developing graphene-containing masks.

When airborne nanoparticles are inhaled and penetrate to the lower regions of the lungs (the alveolar region), they can elicit a response that’s [more closely associated with the number or surface area of the particles](#) than their mass. And

because of this, very small quantities of material have the potential to cause a lot of harm – much more than you might imagine from the mass of material alone.”

Graphene Oxide has electromagnetic properties which have been detected in people who have been vaccinated.
