The US Embassy to Tbilisi is involved in the trafficking of frozen human blood and pathogens as diplomatic cargo for a secret military program. Internal documents, leaked to Bulgarian journalist [Dilyana Gaytandzhieva](#) by Georgian insiders, implicate US scientists in the transportation of and experimenting on pathogens under diplomatic cover.

According to these documents, Pentagon scientists have been deployed to the Republic of Georgia and have been given diplomatic immunity to research deadly diseases and biting insects at the Lugar Center – the Pentagon biolaboratory in Georgia's capital Tbilisi.

The military facility is just one of the many Pentagon biolaboratories in 25 countries across the world.
