September 14, 2020

Renowned Canadian constitutional lawyer, Rocco Galati, has filed a claim with the Superior court of justice in Canada on behalf of his client and 7 other plaintiffs. They are suing the Prime Minister of Canada, Justin Trudeau, Canada's Chief Medical Officer Dr. Theresa Tam, Premier of Ontario Doug Ford, and many more. You can view the 196 page statement of claim [here](#). The names and stories of some of the individual plaintiffs have been redacted on the documents by the plaintiffs themselves. Social media posts from Rocco Galati, the lawyer representing the plaintiffs, said it was done out of precaution to protect the individuals from harassment.

The plaintiffs include academics, doctors, people with disabilities and more.

Complaints include business closures, the mandating of masks and social distancing rules which the group argues are "extreme, unwarranted and unjustified" responses to the pandemic were "not scientific, nor medically-based, nor proven." They also bring forth evidence stating that government mask mandates can cause "physical and psychological harm."

The group accuses the WHO, mainstream media and the federal

government of spreading false alarm during the COVID-19 pandemic

Galati recently sat down for an interview with journalist [Rajie Kabli](#) for a two part interview. Below is part one, you can watch part 2 [here](#) if interested.

The sentiments shared by the plaintiffs in this case seem to be on par with many professionals across the world. For example,

More than 500 German doctors & scientists have signed on as representatives of an organization called the “Corona Extra-Parliamentary Inquiry Committee” to investigate what’s happening on our planet with regards to COVID-19, expressing the same sentiment. They came together to investigate the severity of the virus, and whether or not the actions taken by governments around the world, and in this case the German government, are justified and not causing more harm than good. You can read more on the [organizations website](#) if interested, they’ve repeatedly shared their opinion that what is happening is completely unnecessary and harmful in many different ways. They have referred to the pandemic as “fake story all over the world.” You can read more about that [here](#).

Dr. Michael Palmer, a chemistry professor at the University of Waterloo, Canada, who also has a medical degree with a specialization in microbiology is making headlines for distributing a course outline to his students saying his in-class exams aren’t mandatory “because of the COVID fake emergency,” according to [CBC news](#). The course outline was posted on social media after it was recently distributed to students. You can read more about that story [here](#).

An article published in the British Medical Journal has suggested that quarantine measures in the United Kingdom as a result of the new coronavirus may have already killed more UK seniors than the coronavirus has during the peak of the virus.

You can access that report and read more about it [here](#).

The Physicians For Informed Consent (PIC) recently published a report titled “Physicians for Informed Consent (PIC) Compares COVID-19 to Previous Seasonal and Pandemic Flu Periods.” According to them, the infection/fatality rate of COVID-19 is 0.26%. You can read more about that and access their resources and reasoning [here](#).

John P. A. Ioannidis, a professor of medicine and epidemiology at Stanford University has said that the infection fatality rate is close to 0 percent for people under the age of 45 years old. You can read more about that story [here](#).

Dr. Sucharit Bhakdi, a specialist in microbiology and one of the most cited research scientists in German history is also part of Corona Extra-Parliamentary Inquiry Committee mentioned above and has also expressed the same thing, multiple times early on in the pandemic all the way up to today.

Implementation of the current draconian measures that are so extremely restrict fundamental rights can only be justified if there is reason to fear that a truly, exceptionally dangerous virus is threatening us. Do any scientifically sound data exist to support this contention for COVID-19? I assert that the answer is simply, no. – Bhakdi. You can read more about him [here](#).

Michael Levitt, a Biophysicist and a professor of structural biology at Stanford University, criticized the WHO as well as Facebook for censoring different information and informed perspectives regarding the Coronavirus. He said that “The level of stupidity going on here is amazing.” You can read more about that [here](#).

The examples listed above aren't even the tip of the ice-berg.

There is also the issue of deaths being attributed to covid

when they're not really a result of covid. You can read more about that and see some more examples [here](#).

The point is, citizens scientists and doctors do not feel heard when it comes to what they want to see done by governments when it comes to the current state of our world, so they are becoming frustrated. Taking legal action seems to be the only way to get attention these days.
