Truth Comes to Light editor's note:

In her powerful speech on May 1st at the Cork, Ireland freedom rally, Professor Dolores Cahill shared about the work of the World Freedom Alliance (now in more than 100 countries) and the current European Spring campaign calling for "hope and accountability".

She shares details on ways to insist on accountability by all medical and law enforcement professionals who seek to infringe upon your rights. Sample documents are provided at <https://worldfreedomalliance.org/>.

Brief excerpts from her speech:

"The first people we are holding to account is all of the elected members of the European parliament."

###

"This is the 8th so-called false pandemic in 20 years. And I've been following it very closely..."

For 20 years I've been planning the alternative to the United Nations and the World Freedom Alliance is the alternative to the United Nations."

###

"Even here today, if they try and infringe on your freedom of speech, your freedom of assembly – you have to record these nice people. But they will be – can be held in their personal and private capacity. You write a notice of liability and you can hold them to account..."

###

"So basically what we are doing is, in the campaign for hope and accountability, is to inform you that you are free men and women. You are sovereign women and men of the nation of Ireland. No one can infringe on your inalienable rights – freedom of travel, freedom of assembly, freedom of speech, and, particularly, bodily integrity. So if a doctor, if anyone coerces anyone into saying you can not travel unless you have an injection, that is infringing on your inalienable right of bodily integrity. It is criminal and unlawful..."

###

"The global regime that's really been started since 1534 is using your taxes and your good will against every single one

of you.”

The World Freedom Alliance is calling for everyone to take part in their new campaign called “Hope & Accountability”.
