

Rapid Expansion of Erratic & Destructive Global Weather

In this episode of Geoengineering Watch Global Alert News, Dane connects many dots linking hidden controllers, governments, academia and elites to the destruction of our planet.

Topics discussed include:

- Our air is being systematically contaminated by sources that are hidden from the public.
- Microplastic pollution have been found in snow from again the Arctic to the Alps.
- Micro plastics and polymers are present in cancerous human lung tissue.
- Covert climate engineering operations, known scientifically as Solar Radiation Management (SRM), involved jet aircraft spraying of heavy metal, chemical and polymer nano particulates into the atmosphere for the stated purpose of blocking some of the sun's incoming thermal energy – for the stated purpose of slowing down global warming.
- Aluminum, barium, strontium, and other toxic heavy metals are all climate engineering elements, all highly toxic, all are showing up in lab tests of precipitation all over the world.
- The intentional dumping of tens of millions of tons of toxic particles in the atmosphere, part of SRM operations, is the biggest single source of incredibly dangerous atmospheric particulate pollution of all.
- Vaccines and fluoride are discussed as assaults on human health.
- Geoengineering is linked to collapsing food supplies.
- Censorship and surveillance are being used to control the masses.

- We are living in an artificially induced state of consciousness that resembles sleep.

It is no measure of health to be well adjusted to a profoundly sick society. ~ Krishnamurti

A small body of determined spirits fired by an unquenchable faith in their mission can alter the course of history. ~ Mahatma Ghandi

Extreme **heat and haze** continues here in Northern California, while **plastic particles are being found in the air** from Colorado to the Alps, and even in the Arctic.

Weather all over the world is becoming rapidly more **erratic and destructive**.

What factors are playing a part in the complex weather/climate equation?

How can we know what we are not being told by any “official”

source?

Who gets to decide what is “real” news, and what is not?

What happens when governments know they can no longer hide dire unfolding scenarios from the public?

The totality of converging challenges that we collectively face is daunting. Can we yet make a difference for the better?

Waking populations to the wider horizon is imperative, that task will require the effort of all who are awake and aware already.

Share credible data from a credible source, make your voice heard, make every day count.
