

# Smoking Gun: Fauci States Covid PCR Test Has Fatal Flaw; Confession From the “Beloved” Expert of Experts

[Smoking Gun: Fauci States Covid PCR Test Has Fatal Flaw; Confession From the “Beloved” Expert of Experts](#)

*The COVID PCR test is a complete fraud*

by [Jon Rappoport](#), [No More Fake News](#)

December 8, 2021

As my readers know, I’ve been proving for well over a year that the SARS-CoV-2 virus doesn’t exist.

Therefore, any test for it would be absurd.

However, I frequently put on my hazmat suit and enter the crazy world where all “the experts” claim the virus is real. I make these forays to show that, even within their fantasy bubble, and by their own standards, the pros are fatally contradicting themselves and lying constantly.

That’s what I’m doing in this article. I’ve got my hazmat suit on and I’m exploring the crazy landscape. I’ve published this piece several times, but I want to make sure people understand how the test has been used to manufacture the false appearance of a pandemic.

OK, here we go. Smoking gun. Jackpot.

Right from the horse’s mouth. Right from the man we’re told is the number-one COVID expert in the nation. What Fauci says is

golden truth.

Well, how about THIS?

July 16, 2020, podcast, *"This Week in Virology"*: Tony Fauci makes a point of saying the PCR COVID test is useless and misleading when the test is run at "35 cycles or higher." A positive result, indicating infection, cannot be accepted or believed.

Here, in techno-speak, [is an excerpt from Fauci's key quote](#) (starting at the 4m01s mark through to the 5m45s mark) – Fauci begins his first answer to the first question at the 4m20s mark and begins his second answer to the second question at the 5m26s mark:

"...If you get [perform the test at] a cycle threshold of 35 or more...the chances of it being replication-competent [aka accurate] are miniscule...you almost never can culture virus [detect a true positive result] from a 37 threshold cycle...even 36..."

Each "cycle" of the test is a quantum leap in amplification and magnification of the test specimen taken from the patient.

Too many cycles, and the test will turn up all sorts of irrelevant material that will be wrongly interpreted as relevant.

That's called a false positive.

What Fauci failed to say on the video is: the FDA, which authorizes the test for public use, recommends the test should be run up to 40 cycles. Not 35.

Therefore, all labs in the US following the FDA guideline are knowingly or unknowingly participating in fraud. Fraud on a monstrous level, because...

Millions of Americans are being told they are infected with

the virus on the basis of a false positive result, and...

The total number of COVID cases in America—which is based on the test—is a gross falsity.

The lockdowns and other restraining measures are based on these fraudulent case numbers.

Let me back up and run that by you again. Fauci says the test is useless when it's run at 35 cycles or higher. The FDA says run the test up to 40 cycles, in order to determine whether the virus is there. This is the crime in a nutshell.

"Hello, America, you've been tricked, lied to, conned, and taken for a devastating ride. On the basis of fake science, the country was locked down."

If anyone in the Congress has a few brain cells operating, pull Fauci into a televised hearing and, in ten minutes, make mincemeat out of the fake science that has driven this whole foul, stench-ridden assault on the global economy and its 8 billion citizens.

All right, here are two chunks of evidence for what I've written above. First, we have a CDC quote on the FDA website, in a document titled: *"CDC 2019-Novel Coronavirus (2019-nCoV) Real-Time RT-PCR Diagnostic Panel For Emergency Use Only."* This document is marked, "Effective: 07/13/20." That means, even though the virus is being referred to by its older name, the document is still relevant as of July 2020. "For Emergency Use Only" refers to the fact that the FDA has certified the PCR test under a traditional category called "Emergency Use Authorization."

FDA: "...a specimen is considered positive for 2019-nCoV [virus] if all 2019-nCoV marker (N1, N2) cycle threshold growth curves cross the threshold line within 40.00 cycles ([less than] 40.00 Ct)."

Naturally, testing labs reading this guideline would conclude, "Well, to see if the virus is there in a patient, we should run the test all the way to 40 cycles. That's the official advice."

Then we have a New York Times article (August 29/updated September 17, 2020) headlined: "*Your coronavirus test is positive. Maybe it shouldn't be.*" Here are money quotes:

"Most tests set the limit at 40 [cycles]. A few at 37."

"Set-the-limit" would mean, We're going to look all the way to 40 cycles, to see if the virus is there.

The Times: "This number of amplification cycles needed to find the virus, called the cycle threshold, is never included in the results sent to doctors and coronavirus patients."

Boom. That's the capper, the grand finale. Labs don't or won't reveal their collusion in this crime.

Get the picture?

I hope so.

If a lawyer won't go to court with all this, or if a judge won't pay attention and see the light, they should be stripped of their jobs and sent to the Arctic to sell snow.

2021 CODA: Recently, Florida, a state which has remained far more open and free from COVID restrictions and mandates than most other states, is reporting very low COVID case numbers. Why?

Because as of December 3, 2020, the state of Florida started doing something unheard of. It demanded that labs report the number of cycles ("cycle threshold") for every test they run.

Here is the relevant wording in a release from the Florida governor, Ron DeSantis, and the state Department of Health:

“Cycle threshold (CT) values and their reference ranges, as applicable, must be reported by laboratories to FDOH via electronic laboratory reporting or by fax immediately.”

“If your laboratory is not currently reporting CT values and their reference ranges, the lab should begin reporting this information to FDOH within seven days of the date of this memorandum.”

We can assume there is only one reason for this order. The Florida governor and the Department of Health are aware that tests run at 35 cycles or higher are useless and misleading, creating a mountain of false-positives, and they want to stop this crime.

And with the Governor’s recent appointment of a new state Surgeon General, who is well aware of certain aspects of the COVID fraud, the requirement for labs to start telling the truth is taking hold.

Hence, lower case numbers.
