

The Age of Ultron: Ultimate Transformation

[The Age of Ultron: Ultimate Transformation](#)

by [Rosanne Lindsay](#), Naturopath, [Nature of Healing](#)
February 22, 2022

The *Age of Ultron* is upon us. The ultimate transformation has been built into the human psyche over many generations and platforms.

While some people say '[bring it on](#),' others ask if there is an Endgame?

The Cycle of Time

By observing the clues planted everywhere, there is no

Endgame. There is only the end of an Age. The transition from Age to Age moves according to the Sky Clock, a celestial **cycle** that expands and spirals outward in a coil. The Cycle of Ages has been described in all traditions and cultures, from the Greek, [Hesiod's Five Ages of Man](#) to the Astrological Zodiac Cycle (2160 years) and [Precession of the Equinoxes](#) (25,920 yrs), to [the India Yugas](#) (4,320,000 years), the [Hopi World Ages](#), and the Holy [Bible Revelation 21:1](#).

The Cycle of the Ages is mirrored in humanity using the chart of [The Zodiacal Man](#). According to this correspondence, the [image of Zodiacal Man](#) shows humanity has risen from the feet, in Pisces, and is now in the lower leg, in *The Age of Aquarius*, [The Age of Freedom and Technology](#) (especially electricity), and the Water Bearer. By this measure, humanity is working its way back up toward the head, in Aires, and enlightenment.

Implicit in the meaning of the word "cycle," is humanity's rise to a peak, followed by an inevitable decline; and once humanity's darkest point is reached, there is inevitable advancement. Many feel time is speeding up. People are experiencing accelerated growth and the feeling of living multiple lifetimes over the course of one lifetime. The Earth, and all life, is undergoing an enormous process of upgrades.

According to the Hopi, we are living at the end of the Hopi Fourth World, marked by chaos and a life out of balance with the ways of the Creator. Hopi elders believe the Fifth World is upon us, where peace, prosperity, and spirituality shall reign. According to these many traditions, each time the world comes out of balance, there is a reset we can blame on *an angry Creator*. Peace is forever elusive, always after "the next war."

[The Precession of the Equinoxes](#) affects everything on Earth:

- Satya Yuga – Qori Wata – *Golden Age* – Age of part of

Cancer, Leo, Virgo, Libra, Scorpio, ([13,000 years](#)) to the current Age of Aquarius

▪ ***Descending Ages***

- *Treta Yuga – Qolqe Wata – Silver Age – Age of Sagittarius and Capricorn*
- *Dwapara Yuga – Anka Wata – Bronze Age – **Age of Energy** (2400 years) Age of Taurus and part of Aires*
- *Kali Yuga – Awka Wata – Iron Age – Age of Materialism, Confusion, Selfishness, Deception, The Dark Age, Part of Aires and Pisces – disconnected from Source*

▪ ***Ascending Ages:***

- *Dwapara Yuga – **Age of Energy** – Age of part of Pisces, and Aquarius – **we are here***
- *Treta Yuga – Age of Ascension – Age of Gemini and Taurus*
- *Satya Yuga – Golden Age – Age of part of Cancer, Leo, Virgo*

A New Beginning

There are many other time cycles, some of which are unknown. But let's face it; we didn't come to Earth at this time for a vacation but for a purpose. In any Age, expect ups and downs, especially in a dualistic reality. From the *Kali Yuga (in Pisces)* to the beginning of the *Dwapara Yuga (in Aquarius)* where we sit now; humanity is again ascending consciousness. This is a remarkable time to be alive.

The "Age of Transhumanism" is part of a transition phase of about 300-500 years. Ideas and impulses of the old age overlap with the those of the new for up to 1000 years into the new one. We are in the beginning of the *Dwarpa Yuga, The Age of Aquarius*, the Age of Energy, until about 4200 AD. This *Transition Age* marks the end of one cycle and the beginning of another. It will be similar to the last *Dwapara Yuga*, but expressed on a higher more sophisticated level as we spiral to a new plain. Energy can be used in new ways to create 'miracles.'

Transhumanism is a class of philosophies of life that seek the continuation and acceleration of the evolution of intelligent life beyond its currently human form and human limitations by means of science and technology, guided by life-promoting principles and values. – [Max More, Principles of Entropy](#)

From [books](#) to [movies](#), Transhumanistic concepts have picked up speed over the past two decades. The idea was [first defined in 1998](#) in selected circles of influence, as *the extension of humanism*. But how to convince humans to partake in a transformation that merges minds into a melting pot, the opposite of self-actualization?

In this transition, no war is necessary. *Let them beg for it. Let them sign up for it.* Let the transformation begin and end with technology, by consent and [by contractual agreement](#).

In the *Dwarpa Yuga*, The Energy Age, humans have moved from the Industrial Age, to the Information Age, ComputerAge, DigitalAge, and [New Media Age](#). If you see it in the movies, it is playing out in reality. Graphene nanoparticles are part of the process, [in food](#), and in [medicine](#). Graphene is [the new plastic](#), found [in air](#), [water](#), soil, blood, and [saline solution](#). It's everywhere and [in everything](#), as a marker of transformation.

Mutation, it is the key to our evolution. It has enabled us to evolve from a single-celled organism into the dominant species on the planet. This process is slow, and normally taking thousands and thousands of years. But every few hundred millennia, evolution leaps forward. Professor X – [X-Men](#)

[Graphene](#) is the *strongest, hardest, and lightest* of any material ever made. It has [optical, thermal, mechanical, and electrical](#) properties with applications in [silicon-based semi-](#)

[conductor devices](#). Once inside the human carbon-based body, [graphene acquires magnetic properties](#) and becomes a superconductor.

Think of *The Avenger* movies, where the “gods” of the *Marvel Comics* and films are considered Superheroes. They are, in reality, superconducting humans, or Transhumans. And what movie-going human doesn’t want to be like them? So ignore false reports of [semiconductor chip shortages](#) being reported in the media. It is a distraction, [a shortage ‘by design.’](#)

At the same time, realize that you are only being told one story of evolution, by those who grasp tightly to the megaphone. Evolution happens on multiple levels. Unlike robots, humans are multidimensional beings. Be open to the unseen aspects that also evolve. Early 2022 is experiencing a higher frequency. This is a time to turn inward. Connect to Nature, your true nature, to find self-fulfillment and personal peace, even in the midst of dwindling deception and brainwashing.

A.I Taking Shape

According to Forbes Magazine, [Artificial Intelligence \(A.I.\) is Driving a Silicon Renaissance](#). But could it be the other way around? The manufactured silicon (synthetic) revolution is driving both A.I. (robotics), and [the blockchain](#). This also marks the [Age of Transhumanism](#). Movies attempt to define this Age as *the final frontier* (*Star Trek*), this attempted merging of human and machine. Graphene nanoparticles found in mRNA vaccines are the catalyst to connecting to the electromagnetic grid and other devices. One Italian doctor was able to identify injected people before they arrived at his office by [a signal detected on his cell phone](#).

Graphene nanoparticles appear in the blood as tiny [synthetic robots, able to self-assemble](#) into structured shapes not found in Nature. Note the similarity between magnified images of graphene-based [nanotech in blood](#) and the images from the

movie, *The Avengers, the Age of Ultron*. Do these nanobots look like a computer motherboard? A city? A.I.?

Nanobots can appear as [worm-like hydra](#). Hydra nanobots are eerily similar in shape to [the constellation Hydra](#), also known as the water snake.

Hydra is pictured on a stone [constellation map from the Euphrates](#). Dating from about 1200 B.C., the serpent is there identified with the source of the fountains of the great deep, and is one of the several sky symbols of Tiamat, the great dragon.
– [Gerardus D. Bouw, Ph.D](#) ,
“Drako the Dragon”

In the 2015 movie, *[The Avengers, The Age of Ultron](#)*, Ultron, a robot, seeks to make itself *better, stronger, harder, and more beautiful* using a metal found only in one part of the world, the same metal in the shield that protects Captain America.

The most versatile substance on the planet, and they used it to build a Frisbee. – Ultron, The Avengers: The Age of Ultron

Ultron comes from the words *Ultra*, [to transcend beyond limits](#), and [Tron, one who is growing](#). The message of transformation is clear. However, robots in any form can never be self-aware. In this way, they will never be like humans.

It's the end, the end of the path I started us on. – Iron Man, The Avengers: The Age of Ultron

Nothing lasts forever – Natasha Romanoff, The Avengers: The Age of Ultron

We are the Avengers. We can bust arms dealers all the livelong day, but, that up there? That's... that's the end game.” – Tony Stark, looking up to an invasion of metal man/gods falling to earth, The Avengers: The Age of Ultron

The Fourth Revolution

No matter who wins or loses, trouble always comes around. – Nick Fury, The Avengers: The Age of Ultron.

When articles openly proclaim, “[Looking Forward to the End of Humanity](#),” we have entered **The Fourth Revolution**. There is no such Age as *The End of Humanity*. There is, however, [an artificial world of Cybernetics](#) boasting “eternal life through advanced technology” led by self-proclaimed, pretend superheroes, Jeff Bezos, Peter Thiel, and [Elon Musk](#), developer of the [neural network](#).

This 4th Revolution occurs in Cyberspace [to redesign and reengineer reality](#). Evidence for building an artificial world can be seen by [The Human Connectome Project](#), a mapping of the human brain, launched in 2009 by the National Institutes of Health. It is expressed as [the software of life](#) by mRNA vaccine maker Moderna's chief medical officer.

These “makers” of an artificial reality fail to disclose the ability of hacking into the software. Their job is to convince the human psyche that all is well. Ironically, when it suits, scientists claim to [hack the digital codes to change reality](#), from gene editing to Cryptocurrency.

The Fourth Revolution is advertised as the “New Golden Age,” but it is only a [Golden Age of Fraud](#). The [Transhuman ‘Golden Age’](#) is made possible by Social Engineers who have been able to mold behavior of whole populations, over generations. The father of Social engineering, [Ed Bernays](#), was said to be the nephew of Sigmund Freud. *Eddy repurposed the idea of propaganda into Public Relations*. In 1917, Ed Bernays was recruited by President Woodrow Wilson to use propaganda to influence Americans to willingly engage in World War I.

Today, under new direction, the role of Ed Bernays is now being played by [Klaus Schwab, an elite German and founder of The World Economic Forum](#), and author of the book, “[Covid-19: The Great Reset](#).”

What the fourth industrial revolution will lead to is a fusion of our physical, digital and biological identity. – Klaus Schwab, Chicago Council on Global Affairs, 2019

What do the social engineers behind the movies seek to manifest through their images? Mind control? Civil War? An extinction event?

Recipe For Transformation

In a world run by the Sky Clock, there are no endings, only new beginnings in a constant cycle of birth, death, and renewal. The time loop phenomenon is part of the human psyche, as shown in [movies that loop time](#), such as Groundhog Day, About Time, Edge of Tomorrow, Looper, and Mind Games. [Movies manipulate the mind](#). The mind projects reality. So it follows that those who control the mind, control reality. Add a

nanochip with [frequencies](#) that induce neuronal activation, and then inject [nanomaterials with photothermal stimulation](#) to modulate the brain, and you have a Recipe for Transformation. But does this process bring freedom, peace, or enlightenment?

One answer is found in the movie, *The Avengers: The Age of Ultron*, where the Avengers are not enough to keep the peace, so *Ultron* takes control to end Earth once and for all (a reset), that he says has occurred many times before.

There were more than a dozen extinction level events before even the dinosaurs got theirs. When the Earth starts to settle, God throws a stone at it. And, believe me, he's winding up. – Ultron, The Avengers: The Age of Ultron

By studying human history, *Ultron* discovers the fallacy of the phrase, “peace in our time,” a phrase uttered in 1938 by [British Prime Minister Neville Chamberlin](#) after signing a peace pact with Nazi Germany. The contradiction? The peace sign is also a ‘victory for war’ sign. Peace never lasts long because humans are willing to compromise with demons, as depicted in the influential poem, [Dante's Inferno](#), a divine comedy. Humans lack morals to know when enough is enough, and fail to take responsibility for their actions.

Ultron can't see the difference between saving the world and destroying it. Where do you think he gets that? – Wanda Maximoff, The Avengers: The Age of Ultron

I know you're good people. I know you mean well. But you just didn't think it through. There is only one path to peace... your extinction. – Ultron, The Avengers: The Age of Ultron.

The Path of Choice

The upgrade and downgrade of humanity is ongoing. The Creation-Destruction Cycle of *The Ages* suggests an Avenger-god with control issues. For what ultimate purpose? For

connectivity to an electromagnetic grid? For tracking purposes? For control of the body and mind? For the *Transmutation* of an entire species? Movie makers would prefer that you think so.

We are the Borg. Lower your shields and surrender your ships. We will add your biological and technological distinctiveness to our own. Your culture will adapt to service us. Resistance is futile. – [The Borg, Star Trek Voyager](#)

Unlike *Ultron*, a synthetic, *immortal* being, humans are *eternal* beings. Humans encompass physical bodies, light bodies, and energy bodies of a multi-dimensional nature, as Earth is multidimensional.

During the Iron Age, humans forgot their spiritual aspects and focused on a material existence. In this new Age of Energy, humanity now has the opportunity to interact with the subtler aspects of energy and consciousness, and go beyond their physical limits.

On the Path of Choice, do you choose Transhumanism or do you expand into higher dimensions of yourself? Do you live with the status quo and squander Earth's resources? Or do you live in sacred relationship with the Earth and all of its sentient inhabitants? It seems that your choice determines the outcome, not for the world, but for the world you occupy.

Typical of humans, then scratch the surface and never think to look within. – [Ultron, The Avengers: The Age of Ultron](#)

I must not fear. Fear is the mind-killer. Where the fear is gone. Only I will remain. – [Paul Atreides, Dune, 2021](#)
