Simon Parkes and Sacha Stone take a deep and profound dive into the diabolical 5G technology, which is not about faster gaming or faster movie download convenience. They discuss the massive tree cutting we see happening today which is to facilitate the 5G grid while we are paying the bills for it. And how the media, the corporate system and academia are transformed into diabolical propaganda machines for 5G technology. But most important, how this 5G shit offers us the perfect conditions to access our higher states of consciousness and real potentials.
