*Maybe they're right
Maybe there is something wrong with me
I just don't see how a government that wants to keep me safe
could be bad*

*Look at my pass
Isn't it neat
Hope it'll make my vaccinations complete
Wouldn't you think I'm the girl
The girl that fears, everything*

*Do as I'm told
Dignity's sold
How many boosters can one body hold
Looking at my face you'd think
Sure, she's got Bell's Palsy*

*I've got Pfizer, Moderna and AZ
I've got Johnson and Johnson galore
You need proof for a job? I've got 120
But who cares
No big deal
They'll want more*

*I don't wanna be, where the sheeple are
I wanna see my friends without masking
Walking around with those, what do you call them?
Oh yeah, teeth*

*Trusting the experts you won't get you far
Shots are required for hugging, laughing
Limit of 5 when we, what's the word again?
Meet*

*Can't board a ship or take a trip
Soon you'll need proof of vax to take a shit
Out of the C
Wish I could flee
Far from this world*

*What would I give, if they let me live Without these measures
What would I pay to spend a day without clean hands
They'll take your land
Hope you understand
That they will, come for your own daughters
Fuck your feelings, tired of kneeling
Ready to stand*

*I'm ready to know, about the NWO
Usine my iPhone to seek out answers
What's in the vaccine and why does it
Burn*

*When will they learn
Wouldn't I love, love for the world to rise up above
Out of the C
Wish I could flee
Far from this world*
