

The Maui ‘Build Back Better’ Script

The Maui ‘Build Back Better’ Script

by [Rosanne Lindsay](#), [Nature of Healing](#)

August 31, 2023

Can the government take control of the land after a natural disaster and then deem it off limits? Is government capable of creating the “natural” [disaster](#)?

Land Grab?

“I’m already thinking about ways for the state to acquire that land so that we can put it into Workforce Housing and to put it back into the families or to make it open spaces in perpetuity as a memorial.”

– Gov. Josh Green interview with Michael Henessey, Snowflake news, [Green Wants State to Own Lahaina](#), August 15, 2023, [13:00 minute mark].

The new governor of Hawaii, Josh Green M.D., a licensed medical doctor, resident of Hawaii, but not a Hawaiian, became governor in December of 2022 and took office in January of 2023. In similar fashion, Maui also elected a new mayor, Richard Bissen, at the same time. But where was the mayor during the disaster? And why is he now [facing calls to resign](#)?

“I’m not sure who was in charge.”

– Maui Mayor Richard Bissen

Was the unspeakable Maui disaster the result of incompetence or was it orchestrated by design?

According to an article in the California Globe, Josh Green has been a [puppet for the United Nations](#) and a spokesperson for the **Build Back Better** (bbb) 2030 agenda, which seeks to create “**Stack-N-Pack**” housing in Smart™ Cities all over the world by 2030.

According to the July 13, 2020 [World Economic Forum Playbook](#), the “bbb” agenda includes: “destruction,” “green recover,” “reset and reinvent,” disasters,” based on “Climate Change.”

In Hawaii, the BBB created the **Build Beyond Barriers Working Group** empowered to approve and streamline housing construction projects, scheduled for a 5-year build-out based on the [U.N. Sustainable Cities and human Settlements](#). In other words, no more single family homes.

“The 2030 Agenda Sustainable Development Goal 11, “make cities and human settlements inclusive, safe, resilient and sustainable.”

– [Build Beyond Barriers Working Group \(BBBWG\)](#), August 11, 2023, Office of the Governor

The [UN document](#) details “Sustainable Human Settlements” under 6) *promoting human settlements planning and management in disaster-prone areas.*”

Green is not the only politician promoting the U.N.’s **Build Back Better** Agenda, the largest effort to “combat climate change.” On October, 28, 2021, [President Biden announced the Build Back Better](#) Framework for the U.S.

The buildup to the Maui fires began when Gov. Green issued an emergency housing proclamation three weeks prior. Along with Hawaii’s [robust emergency siren warning system](#), everything should have been ready to flush out any wayward spark. So why did the warning sirens sit silent during the deadly fires?

Agenda Timeline to Fires

Thanks to Peggy Hall for her “Peggy-isms” and her historical reporting featured in her “Maui Fires” [Playlist](#).

One month before the Maui fires ... (July 12, 2023), Governor Green issued [a press release](#) highlighting a commitment to the United Nations (U.N.) 17 Sustainable Development Goals (SDGs) under the narrative of uniformity.

“We cannot put off changing things any longer. We refuse to stand idle when 2030 looms closer and closer... We only have one Island Earth, let us do our best to take care of it and each other. We are one species, with one planet, one chance.”

– Gov. Josh Green, July 12, 2023

Three weeks before the Maui fires... (July 18 2023), Governor Green issued a controversial Emergency Housing Proclamation titled, [Emergency Proclamation relating to Housing](#)” related to natural disasters or Covid. The proclamation not only [suspends the laws of Hawaii to gives the Governor broad powers](#) over any emergency, but also [removes barriers](#) to building new homes.

The laws suspended include provisions related to historic preservation, county zoning and the state Land Use Commission, which functions as a state-level zoning authority. The order also suspends Hawaii’s environmental review law, which requires in-depth environmental impact statements for projects determined to have a significant impact on natural and cultural resources.

The fast-tracked environmental review process will largely be conducted by the working group and housing officer. While Green promised the group and officer will work transparently, the working group will not be subject to [Hawaii’s Sunshine Law](#), which among things requires decision-making agencies to hold their meetings in public.

One week before the fires... Governor Green spoke at the UN Sustainability Forum:

“We have done some things. One is The Aloha Plus Challenge, which is a data-driven approach... to track the SDGs to make sure that we embed them in all of our policies.”

– Governor Josh Green speaks at Sustainability Forum, United Nations, Source: [Green Wants State to Own Lahaina](#), August 15, ,2023 [minute mark 19:00].

After the fires... Gov. Green took the spotlight several times. Did he make any contradictory statements?

“This is going to be a multi-year recovery. It’s going to take essentially years to rebuild Lahaina which was destroyed. But we will build it back better.....We will find a way to make sure there is more housing...”

Source: [KTIV interview](#) August 11, 2023, 5:11 minute mark

“It was so hot that even metal contorted.”

– Gov. Josh Green, August 14, 2023 [CBS Morning News](#)

“When you see mostly fatalities and very few injuries, that tells you it was a natural disaster.”

– In response to “You would still call this a natural disaster and not man-made? Gov. Josh Green, August 14, 2023 [CBS Morning News](#)

“I would call this a natural disaster because the winds were moving any fire between 60 and 80 miles per hour, that’s a mile a minute.”

– Gov. Josh Green, August 14, 2023 [CBS Morning News](#)

“If you put a fire truck in the way of the flames that were coming through at a thousand miles per hour, the fire truck would have been incinerated in addition to the people.”

– Gov. Josh Green, August 14, 2023 [CBS Morning News](#)

****I’m already thinking about ways for the state to acquire that land so that we can put it into Workforce Housing and to put it back into the families or to make it open spaces in perpetuity as a memorial.”***

– Gov. Josh Green interview with Michael Henessey, Snowflake news, Source: [Green Wants State to Own Lahaina](#), August 15, 2023,

“That level of destruction in a fire hurricane, something new to us in this age of global warming, was the ultimate reason that so many people perished.”

– Josh Green KITV News, Source [Global Warming Caused Deaths says Gov. Josh Green](#), August 16, 2023

“There are going to be fires months in and months out for decades to come.”

– Josh Green, local news update KITV, Source: [Not Sounding the Sirens Was Intentional](#). August 17, 2023

Things Don't Add Up

One of the few objective investigators connecting the dots, and highlighting the [odd behavior of Governor Green](#), is [Peggy Hall](#).

Peggy raises concerns that everyone should be raising about the dramatic changes happening behind the devastating scenes of Lahaina, Hawaii.

“Why did the emergency alert not go out to the population?”

[Things Don't Add Up](#), August 11, 2023

“How is it that my NAV System in my car can know exactly to the minute when I'm going to arrive, but it [technology] can't predict these weather events?”

[Things Don't Add Up](#), August 11, 2023

“Why was there no water in the pumps?”

– [Global Warming Caused Deaths says Gov. Josh Green](#), August 16, 2023

“Because Maui is now in a state of emergency, he [Josh Green] can suspend any law he wants... he can

take people's private property. He can take control of the public property. He can prevent people from moving in or out. And then, he wants to prevent people from having their own will to sell their property."

– [GLOBAL WARMING CAUSED DEATHS Says Gov. Josh GREEN](#) August 16, 2023

"It was not a 'wild fire.' It was an urban fire."

– [\(More\) Weird Comments from Josh Green](#), August 17, 2023

"How did the fire get put out? Who put the fire out? There was no water. The fire fighters fled the scene in a police car... Why was the fire chief not even on the island?"

Maui Fire Chief Missing, August 22, 2023

"Am I the only one bothered by the phrase 'human settlements?'"

– [Emergency Declared 3 Weeks Before Maui Fire](#). August 23, 2023

"There is no legal authority for this governor to do what they are doing."

Proof Of Lahaina Land Grab, August 29, 2023

"The suspension of laws will work? We are are a nation that is supposed to follow laws, not suspend them."

Proof Of Lahaina Land Grab, August 29, 2023

These "holes in the narrative" strengthen the premise for a land grab. Some of the biggest holes include 1) the fires were instigated by a "hurricane-fire" that blew in from hurricane winds too far away from the island to spread any natural flames, and 2) The flames spread at a speed of "60-85 mph, "or even "1000 mph," both speeds suggested by Governor Green [in the same interview](#).

Directed Energy Weapons

How did the fire begin? Some say [power lines](#). Some say a [brush fire near the site](#). Some say 'a ['compound disaster' and climate change](#). Army Major General Kenneth Hara, the man in charge of the Hawaii [National Guard](#) says, "We don't know what actually caused the wildfires in Hawaii."

The U.S. Government [admits to manipulating hurricanes](#). The [history of Project Cirrus](#) describes the extent to which corporations and government work together to manipulate the weather. [See [Peggy's take](#)].

The nature of the Maui fires cause some to compare Maui to [Paradise, California](#) that burned in a similar pattern in November of 2018 where homes and [cars burned](#) while trees were left standing.

If "metal contorted" and bodies turned to ash in Lahaina, [Peggy Hall reminds viewers that metal melts at 2500° F](#) for a sustained amount of time, whereas normal fires burn at 1400° F. Is the Maui devastation proof of a [natural fire fed by grass](#), as the narrative goes, or directed microwave energy?

Companies that contract with the Department of Defense include

the [Air Force](#) and companies such as Northrop Grumman which have used unmanned aerial systems, including [directed energy laser technology for the last 50 years](#). Is it a coincidence that the [AMOS site is located on Maui, Hawaii](#)?

“The sodium laser excites sodium atoms in the upper atmosphere to create a source of light or beacon 90 kilometers (55 miles) above the Earth.”

– [AFRL at the Maui, Hawaii Site, part of the Space Electro-Optics Division](#).

Reinventing Capitalism

The Build-Back-Better Agenda is part of the World Economic Forum script, [tied to reinventing Capitalism](#) that reads as follows:

Thanks to the ongoing pandemic, the world is off-balance – and it will remain so for years to come. Far from settling into a ‘new normal’, we should expect a COVID-19 domino effect, triggering further disruptions – positive as well as negative – over the decade ahead...

*A true recovery from COVID-19 will not be about putting things back together the way they were: we need to ‘**build back better**’, to ‘reset’, if we are to address the deep systemic vulnerabilities the pandemic has exposed.*

Increasingly, comprehensive and integrated risk assessments will be essential for companies to fulfil their fiduciary obligations and maintain their social license to operate.

The U.S. version of the **Build Back Better** [script can be read here](#).

The questions left to ponder are: were the fires set intentionally? Were they accelerated? Augmented? If so, where will the next one be? What will the new restrictions on freedom look like? Did the 1976 Eagles song, [The Last](#)

[Resort](#), from the album Hotel California, foretell the events in Paradise and Lahaina? [see verses 4, 6, & 8].

Will you agree to the new U.N. terms?

Thank you to the amazing Peggy Hall for compiling the dots!

TCTL editor's note:

In the article above, Rosanne shared links to The Last Resort by The Eagles. "Did the 1976 Eagles song, [The Last Resort](#), from the album Hotel California, foretell the events in Paradise and Lahaina?"

Here are the lyrics:

*She came from Providence
One in Rhode Island
Where the old world shadows hang
Heavy in the air
She packed her hopes and dreams
Like a refugee*

Just as her father came
Across the sea

She heard about a place
People were smilin'
They spoke about the red man's way
How they loved the land
They came from everywhere
To the Great Divide
Seeking a place to stand
Or a place to hide

Down in the crowded bars
Out for a good time
Can't wait to tell you all
What it's like up there
They called it paradise
I don't know why
Somebody laid the mountains low
While the town got high

Then the chilly winds blew down
Across the desert
Through the canyons of the coast
To the Malibu
Where the pretty people play
Hungry for power
To light their neon way
Give them things to do

Some rich men came and raped the land
Nobody caught 'em
Put up a bunch of ugly boxes
And Jesus people bought 'em
They called it paradise
The place to be
They watched the hazy sun
Sinking in the sea

We can leave it all behind and sail to **Lahaina**
Just like the missionaries did so many years ago
They even brought a neon sign said, "Jesus is coming."
Brought the white man's burden down
Brought the white man's reign

Who will provide the grand design?
What is yours and what is mine?
'Cause there is no more new frontier
We have got to make it here

We satisfy our endless needs
And justify our bloody deeds
In the name of destiny
And in the name of God

And you can see them there
On Sunday morning
They stand up and sing about
What it's like up there
They call it **paradise**
I don't know why
You call someplace paradise
Kiss it goodbye
