

The Overpopulation Myth

[The Overpopulation Myth](#)

by [Rosanne Lindsay](#), Traditional Naturopath, [Nature of Healing](#)
March 22, 2023

The myth of overpopulation is an unfounded belief that: the number of people on Earth will exceed the [hypothetical] carrying capacity of the planet in the foreseeable future, leading to economic or social collapse, and that actions ought to be taken to curb population growth.

Population alarmists at the United Nations propose that the world's growing population will strip the Earth of its useable resources and will outpace innovation and rates of production. This, they believe, will cause diminishing standards of living, more poverty, more hunger, famine and starvation, water shortages, pestilence, war and conflict over diminishing resources, the evisceration of wildlife habitats, and environmental catastrophes.

– [Population Research Institute](#)

Overpopulation: The Myth

Spoiler Alert: Data trends are clear. The world is in a population decline.

Overcrowded cities ≠ overcrowded planet. – [Jared Wolf](#)

True numbers show that [China's fertility rate is below 1.5 children per woman](#). [Many countries](#), though not all, have now fallen below the 2.5 birth rate marker, which will begin to create lopsided populations with too many old and not enough young to support them. No known society has recovered from

such a decline. [Twenty-three countries](#) expect their numbers to halve by 2100.

When officials at the UN Fund for Population Activities (UNFPA) [projected 8 billion people by 2022](#), were they correct in their assessment? What is [UNFPA](#)? How accurate are their models? How do they know that their numbers will spell the collapse of civilization? Are they really [part of the depopulation solution](#)? Are [your tax dollars supporting](#) their coercive methods? Why should we believe them? [More on [what UNFPA is here](#)].

The term “overpopulation” is an attempt to mislead through social engineering. It is an attempt to control human behavior by pinning the blame on humans for environmental changes and to create fear. Meanwhile, environmental catastrophes – famines, water shortages, extreme temperatures – are [engineered through technology](#) to feed the myth of “Climate Change.”

The fact is that the climate is *ever changing*. There is nothing to fear. There is only the act of questioning and stopping the [changers](#) of climate [who cause it to rain and snow](#) as some [solutions to droughts](#). [See [US patent for altering weather](#) and [a list of companies](#) in the U.S. altering weather patterns].

Governments today are pushing population control policies in order to control the number of children being born as a protective measure to their national resources. All of these policies have received global recognition of their brutality:
–[Population Research Institute](#)

- *China's one-child policy, where women were severely fined, arrested, or forcibly sterilized for exceeding the birth limit.*
- *India's sex-selective abortion where approximately 15.8 million girls have been eliminated since 1990 due to a*

cultural preference for boys. Now the government wants to impose their own two-child policy.

- *Latin America's forced sterilization programs where women were arrested for being pregnant and their babies were aborted in unsanitary conditions.*
- *The United Nation's 'education programs' that refuse aid to developing countries unless they accept contraception, abortion, and sterilization to prevent the false idea of population over-growth.*
- *The United States government helped to found the UN Fund for Population Activities (UNFPA) in 1969 to be a nonpartisan clearinghouse for population and demographic information. Instead, [UNFPA evolved](#) into an advocacy group that has had a hand in several coercive population control programs around the world.*
– [Population Research Institute](#)

“Overpopulation” is the *prescribed* reason for the U.N.'s *Sustainability Agenda*, with [Sustainable Development Goals \(SDGs\)](#), that urge people to “[eat bugs over beef](#)” for [reasons unproven](#), in order to counter “Climate Change.”

The world has [overcrowded cities, not overcrowded countries](#). According to the [Sustainable Review](#), “if the entire world population lived in Texas, we would still be less crowded than New York City. Texas has over 268,000 square miles of land for a planet of 8 *billion-plus* people.”

Ironically, overpopulation is the *official* reason to herd people into “[Smart Cities](#),” where the digital (CBDC) blockchain, 5G, and *The Internet of Things* will make it easier to control, sanction, and monitor people.

Humanity is moving ever deeper into a crisis which has no precedent – a 'final exam' as to whether or not it qualifies for continuance in the Universe. It is not an examination of political, economic, or religious systems but of the

integrity of each and all individual humans' responsible thinking and unselfish response to the acceleration in evolution's evermore unprecedented events. – Buckminster Fuller, 1981, "Critical Path"

Thanks to social engineering and movie-making, humanity has been purposely misled. The population is in decline. Employers can no longer find find people to hire. New apartment buildings stand empty in US cities. And [fertility rates have plummeted](#).

Population Collapse Suppressed

During the [2019 World Artificial Intelligence Conference](#) (WAIC), the talk was about Population Collapse and Artificial Intelligence, *not* overpopulation. According to the [Sustainable Review](#), "Every region on Earth now expects more deaths than births in the coming decades." Furthermore, reports from the U.S. VAERS database indicate that [death rates have increased](#).

Ironically, the concept of overpopulation has always been sold during times of starvation. Episodes of starvation have been underreported throughout history. The latest December 2021 Chinese census has not been made public, but estimates from the 2020 census show [China loses 400,000 people annually](#). The United States noted similar numbers. Officials guesses a lower fertility rate is a natural result of China's social and economic development. But could it be due to UNFPA's social engineering? However, this is not the first decline for the Chinese:

Government figures show the Chinese population declined by around 13.5m between 1959 and 1961, although that is believed to be a serious underestimate. Independent scholars believe tens of millions of people died during the Great Leap famine between 1959 and 1961, when Mao ordered the entire nation to make steel in backyard furnaces and crops were exported and

hoarded even as millions starved. –[Sun Yu, Financial Times, 2021](#)

Controlling Herd Size

The U.S. media promotes fear of coming food shortages, while governments promote culling animal herds, resulting in higher food prices. According to the [UK Agriculture, Food, Environment](#), “Culling is the best strategy a farmer has to controlling herd size.”

But which herd are they describing? Animal or human?

By the 2020s we find ourselves commandeered by a technology whose algorithms and oh so virtual artificial intelligence are often regarded as a model to emulate in real life, sacrificing our very own minds in a blind displacement of genuine thinking. Is it any wonder we find our entire species in the diamond lane on the highway to extinction? – [Boho Beau, Whole World](#)

The propaganda to save Earth from human overpopulation is promoted through movies and secret government programs, alike, as a distraction to the reality of population collapse through engineering.

The 2017 movie, [Downsizing](#), is a social satire that promotes the shrinking of people to five inches through a new technique called “cellular reduction,” as a way to both save the planet and be able to afford an elegant lifestyle at the same time. But, in the end, the same problems that plague the “big people” also affect the little ones since everyone shares the same Earth.

In the HBO, post apocalyptic series, [The Last of Us](#), a global zomie-esque fungus pandemic is blamed on “Climate Change.” The result is the creation of Settlement Cities that eventually become “QZs,” or quarantine zones, run by [FEDRA](#) (military arm),

where freedom is nonexistent. The story proclaims the mushroom Cordyceps to be the source of the plague while an experimental vaccine to be the solution. In reality, [Cordyceps is a healer](#) that recovers the immune system and has [anti-tumor properties](#). Everything is reversed.

Movies correspond to politics through [panic propaganda](#) and predictive programming. Why else would Hollywood release so many plague-based movies based on false information? In case of any future global pandemic, the U.S. government has made plans to control the human herd through the Federal Emergency Management Agency (FEMA). Put another way, FEDRA equals FEMA.

FEMA was created by [a series of Executive Orders](#). Presidents use Executive Orders to bypass Congress and exercise the unilateral power of their office. FEMA has the authority to suspend laws, move populations, arrest and detain citizens without a warrant and without trial. FEMA can seize property, food supplies, and transportation systems. It can suspend the Constitution of the United States, which, by the way, presidents already accomplish by using Executive Orders.

FEMA is an agency with powers beyond any other U.S. agency. It was set up *to assure the survivability of the United States Government in the event of a nuclear attack*. These are the [10 FEMA regions in the US \(see map\)](#). If FEMA is the solution, then why is Donald Trump suddenly in the news promoting “[Freedom Cities](#)” on federal land? Could these be centered in FEMA regions?

Yes they could.

Raise The Red Flag!

The “[freedom cities](#)” movement is promoted as being “a decentralized collection of dozens of local and national progressive” groups, dedicated to civil and immigrant rights that have banded together “to fight anti-sanctuary policies.” Some “freedom cities” include: Madison, Wis.; Portland,

Oregon; Ann Arbor, Michigan; Albany, California; Silver City, New Mexico; Austin, Texas; and dozens of others.

For any discerning human, “**government rights**” is a **red flag**. Governments do not grant rights. Government can only grant [benefits and privileges that come with citizen responsibilities](#). Rights are [not gifts from government](#). Rights are innate, by birth, that governments are established to protect. Choice cannot be legislated. So, any talk of new “government rights” along with the new definition of “freedom” should be questioned. Can you say, ***Police State America?***

See map of U.S. [Federal-owned land by State](#)

Under [Rex 84](#), short for the Readiness Exercise Program, signed by President Ronald Regan in 1984, there are now over 600 FEMA camps nation wide, or about 12 FEMA camps in every state on federal land. In the event that Martial Law is implemented, FEMA would be able to detain large numbers of U.S. citizens. Two subprograms ***Cable Splicer*** and ***Garden Plot*** could follow after Martial Law, during times of major civil disturbances. Cable Splicer and Garden Plot are code names for a [regionalization](#) and orderly takeover of the state and local governments by the federal government.

Nature Strives For Balance

In order to prevent the demise of the human population, young 20-something couples will need to bear 3-4 children starting now. Yet, is such a plan feasible in the toxic, expensive world humans have allowed to manifest? [What does China want with people's DNA,](#) anyway?

Nature strives for balance, of which humans are a part. If humanity has lost its ability to procreate, then humans have lost an ability to come into balance, which is what Nature offers. Are humans really herd animals? Are we evolving or devolving? Have the majority of humans disconnected from Nature? Do they accept the demonization of Nature's healing

plants and [mushrooms](#) while accepting experimental injections of unknown substances?

Perhaps it is time for humanity to protect its DNA as it would protect its children or its property, before humanity is lost altogether.
