

# The Real Meaning Behind 'Operation Warp Speed'

## [The Real Meaning Behind 'Operation Warp Speed'](#)

by [James Grundvig](#), Investigative Reporter, [Vaxxter Contributor](#)  
September 30, 2020

"No vaccines... No vaccines... No vaccines..." the crowd chanted at a recent Trump rally in Fayetteville, North Carolina. The loud chorus momentarily drowned out the president. A [local news station](#) caught the raucous moment. [1:24 minute mark.]

With more people waking up to the risks and dangers of the vaccines which have come under scrutiny since the start of the pandemic, what is the likelihood of successfully rolling out a "safe and effective" COVID-19 vaccine in record time?

Answering questions at a recent Senate Health, Education, Labor & Pensions Committee hearing, in [his best Nostradamus](#) impression, Dr. Anthony [Fauci said](#): "We predict that sometime by the end of this year, let's say November or December, we will know whether or not these are safe and effective."

Right. Less than one year to design, develop and plan study protocols; to create an adverse event tracking system; to move through three trial phases to win FDA approval; and to push the vaccines into the market. Indeed, that would be a world record for the 150-year history of immunization science. Despite more than ninety manufacturers and academic institutions entering the race, the rush to deliver a vaccine makes the pharma tagline, "safe and effective," questionable at best.

Professors Peter Doshi and Eric Topol took the question a step further, publishing an [Op-Ed in the New York Times](#) on three leading COVID vaccine manufacturers in Moderna, Pfizer, and AstraZeneca, writing:

“According to the protocols for their studies, which they released late last week, a vaccine could meet the companies’ benchmark for success if it lowered the risk of mild Covid-19, but was never shown to reduce moderate or severe forms of the disease, or the risk of hospitalization, admissions to the intensive care unit or death.”

[Operation ‘Warp Speed’](#)—a name inspired by *Star Trek* for hyper-space travel—brought unlimited resources to the pharmaceutical industry. After all, it is a race against a deadly virus. Yet, the multi-trillion-dollar industry acts more like a cartel. For decades, Big Pharma has stifled vaccine innovation, stunted competition, and concentrated power. It controls all U.S. health agencies, hospital systems, and institutions of higher education. It has greased politicians on both sides of the aisle at every government level.

But now the fog surrounding the COVID vaccine race is lifting. By super fast-tracking development, President Trump put every aspect of the vaccine process out in the open for the world to see.

## **Exposing the Fraud**

The election-year magnifies the production flaws, unfeasible timelines, and flawed biological assumptions while exposing major adverse events during vaccine trials. This month, the [FDA paused AstraZeneca’s](#) phase three trial when a pair of individuals suffered “severe neurological symptoms,” including temporary, polio-like paralysis. Then [Moderna](#), which has never brought an FDA-approved vaccine to the market, ran into problems in its first two trials: scores of people developed side-effects. Moderna was working on a genetic-altering [mRNA technology](#) to deliver synthetically-coated lipid nanoparticles

inside human cells.

As the human experimentation continues, more problems become exposed and most questions are raised about vaccine safety. [After years of silence, professionals](#) – medical doctors, epidemiologists, and immunization scientists – who have rarely spoken out about the negative side of vaccines are doing so now. Notably, they work in Big Medicine.

Why have the industry professionals started to speak out? The public's eroding trust in the healthcare industry is at stake. They are evaluating the available science and are coming to the conclusion that no vaccine developed in record time, one that could injure thousands of people, would be worth the risk. What if massive side effects occur? A revolt by the people, whose tax money is paying for the gargantuan program, could shrink Big Pharma fast. That is why Fauci implored Americans to ["trust" science](#).

But should the public trust be placed in the conflicted Dr. Fauci, who has a vested interest and [part patent holder](#) in COVID vaccines?

## **The Dual Tracks of 'Warp Speed'**

There are two 'Warp Speed' operations that have been running in parallel since the start of the year. The first Warp Speed encompasses the vaccine sprint put in place by President Trump and the Department of Health and Human Services' (HHS). This program, meant to "vaccinate the world," is supposed to set people free and return life to normal. Orchestrated outside the United States, the other Warp Speed set the shadow plan in motion years ago.

The socialists who occupy the leadership suites at the United Nations, World Bank, the World Health Organization (WHO), and their signatories and sponsors rolled out a Trojan horse, releasing change agents to sack economies worldwide. They needed a global mutating virus. They needed doubt and

uncertainty. They needed mainstream media to push fear and panic 24/7. The globalist's Warp Speed required governments to sell out their citizenry and state sovereignty, to lockdown societies, impose draconian rules, eliminate entire industries and crash every country's economy. And this oppression needed to be put into place before they unleash COVID vaccines.

But their War-Gamed scenarios last fall at the [Wuhan airport drill](#) and the Gates Foundation [Event 201](#), which simulated 65 million people dying from a coronavirus outbreak, failed to materialize. Soon after they released The Plan, their [broken computer models](#) were questioned and were smashed by real data. Inflated case numbers from faulty testing were exposed and the number of hospitalizations and deaths did not match the anticipated (fake) trajectory.

Still, that hasn't stop the [United Kingdom](#) from imposing a second, stricter lockdown for the next six months on its residents or prevent the [French government](#) closing down bars and restaurants in Marseille; or stop the European Union buying [300 million doses](#) of Sanofi/Glaxo COVID vaccine before it is market-ready.

With no data to support such draconian measures, why is the civilized world headed for another round of traumatic, unhealthy lockdowns when the first attempt failed to contain the spread of the virus or minimize the number of deaths? It makes little sense on the surface.

But when one probes deeper, one finds the Shadow Plan, a plan that wasn't designed to extinguish the virus or help citizens recover economically from the outbreak. The globalists' Warp Speed seeks to erect a new global order.

The same UN, which hosted the Event 201 emergency pandemic session last year, sent out its leadership to announce the 'First Access to COVID-19 Tools (ACT) [Accelerator Facilitation Council Meeting](#).' Secretary-General António Guterres began

with the obligatory remarks about a “common enemy” and the will to “save lives over the next twelve months...” before he threw a hard curveball. In plain, innocuous language, he blithely warned:

**“I know many pin their hopes on a vaccine—but let’s be clear: there is no panacea in a pandemic. A vaccine alone cannot solve this crisis; certainly not in the near term.”**

*What? Wait!*

For the past two decades, the UN, WHO, CDC, and Big Pharma have promoted to the world that vaccines are the only solution, the only path to better health, especially in a pandemic. In fact, just three days earlier, the WHO’s Director Tedros held a [September press conference](#), remarking on the “blue skies” the lockdowns created, despite the loss of life and damaged economies. Tedros said:

“But there have also been some unexpected benefits. In many places, we have seen a significant drop in air pollution. We have been reminded of how starved our lungs have been of clean, unpolluted air. We have had a glimpse of our world as it could be. And that is the world we must strive for. Ultimately, we are not just fighting a virus. **We’re fighting for a healthier, safer, cleaner, and more sustainable future.**”

## **The ‘Great Reset’**

Right on cue, climate change thrust its submarine bow through the pandemic ice sheet and announced as the top priority on the globalists’ agenda. Not halting the spread of the virus. Not creating a wonder vaccine. The World Economic Forum crowned their Shadow Plan, [The Great Reset](#). This project has been unleashed with *the intent* to demolish economies, reshape societies, impose lifetime restrictions, and implement onerous rules. Politicians and state rulers have undoubtedly been bribed by the World Bank into participating. The bigger plan

is to erase national sovereignty and eliminate personal freedom, liberty, and choice. To the elites, losing millions – or even several billion – people along the way is not a big deal. It's just the cost of doing business.

With the [U.S. Army supporting](#) the 'Warp Speed' vaccine race, government and media lie about [influenza "skipping" the flu season](#) in the southern hemisphere. They are harvesting the number of influenza illness cases and conveniently converting them into COVID cases. The weak virus that said to have caused the pandemic has given authorities too much power and control. Call it "COVID authoritarianism." The new label appropriately describes the current government overreach.

Should the "No vaccines" advocates at Trump Rallies be concerned about the Trump Administration's apparent push to vaccinate? **The answer is affirmative.** When [senior government health officials](#) stated they would deploy "U.S. military medical personnel or National Guard troops to assist in inoculating the public once a viable, safe vaccine is developed for COVID-19," red flags and fireworks were raised from sea to shining sea.

## **Warp Speed Trojan Horse**

However, when closely examined, buried within Operation Warp Speed is a glimpse into the president's extraordinary power. When [Trump declared a national emergency](#) on March 13, Alex Azar, the Director of HHS was given specific powers to activate the 2005 PREP Act and initiate the [Emergency Use Authorization](#) (EUA). A EUA gives the FDA the power to authorize "unapproved medical products or unapproved uses of approved medical products to be used in an emergency" and a lot more. A vaccine could now be fast-tracked and approved if it met a [50 percent threshold](#) on short-term (less than a year) effectiveness. Once written in the Federal Register,

*The Public Readiness and Emergency Preparedness [\(PREP\) Act](#) provides complete immunity to companies that make*

*products, devises, or devise components known as "countermeasures." They are given complete liability protection unless a harmed party can prove the injury was a result of "willful misconduct," a legal term that is nearly impossible to prove. The EUA for COVID19 is scheduled to expire in October 2024, unless it is extended. Obviously, this Plandemic isn't going away any time soon.*

What no one is talking about is this: What happens when President Trump declares the pandemic emergency is over? HHS would lose its special powers; the EUA and its protection would evaporate. What then would happen to Operation Warp Speed? Would the government stop funding the vaccine race?

For the Great Reset to achieve its plan, the globalist designers need six to 18 more months of lockdowns to finish breaking the global supply chain and eliminate all small-to-midsize businesses. It needs a little more time to impose police state control over the masses vis-à-vis manufactured food shortages and digital currencies. It needs a little more time to get people to beg for the implantable tracking devices to join the New World Order.

Thus, there is a real sprint going on between the globalists' Great Reset and Operation Warp Speed. Who will win? Who will come out on top? European socialists? Or the United States of America?

Time is of the essence. Forced vaccinations loom over the horizon. Will President Trump pull the plug on the Warp Speed vaccine race?
