Kary Mullis invented the Polymer Chain Reaction (PCR), and won the Nobel Prize in Chemistry for his efforts. He attempted to expose Fauci for what he really is, which is not what is presented to the public. The public interest was not widespread, nor were Mullis's revelations accepted at the time, and just three months before the Covid scam was purposely manufactured and perpetrated against humanity, Kary Mullis mysteriously died of what was said to be pneumonia. This was very convenient for the inventors of this evil and deadly fraud, and Mullis's invention was intentionally misused for very nefarious reasons that allowed the people to be fooled into believing that a dangerous virus and pandemic would be the death of tens millions. It was all a lie!

This four minute video tells a tale that should be viewed by everyone, and touches on Fauci's thirty year reign of terror against the innocent. Fauci belongs in prison for life, and so do all those involved in this scam.
