They are introducing nanotechnology into all sorts of injectable products, especially in what they call vaccines for Covid.

Self-assembled nanotechnologies, based on graphene, are advanced non-human technologies, but implemented by humans.

The parasitization of our species ordered by “them” will lead to the extinction of human beings as we know them, who will become transhuman, monitored, with non-human thoughts that can in turn be read remotely via electromagnetic waves. Managed by AI, we will become what they call enhanced humans. Augmented humans.

Ricardo Delgado - Bioestadístico

We're talking directly about scientific evidence that is under the microscope, that is in the injectables, that have been administered to a large part of the world population and that continue to be administered with the support and collaboration of health care personnel, who think they are doing good

but really what they are doing is introducing a very high level nano technology interface

and a technology that is not even human, although it was, after all, developed by humans, induced by them.

It can be called reverse technology.

But carbon nanotubes, these quadrangular patterns, orthorhombic, as Dr. Roger Leir

and this Italian team call them, which are in what appear to be extraterrestrial implants are exactly the same as what has recently been administered to billions of people on the planet.

I repeat: the same technology that different independent research teams have been talking about for many years, in alleged implants of extraterrestrial origin, carbon nanotubes and a self-assembling formation of crystals that can be radiomodulable by radiofrequency, is exactly the same as what has been introduced into the vials of Pfizer, Astrazeneca, Moderna, Janssen, intranasal for influenza, intranasal for covid, etc.

From there on, everyone is free to dispose of the information as they see fit.

You can see that they're developing all the technology in all the areas so that it can be injected in this way, with this platform.

That's why they may end up saying stop, this is a failure, people are suspicious, and you have to go through other channels.
