How much longer can the majority of industrialized / militarized societies hide from reality? Not long. Foundations of power structures are fracturing from every direction, many critical issues are finally beginning to come to light. Though this is, in many ways, a leap in the right direction, it also leads to unbridled desperation on the part of those who wield power. Are radio programs on the political left or right mentioning anything about the most critical threats we face? No. A week after America's latest illegal and unjust bombing of a sovereign nation (Syria), how many Americans even remember? How many care? Regions of South America are sliding toward chaos, has US mainstream media said a word? The US Air Force is desperately trying to put nearly 200 additional jet aircraft tankers into service. Is this for the purpose of increasing the ongoing toxic atmospheric spraying to even more extreme levels? How much longer can the biosphere and the web of life sustain the assault? Where do we go from here? The latest installment of Global Alert News is below.

With every passing day the more and more are finally waking up to the rapidly darkening horizon, it is up to all that are already awake to continue sounding the alarm. In doing so, it is imperative to share [data that is factually on completely](#)

[solid ground](#), anything less inevitably leads to the marginalization of the critical climate engineering cause. [Make your voice heard](#), while it can still make a difference.
