Unknown to most of the public and conveniently suppressed by the media, a [meeting](#) was held on March 6, 2020 with the Advisory Commission on Childhood Vaccines (ACCV), under the U.S. Department of Health and Human Services.

These are quarterly meetings held every 3 months, as required by law, but seldom, if ever, reported by media.

The March 6th meeting by the [Advisory Commission on Childhood Vaccines](#) included a report (read full report below) from the Department of Justice (DOJ) on cases settled for vaccine injuries and deaths as mandated by the *National Vaccine Injury*

Compensation Program (NVICP).

The NVICP was started as a result of a law passed in 1986 that gave pharmaceutical companies legal immunity from being sued due to injuries and deaths resulting from vaccines.

If you or a family member is injured or dies from vaccines, you must sue the US federal government in this special vaccine court. Many cases are litigated for years before a settlement is reached.
