Earth's life preserving ozone layer is deteriorating at blinding speed, covert climate engineering operations are the single greatest causal factor. If this destruction is allowed to continue unabated, the total collapse of the ozone layer will soon determine our collective fate. UVC radiation is now reaching the surface of the planet, this DNA damaging spectrum of solar radiation is the last spectrum of UV before x-rays. Geoengineering Watch has monitored the ever increasing UVC radiation for many years while trying simultaneously to sound the alarm. In this video report a former NASA contract engineer sends a dire warning.

PART ONE

All are needed in [the critical battle to wake populations](#) to what is coming, [we must make every day count](#). Share [credible data](#) from a credible source, make your voice heard. Awareness raising efforts can be carried out from your own home computer.
