

Vaccine Mandates ‘Vile, Unconstitutional, Immoral, Unscientific, Discriminatory’

[Vaccine Mandates ‘Vile, Unconstitutional, Immoral, Unscientific, Discriminatory’](#)

The National Black Caucus of the Green Party of the United States strongly opposes the use of forced vaccination via mandates and the discrimination that is being generated around these policies.

Today’s polarizing climate is competing for the trust and confidence of citizens more than ever before. The nature of power is changing and these changes are not measured simply by a degree of control by [COVID mandates](#) and quarantines.

In today’s political environment, the speed and accessibility of information created “digital reflections” that made medical facts vulnerable, eroding trust between the White House administration, National Institutes of Health, U.S. Department Health and Human Services, Centers for Disease Control and Prevention and World Health Organization.

The fear of losing control in our fast-paced social media environment is pushing us toward exclusion. Our current leaders, whether Congress or the White House administration and even our current steering committee, should instead develop an instinct for inclusion.

The [coronavirus pandemic](#) is one of our most dangerous wars in human history, because the most lethal attacks are the ones that catch us off guard.

Being caught off guard has caused erroneous data reporting that is currently being exposed by the Freedom of Information Act request because we are not only unsure about the numbers, but being certain that the numbers are incorrect, is the most difficult issue many are facing today.

In a pandemic world where verifying case numbers is becoming increasingly difficult, inclusion is imperative and our [Consumer Protection](#) plank of the Green Party of the United States (GPUS) must be honored.

Lockdowns, [mandates](#) and [passports](#) are the major issue of the day with millions of people protesting against them worldwide. In fact, what has become known as the “medical freedom” movement is arguably the biggest and most diverse international movement in world history.

Vaccine mandates and vaccine passports are among the most vile, unconstitutional, immoral, unscientific, discriminatory and outright criminal policies ever enforced upon the population and goes against everything GPUS stands for under social justice.

These policies are coming from an out-of-control government at the behest of the [pharmaceutical industry](#).

The mainstream media and social media are also working in lock-step to [censor](#) any and all [doctors](#), scientists and investigative journalists who have an opposing view or who even question the current mainstream media orthodoxy.

Workers are being forced out of their jobs, many with medical exceptions from their doctors, students are being denied entrance to educational institutions, needed medical treatment is being [denied](#), medical privacy is being violated,

constitutionally protected rights to movement and assembly (including the right to travel) are being threatened, rights to normal societal participation are being decimated.

It has taken a while, but more recently many medical professionals, elected officials and federal judges have come out fully against lockdowns, vaccine mandates, vaccine passports and of course massive censorship.

There is a growing clarity among many that these measures have nothing to do with health and everything to do with a power-grab at levels never before seen in the history of the world.

The [National Black Caucus](#) of the GPUS [adheres to the principle](#) that informed consent in all personal health and medical decisions is an inalienable human right.

Under no circumstances shall any medical treatment or procedure – including psychotropic medications, vaccines and/or other injectable treatments – be mandated or coerced.

Individuals should be allowed to protect/heal themselves in a manner that best supports their medical and spiritual beliefs.

The coercive methods we oppose include:

- Threats to personal health information privacy at every level.
- Discrimination and/or lack of access to public education, public housing or other public services.
- Removal of minors from their guardians.
- Any travel restrictions and/or restrictions from public spaces based on a requirement for “vaccine passports” or any other proof of “compliance” with any medical intervention.
- Vaccine requirements that target specific populations based on ethnicity/race, even if positioned as correcting disparities.

We further oppose the use of privacy-invasive technology and artificial intelligence (AI) [monitoring systems](#) (including [facial recognition](#), fingerprint apps, [tracking cell phones](#) or any other personal electronic devices and credit score systems) as a way to monitor and track the movements and/or restrict the rights of individuals to freely exist and assemble as they choose, especially when applied to personal health care choices.
