

# Vaccine Trial Catastrophe: Moderna Vaccine has 20% 'Serious' Injury Rate in High Dose Group

## [Vaccine Trial Catastrophe: Moderna Vaccine has 20% 'Serious' Injury Rate in High Dose Group](#)

by [Robert F. Kennedy, Jr.](#), Chairman, [Children's Health Defense](#)  
May 22, 2020

Despite Moderna's cheery [press release](#) this week, the clinical trial results for its groundbreaking COVID vaccine could not be much worse.

The vaccine, developed and [championed by Anthony Fauci](#) and [financed by Bill Gates](#), used an experimental [mRNA technology](#) that the two men hoped would allow rapid deployment to meet President Trump's ambitious "warp speed" time line. Dr. Fauci was so confident of his shot's safety that he waived ferret and primate [studies](#) (Moderna suspiciously reported no specific health data from its mouse studies). That appears to have been a mistake.

intervention."

[Three of the 15 human guinea pigs](#) in the high dose cohort (250 mcg) suffered a "serious adverse event" within 43 days of receiving Moderna's jab. Moderna did not release its clinical trial study or raw data, but its press release, which was freighted with inconsistencies, acknowledged that three volunteers developed [Grade 3 systemic events](#) defined by the FDA as "Preventing daily activity and requiring medical intervention."

Moderna allowed only exceptionally healthy volunteers to participate in the study. A vaccine with those reaction rates could cause grave injuries in [1.5 billion humans](#) if administered to “every person on earth”. That is [the threshold that Gates has established](#) for ending the global lockdown.

Moderna did not explain why it reported positive antibody tests for only eight participants. These outcomes are particularly disappointing because the most hazardous hurdle for the inoculation is still ahead: challenging participants with wild COVID infection. [Past attempts at developing COVID vaccines](#) have always faltered at this stage as both humans and animals achieved robust antibody response then sickened and died when exposed to the wild virus.

Moderna’s press announcement heralded “Positive Interim Phase 1 findings”. I have forwarded that claim to my colleagues in securities law; FTC rules restrict the amount of lipstick public companies may slather on bad donkeys.
