

Virology's Assumptions

Unproven

[Virology's Unproven Assumptions](#)

by [Mike Stone](#), [Viroliegy](#)

March 4, 2022

If you are looking for one of the most masterful takedowns of virology to date, this presentation by [Alec Zeck](#), Dr. Jordan Grant, [Mike Donio](#), [Jacob Diaz](#), and [John Blaid](#) is one of the best out there. When I first watched it a month ago, I was blown away and I had intended to share it here but, as often happens, I got sidetracked and sadly forgot to upload it. I hope you can take away a great deal of value from this presentation as the guys delve into the numerous fallacies and assumptions related to this fraudulent field.

In this presentation, you will find:

- A break down of the ridiculous cell culture experiments
- The lack of adhering to the scientific method
- The foundational issues with virology from the very beginning
- The inherent problems with and the limitations of electron microscopy imaging
- The lack of any purified and isolated physical "viral" particles found directly in human samples
- The issues related to the creation of the theoretical genome
- The fabrication and lack of validation of the PCR test for "SARS-COV-2"
- A thorough explanation of the Stefan Lanka control experiments

- The myths of contagion and other possible explanations for dis-ease
- The FOI requests and the burden of proof

As I said, a masterful takedown of the pseudoscience called virology!

Virology's Unproven Assumptions

In this episode, Alec Zeck has a discussion with Mike Donio, Jacob Diaz, Dr. Jordan Grant MD, and John Blaid on the fallacious reasoning, unproven assumptions, and lack of proof for virus theory.
