The World Economic Forum's "Investing in Forests" program sounds great – who doesn't want to plant more trees? But behind its philanthropic appeal lies a global surveillance grid, monitoring all activity on the planet – just as prescribed by Agenda 2030 and their 4th Industrial Revolution. Christian shares an unreleased document and reveals the truth in this special Ice Age Farmer broadcast.

Video available at Ice Age Farmer [BitChute](#) and [Odysee](#) channels.
