In the conventional medical narrative, symptoms can only be explained as the result of defects, pathogens and toxins. In this forced logic, all symptoms that appear months and years after a vaccination are interpreted as vaccine damage. In the case of Corona, for example, all symptoms that appear months or years after vaccination are attributed to so-called mRNA in the vaccine. So-called spike proteins are formed everywhere in the body, which are blamed for all observed symptoms and deaths.

This is not true for several reasons: Like all so-called pathogenic viruses, there is no such thing as a corona virus . So-called mRNA technology can never work because every aspect of molecular genetics has been refuted. mRNA in the vaccine syringe is destroyed by the nanoparticles it contains. If mRNA were injected into the muscle, it would be digested within milliseconds. It is the nanoparticles contained in the vaccines that can form thromboses within a few days to weeks. Once the nanos have spread throughout the body, they cause

nonspecific inflammation, resulting in globulin formation, aka seroconversion, which is presented as immune protection. By the way: every package insert states that so-called immune protection does not provide protection against disease.

From the perspective of “real biology”, which Dr. Ryke Geerd Hamer discovered in 1985 and later called “Germanic medicine”, all symptoms, apart from the thrombosis and the more or less severe “non-specific” inflammations, immediately or shortly after the vaccination (3-4 weeks), are “psychosomatic” consequences of existential fear and terror. For example, destruction of families and livelihoods, violent isolation of people and other forms of torture. Here is just one of the resulting symptoms: In EVERYONE who feels completely alone, is on the run or believes that their existence has been destroyed, their kidneys retain water and substances that are excreted in the urine.

This “kidney syndrome” with the resulting edema formation can kill an adult within just three days. All existing symptoms become many times larger, more painful and more dangerous due to this water retention. This much larger swelling is often misinterpreted as turbo cancer, even if no tumor has grown. In the “real biology” that Dr. Hamer discovered, symptoms are not the result of previous damage, but biologically meaningful processes to enable life and survival during a conflict shock or trauma. Most symptoms appear in the phase when the conflict shock or trauma is resolved – in belief in the vaccination or the freedom that was bought by it – or at the latest when the global fear mongers in the Pentagon have ended the virus fear terror or have interrupted it for a longer period.
