

What's actually IN the US "Covid Stimulus Bill"?

What's actually IN the US "Covid Stimulus Bill"?

The answer to that is nothing like as simple as you'd expect, given the name.

December 22, 2020

The US congress just passed their Covid stimulus bill, or the "Consolidated Appropriations Act, 2021" to give its official title. So what's actually inside it? What has just been passed into law?

The answers to that is "nobody really knows", least of all the members of congress, [who passed the law without reading it](#), as they so often do. It's the longest bill in US history, at over 5500 pages and it sailed through the voting mostly sight unseen.

We've downloaded a copy of the full document and will embed it below for those of you patient or masochistic enough to tackle the whole thing. We've read some already, and will point out the highlights:

- "Foreign aid" is a big winner. Egypt is getting \$1.3 billion, Sudan, Israel and Ukraine get over 500 million each, and many other countries around the world sizeable contributions, much of which will be spent on "defense". Which is to say sent straight back to America via massive arms purchases.
- Not all the money being sent overseas is for buying weapons, some is for backing coups. Venezuela and Belarus get special mention here, each getting their own

section of the bill detailing how terrible their “illegal regimes” are. There’s also a large section on “combating Chinese influence”.

- For some reason there’s another section on copyright law, which makes illegal streaming copyrighted content a federal crimes, punishable by up to three years in prison.
- Nearly 300 million is put aside to develop influenza vaccines and prevent a future influenza pandemic.
- 4 BILLION dollars for the Gates-funded GAVI, the Vaccine Alliance.
- Vaccine “misinformation” is also a concern, and the bill provides for a pro-vaccine propaganda campaign – or rather a “PUBLIC AWARENESS CAMPAIGN ON THE IMPORTANCE OF VACCINATIONS”

So – huge amounts of foreign aid, support for various coups, totally irrelevant copyright laws, provisions for pro-vaccine propaganda campaigns...it’s not your typical “stimulus bill” so far, is it?
