With the passage of the 2022 Defense Authorization Act giving the executive branch sweeping powers over the use of the military in all domestic affairs, and with the obvious obsession by a supranational deep state technocracy intent on imposing a final endgame scenario onto the United States, it is important to recognize the historical precedent of the attempted Bankers' Coup of 1934 that sought to impose a fascist puppet dictator into the White House. Unfortunately for the JP Morgan network managing this coup, the puppet they selected for their "American Mussolini" was a patriotic retired General named Smedley Darlington Butler.

In this new Canadian Patriot Review film based upon the essay "[Why Assume There Will be a 2024 Election?](#)" produced/narrated

by Jason Dahl, you will be introduced to this dense period of history beginning with the orchestrated demolition of the financial system in 1929, the Wall Street/London fueled “economic miracle solution” of fascism and eugenics between 1930-1934, and the story of FDR’s war with the financier oligarchy’s London and Wall Street tentacles. From this vantage point, we are then thrust into a deep dive into the person of Smedley Butler and his courageous defense of the republic.
