*Voluntaryism and Peaceful Anarchy Expose the Violence, Illegitimacy and Criminality of "Government"*

***Voluntaryism is the only "ISM" that is fair for everyone. All other "ISM" have a ruling class that gets to use violence and extortion on everyone else to achieve socio-economic objectives. Elections are immoral/illogical and easily rigged by monied interests.***

Anarchy doesn't mean "No Rules"; it specifically means "**No Rulers,**" but because the organized crime "Rulers" don't want the public to know there is an option on the menu called "No Rulers," they have used their weaponized media and propaganda system to change the meaning of the word: "No Rulers" to mean: Chaos and Dystopia.

# ANARCHY

From the Greek prefix *an-* (αν-):  
“*without; the absence of*” and  
the Greek noun *archon* (αρχων):  
“*master; ruler*”

Anarchy does NOT mean  
“*without rules.*” It literally means  
“*without rulers; without  
masters.*”

## No Rulers. No Masters.

The practice started in France where the organized crime government of 1893 passed the [Lois Scelerates](#) (“villainous laws”) that made it illegal even to use the word: Anarchist. Now organized crime uses their control of the media, Wikipedia, and even the dictionary to confuse the public by associating Anarchy with everything from violence to communism.

The Canadian police [were caught staging violence with police dressed as “anarchists” during protests against the G8 in Montebello in 2007.](#)

The word “Liberal” went through a similar weaponization. The root word is Liber which means “free,” Early liberals were similar politically to today’s small government “libertarians.” Because organized crime didn’t want the public to know there was an option on the menu called: “free” or “libertarian,” they used their control of the media to popularize the word to mean “leftist.” The term “libertarian”

is, in many ways, a re-branding of the word liberal after it was weaponized and hijacked. Many older advocates of freedom refuse to part with such a noble word and refer to themselves to this day as “Classical Liberals” to denote the difference.

The weaponized media propaganda system would have you believe that Anarchy is something to be feared because without “Gubernare Mente”/ Government, there would be Mad Max chaos and murder in the streets. The reality is that Anarchy is a philosophy of peace where most anarchists believe in the NonAggression Principal, where initiating violence is illegitimate except in self-defense or protection of property.

# NON-AGGRESSION PRINCIPLE

**An ethical and moral principle that asserts that aggression is inherently immoral and illegitimate. Aggression is defined as the "initiation" of physical force against persons or property, the threat of such, or fraud upon persons or their property.**

**In contrast to pacifism, the NAP does not prohibit self-defense.**

**The fact that "governments" and their hired mercenaries (military and police) routinely violate the NAP proves definitively that they are immoral and illegitimate.**

In a world without rulers, there would still be both a market for justice and armed protective services but without monopoly government, the protectors would only be focused on actual crime (not victimless crimes or road piracy). They would not delusionally believe they have rights that others don't and could be fired immediately at the first sign of abuse. Many legal theorists believe anarchy would lead to dramatically less crime and violence in society with more prosperity for all.

**Understanding Propaganda – The Dictionary as a Weapon**

The Merriam-Webster Dictionary is owned by Encyclopedia Britannica, which is [owned by the Safra banking family](#), where Leslie Gelb, President Emeritus of the Council on Foreign Relations, sits on the Editorial Board of Advisors. You can understand the weaponization of language by comparing the 1828 Webster's Dictionary definition of Anarchy with the current definition from Merriam-Webster's online dictionary, which has been promoting a pro-Statist version of the word: Socialism in the "Trending Now" section, the #1 spot available to promote a specific word/concept, for over a month as of this writing.

Their own definition of "democratic socialism" laughably claims "*would ensure economic growth and a fair distribution of income.*" Technically any kind of socialism only achieves "redistribution" at the point of a gun, and "fair" to whom? Who decides? The Bankers and CFR members who own/control Merriam-Webster? Their definition of Socialism also falsely claims that "socialism" was "conflated" with communism when communism IS, by definition, socialism. Compare their claim of socialist "fairness" to their misrepresentation of Anarchy as "Utopian," disorder and something that "prevailed in the ghetto."

## Voluntaryism (The "Re-Brand")

# VOLUNTARYISM

The common sense idea that human association should be voluntary... with the assertion that any act of violence other than self-defense, whether by an individual, organization or government, is illegitimate and unlawful.

Recognizes that the world is a self-organizing system that produces spontaneous order and all government "services" would be better provided by the free market, mutual aid societies, nonprofits, and real charities.

Voluntaryism – A political and social philosophy that all forms of human association should be voluntary and based on the [Non-Aggression Principal](#) (NAP) that posits that any initiation of violence on peaceful people is illegitimate, no matter what the outcome, but allows for the use of force in self-defense or to protect property. There is also an understanding that the world is a self-organizing system that produces spontaneous order with no need for top-down hierarchical control of society. In a voluntaryist society, all the “services” provided by the government – from protection to roads to charity – would be better supplied by voluntary interaction, the free market, mutual aid societies, co-ops, non-profits, and genuine charity.
