

**NOTICE AND WARNING OF
NO CONSENT FOR
MEDICAL TESTING**

All medical procedures, including testing, must be consensual and performed by a licensed physician in order to be lawful.

Non-consensual administration of a medical procedure is felony assault and battery whether or not administered by a licensed physician and is grounds for major claim and lawsuit and criminal prosecution of all parties complicit in the administration of the non-consensual medical procedure.

You may not conduct any medical procedure or testing on my body or the bodies of my children without written consent from me. "Protection" of any "group" such as "the general public" may not be used as an excuse to violate individual rights.

If you attempt any medical procedure on me or my children without my consent I am fully within my rights to use whatever force is necessary to prevent that and to bring legal action to receive compensation, penalties and administer criminal prosecution against those who assault me and my children.

For your own safety I warn you to obey the law and only administer medical procedures to those who provide written consent.
